EPA Reg. No. 34704-610 EPA SLN No. OR-120002

• IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.
• THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF APPLICATION.
• FOLLOW ALL APPLICABLE DIRECTIONS, RESTRICTIONS, WORKER PROTECTION STANDARD REQUIREMENTS, AND PRECAUTIONS ON THE EPA REGISTERED LABEL

ENVIRONMENTAL HAZARDS
This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. Runoff or erosion from treated areas may be hazardous to fish in neighboring areas. Due to risk to plants and animals in aquatic habitats that receive runoff containing this product, use of controls such as a vegetative buffer strip to filter such water flow from recently treated fields is recommended.
DIRECTIONS FOR USE

DILL GROWN FOR OIL / CONTROL OF ANNUAL GRASS AND BROADLEAF WEEDS

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and green-houses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls over long-sleeved shirt and long pants,
- Chemical-resistant gloves, such as barrier laminate or viton,
- Chemical-resistant footwear plus socks and
- Protective eyewear.

- Apply Curbit EC as a postplant surface applied herbicide prior to emergence of crop and weeds. Broadcast the following rates in at least 20 gallons of water per acre by ground equipment only.
  
<table>
<thead>
<tr>
<th>Soil Type</th>
<th>Rate (pints per acre)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Coarse Soils</td>
<td>1.5 - 2 pints</td>
</tr>
<tr>
<td>Medium Soils</td>
<td>2 - 2.5 pints</td>
</tr>
<tr>
<td>Fine Soils</td>
<td>2.5 - 3 pints</td>
</tr>
</tbody>
</table>

- Using overhead sprinkler irrigation, activate Curbit EC with a minimum of one-half inch (½”) of irrigation water within two (2) days after application. Irrigated fields may be shallowly cultivated without loss of Curbit EC activity.

- Weeds controlled by Curbit EC include barnyardgrass, common lambsquarters, and redroot pigweed.

RESTRICTIONS / PRECAUTIONS:

- Do not make more than one application of Curbit EC per season.
• Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.
• For use under this SLN label do not apply this product through any type of irrigation system.
• Do not apply within 91 days of harvest.
• Refer to the federal label for rotational crop restrictions.
• Do not apply Curbit EC to soils which are wet, cloddy, or subject to prolonged periods of flooding because poor weed control or crop injury may result.
• Under cool temperature conditions that can delay early seedling emergence or growth, Curbit EC can cause plant injury or crop failure. Be especially cautious during first planting of season when this condition is likely to occur.
• Due to risk to plants and animals in aquatic habitats that receive runoff containing this product, use of controls such as a vegetative buffer strip to filter such water flow from recently treated fields is recommended.

Loveland Products, Inc., Special Conditions and Disclaimer for use of Curbit EC on Dill Grown for Oil

Loveland Products, Inc., intends that this Section 24(c) label be distributed only to end users and/or growers who agree in writing to the terms and conditions required by Loveland Products, Inc. including a waiver and release from all liability and indemnification by the user and/or grower of Loveland Products, Inc., and others for failure to perform and crop damage from the use of Curbit EC on dill grown for oil. If such terms and conditions are unacceptable, return Curbit EC at once unopened.

This product when used on dill grown for oil may lead to crop injury, loss, or damage. Loveland Products, Inc., recommends that the user and/or grower test this product in order to determine its suitability for such intended use. Loveland Products, Inc., make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated with the use of this product. The decision to use or not to use Curbit EC must be made by each individual Curbit EC user and/or grower on the basis of possible crop injury from Curbit EC, the severity of weed infestation, the cost of alternative weed controls, and other factors. Loveland Products, Inc., intends that because of the risk of failure to perform or crop damage that all such use is at the user’s and/or grower’s risk, to the extent consistent with applicable law.

This Special Conditions and Disclaimer statement is required by Loveland Products, Inc. and is not required or enforced by the USEPA or the ODA.
