PONCHO®/VOTiVO™

EPA Reg. No. 264-1109
For Use on corn, cotton, sorghum, soybean, and sugarbeets

This supplemental label expires and must not be distributed or used after 11/29/2014.

SUPPLEMENTAL LABEL
PONCHO®/VOTiVO™

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read this label and the product package label before using this product. This Supplemental Label must be in possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the registered product package label for PONCHO®/VOTiVO™.

SEED BAG TAG

The Federal Seed Act requires that the container of seed treated with PONCHO/VOTiVO must be labeled with the following statements:

- This seed has been treated with PONCHO/VOTiVO, which contains 40.3% clothianidin and 8.1% Bacillus firmus I-1582.
- Use planting equipment that will plant treated seed into the soil to a minimum depth of 0.5 inch.
- Do not use treated seed for food, feed, or oil production. Excess treated seed may be used for ethanol production only if (1) by-products are not used for livestock feed and (2) no measurable residues of pesticide remain in ethanol by-products that are used in agronomic practice.

In addition, the US Environmental Protection Agency requires the following statements on the container of seed treated with PONCHO/VOTiVO:

- Regardless of type of application (seed treatment or foliar), do not apply more than 0.2lbs (Soybean), 0.1lbs (corn), 0.2lbs (cotton), 0.14lbs (Sugarbeet), or 0.02lbs (sorghum) of active ingredient clothianidin per acre per season.
- Store away from feeds and foodstuffs.
- Wear long-sleeved shirt, long pants, shoes, socks, and chemical-resistant gloves when handling treated seed.
- Dispose of all excess treated seed. Left over treated seed may be double sown around the headland or buried away from water sources in accordance with local requirements. Do not contaminate water bodies when disposing of planting equipment washwaters.
- Dispose of seed packaging in accordance with local requirements.
- This compound may be highly toxic to bees exposed directly (contact). Ensure that planting equipment is functioning properly in accordance with manufacturing recommendations to minimize seed coat abrasion during planting to reduce dust which can drift to blooming crops or weeds.
- This compound is toxic to birds and mammals. Treated seeds exposed on soil surface may be hazardous to birds and mammals. Cover or collect treated seeds spilled during loading.

Created on: 11/28/2011
• For Field Corn, Popcorn and soybeans: **Immediate Plant-back**: Cereal grains, Field corn, popcorn, sweet corn, cotton, rapeseed, canola, soybeans, root and tuber vegetable, **30-Day Plant-back**: Grasses, non-grass animal feeds, dry beans, **8-Month Plant-back**: Sugar cane, **12-Month Plant-back**: Any crops without an earlier plant-back interval.

• For Cotton, Sweet corn, and Sorghum: **Immediate Plant-back**: Cereal grains, Field corn, popcorn, sweet corn, cotton, rapeseed, soybeans, canola, sorghum, root and tuber vegetables, **30-Day Plant-back**: Grasses, non-grass animal feeds, dried beans, **4-Month Plant-back**: Any crop without an earlier plant-back interval.

• For Sugarbeet: Immediate plant back: cotton, corn (field, sweet and pop), rapeseed, sorghum, sugarbeet, canola and soybeans. These areas may also be replanted after 30 days with cereal grains (Crop Group 15 except rice), dried beans, and dried peas. Do not plant any other crop in the treated area for at least one year after treated seeds are planted.

• In soybean, foliar sprays of clothianidin can be applied 45 days after planting Poncho/Votivo treated seeds for mid-to-late season foliar insects.

• Do not graze or feed soybean forage and hay to livestock.
