Swimmer's Choice
Granular Shock

ACTIVE INGREDIENTS:
Sodium dichloroisocyanurate dihydrate ............ 99%
OTHER INGREDIENTS ........................................... 1%
TOTAL .......................................................... 100%
Available Chlorine ............... 56%

KEEP OUT OF REACH OF CHILDREN
DANGER

Contamination or improper use may cause fire or explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not mix this product with a small amount of water. Only add directly to your pool.

See back panel for Precautionary Statements.

DIRECTIONS FOR USE

1. Shock treat your pool at least twice monthly (more often in warmer climates) according to Step 1 above. Do not add shock to water treatment products before putting this product into your pool.
2. Do not mix this product with a small amount of water. Only add this product directly to your pool.
3. Do not allow this product to contact any foreign matter, including other water treatment products, for it can react to cause explosion or the release of toxic gases. Do not add water to this product. Add only solid

PHYSICAL OR CHEMICAL HAZARDS:

DANGER: If product is exposed to small amounts of water, it can react violently to cause explosion, fire, and the release of toxic gases.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage or scarring. Harmful if swallowed, inhaled, or absorbed through skin. Inhalation of smoke or dust may cause severe injury and respiratory illness. Do not allow this product to contact any foreign matter, including other water treatment products. If this product is exposed to small amounts of water, it can react violently to cause explosion, fire, and the release of toxic gases. Do not add water to this product. Add only solid.

In Case of Emergency Call: 1-800-654-6911

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Guaranteed above levels of 4 parts per million (ppm) available chlorine.

This product is a stabilized concentrated shock that will provide effective control of bacteria and algae when used as directed.

1. Adjust this pool water’s pH to a value between 7.2 and 7.8 and the total alkalinity to between 80 and 150 ppm. Use a suitable test kit.
2. Dilute the pool water with 30 ppm of Swimmer’s Choice® Stabilizer as directed on the container label. Regular use of this product will provide any needed makeup chlorine.
3. Shock treat the pool water by using 1 bag of this product per 10,000 gallons of pool water. Before using the pool, be certain the chlorine level returns to 1.0 to 1.5 ppm.
4. Shock treat your pool at least twice monthly (more often in warmer climates) according to Step 1 above. During hot weather and peak bather loads, shock treat your pool weekly to prevent water cloudiness and algae growth.

2. Shock treat the pool at least twice monthly (more often in warmer climates) according to Step 1 above. Do not add shock to water treatment products before putting this product into your pool.
3. Do not mix this product with a small amount of water. Only add this product directly to your pool.

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

This product is a stabilized concentrated shock that will provide effective control of bacteria and algae when used as directed.

1. Adjust this pool water’s pH to a value between 7.2 and 7.8 and the total alkalinity to between 80 and 150 ppm as determined by a suitable test kit.
2. Dilute the pool water with 30 ppm of Swimmer’s Choice® Stabilizer as directed on the container label. Regular use of this product will provide any needed makeup chlorine.
3. Shock treat the pool water by using 1 bag of this product per 10,000 gallons of pool water. Before using the pool, be certain the chlorine level returns to 1.0 to 1.5 ppm.
4. Shock treat your pool at least twice monthly (more often in warmer climates) according to Step 1 above. During hot weather and peak bather loads, shock treat your pool weekly to prevent water cloudiness and algae growth.
