FIFRA Section 24(c) Special Local Need Label (SLN)
For Distribution and Use Only in the State of Oregon

**ORGANIC JMS STYLET-OIL**

For use on winter and spring wheat
Control of Rust (*Puccinia* spp.)

EPA Reg. No. 65564-1 EPA SLN No. OR-120012

This label is valid until December 31, 2024 or until otherwise amended, withdrawn, canceled, or suspended.

Active ingredient:
Mineral oil .......................................................... 97.1%
Other ingredients: ................................................ 2.9%
Total:.................................................................100.0%

---

**Environmental Hazards:** Organic JMS Stylet-Oil is non-toxic to bees when used as directed.

---

**Directions for use**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This State-specific Section 24(c) labeling must be in the possession of the user at the time of application. Follow all applicable directions, restrictions, and precautions on the EPA-registered label for EPA Reg. No. 65564-1.

---

Precautions and Restrictions on Spraying

Do not spray wet foliage. Do not spray when freezing temperatures are anticipated within 48 hours of an oil application, above 90° F (32° C) or when plants are under heat or moisture stress.

SPRAY DRIFT MANAGEMENT

A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, and relative humidity) and method of application (ground, aerial, or airblast) can influence pesticide drift. The applicator and grower must evaluate all factors and make appropriate adjustments when applying this product.

Wind Speed: Do not apply at wind speeds greater than 15 mph at the application site.

Temperature Inversions: If applying at wind speeds less than 3 mph, the applicator must determine if a) conditions of temperature inversion exist, or b) stable atmospheric conditions exist at or below nozzle height. Do not make applications into areas of temperature inversions or stable atmospheric conditions.

Droplet Size: Apply as a medium or coarser spray (ASABE standard 572), and the minimum volume mean diameter (VMD) for spinning atomizer nozzles.

For Ground Application: Apply a minimum of 15 gallons per acre by ground equipment, but use a spray volume that assures uniform coverage of the infested portions of the treated crop. Apply using a nozzle height of no more than 4 feet above the ground or crop canopy. Calibrate equipment to the desired spray volume. Optimum results are received when higher spray volumes are used.

Wind Speed: Do not apply at wind speeds greater than 15 mph at the application site.

Droplet Size: Apply as a medium or coarser spray (ASABE standard 572), and the minimum volume mean diameter (VMD) for spinning atomizer nozzles.

For Aerial Application: For best results, apply Organic JMS Stylet-Oil in 5-10 gallons of water/Acre. Higher gallonage will provide better coverage and performance. Observe the minimum safe application height-not greater than 10 feet above crop canopy.
**Boom Length:** The boom length must not exceed 75% of the wingspan or 90% of the rotor blade's diameter.

**Swath Adjustment:** When applications are made with a crosswind, the swath will be displaced downwind. The applicator must compensate for this displacement at the downward edge of the application area by adjusting the path of the aircraft upwind. Leave at least one swath unsprayed at the downwind edge of the treated field.

**Wind Speed:** Do not apply at wind speeds greater than 15 mph at the application site.

**Droplet Size:** Apply as a medium or coarser spray (ASABE standard 572), and the minimum volume mean diameter (VMD) for spinning atomizer nozzles.

Thorough coverage and proper equipment calibration are critical to achieve good control when aerially applying JMS Stylet-Oil. Aerial applications may not provide the same level of efficacy that can be obtained with ground equipment.

**Chemigation:** Do not apply this product through any type of irrigation system.

**Tank Mixing with Other Fungicides**
Combining Organic JMS Stylet-Oil with other fungicides labeled for use on wheat may increase the efficacy of both products. In limited trials, phytotoxicity has not been evident; however, it is always recommended to test products for compatibility and possible phytotoxicity. Follow all directions on the main label regarding chemical and physical compatibility and phytotoxicity.
