SPRING ALGAECIDE
For Control of Algae & Algal Slime Growth in Swimming Pools

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER. Keep Out of Reach of Children. Corrosive. Causes irreversible eye damage and skin irritation. Harmful swallowed or absorbed through skin. Do not get into eyes, on skin or on clothing. Wear protective eyewear (goggles), safety glasses or face shield, protective clothing, and rubber gloves. Wash thoroughly with soap and water after handling and any skin contact. Do not contaminate food, feed, or drinking water. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARD. Harmful to aquatic life.

PHYSICAL OR CHEMICAL HAZARDS
Do not use or store near heat or open flame in car.

Do not mix with soap, anionic detergents or oxidizers.

This product is compatible with most chemicals normally used in swimming pool maintenance; however, in its concentrated form, this chemical must not come in contact with high concentrations of chlorine or other oxidizers. Do not mix this product with chlorine or any other oxidizer together before adding to the pool. These chemicals must be handled separately. This product was formulated to complement most swimming pool sanitizers. This product is not a stand alone product, it must be used with halogen based or non-halogen based pool sanitizers.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Please read entire label and use strictly in accordance with precautionary statements and directions. This product requires no special equipment for treating swimming pool water. The correct use dilution may be added directly to the pool in any spot or added to the water circulation equipment. This product works the best when added by itself directly to pool water.

INITIAL APPLICATION FOR SWIMMING POOLS
1. Backwash the filter thoroughly. 2. Vacuum algae debris and thoroughly brush pool. 3. Add 28 oz. of this product to each 10,000 gallons of water or ratio thereof. 4. Vacuum pool after 24 hours to remove dead algae. 5. If algae is still visible repeat steps 2, 3, 4, and 5 as necessary until pool is free of visible algae. 6. Once algae are under control, clean filter and return to normal operation.

MAINTENANCE APPLICATION
Add 4 oz. of this product in 50,000 gallons of water every 3-6 days as needed.

BOOSTER APPLICATION
Add one quart of this product in 50,000 gallons of water after a heavy or prolonged rainfall or when there is a heavy bathing load. The above directions must be followed even when the pool is not in use. If algae growth is noticeable, apply initial dose.

INSTRUCTIONS FOR USE WITH HALOGEN BASED POOL SANITIZERS
This product is formulated to complement most swimming pool sanitizers. When using other products as outlined in Directions For Use on these products, always follow Directions For Use on these products. This product is effective against the growth of algae. This product is efficient and non-toxic when used as directed. This product will not evaporate and its algae fighting abilities actually increase as pool water temperature increases.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturers directions. Adjust pH between 7.2-7.8, Adjust Chlorine residual to 1-3 ppm. If in a chlorine treated pool, add stabilizer to establish a minimum level of 40-50 ppm to reduce the degenerative effects of sunlight upon the chlorine residual. Check for metals and if present add a stain and scale inhibitor to prevent staining of pool surface due to metals. Check chlorine residual and adjust to 1-3 ppm. Maintain sanitizer products in accordance with label directions found on your sanitizer of choice. When using other products as outlined in directions for this product, always follow directions on these products. Add this product directly into pool by pouring around entire outside perimeter of pool. Allow the filter to run for at least 6 hours after adding algicide. During this period, do not allow swimmers in the water.

OPTIONAL INSTRUCTIONS FOR USE WITH NON-HALOGEN BASED POOL SANITIZERS
This product is formulated to complement swimming pool water being treated with the Rodinol® Soft-Swim System, Aqua320 and other non-halogen systems. When using other products as outlined in Directions For Use for this product, always follow Directions For Use of these products. This product is efficient and non-toxic when used as directed. This product will not evaporate and its algae fighting abilities actually increase as the pool water temperature increases. The residual effectiveness of this product tends to stabilize the total chemical treatment system. Ensure all pool equipment is working properly. Backwash the filter system following manufacturers directions. Adjust pH between 7.2-7.8, Check for metals and if present add a stain and scale inhibitor to prevent staining of pool surface due to metals. Add this product directly into pool by pouring around entire outside perimeter of pool. Allow the filter to run for at least 6 hours after adding algicide. During this period, do not allow swimmers in the water.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage and disposal.

1. PESTICIDE STORAGE: Store in original containers and take in locked storage area. Keep from freezing.

2. SPILL OR LEAK PROCEDURES: Small spills may be hosed up or flushed away with water or absorbed on some absorbent material and incinerated.

3. PESTICIDE DISPOSAL: Securely wrap original container in several layers of newspaper and discard in trash.

4. CONTAINER DISPOSAL: Do not reuse container. Triple rinse. Then dispose of in a sanitary landfill by other procedures approved by state and local authorities.
