DIRECTIONS FOR USE

ALGAECIDE 60 is used to control the growth of algae in swimming pools, exterior spas, hot tubs, decorative fountains, and ornamental ponds. For maximum effectiveness, pools, spas, whirlpools, hot tubs, decorative fountains, and ponds containing heavy growth or algae must be shoked and cleaned prior to using ALGAECIDE 60.

For pools having just visible algae growth, add an initial dose of 11 to 17 fluid ounces of ALGAECIDE 60 per 10,000 gallons of water. For treatment of freshly cleaned and filled pools add initially 6 to 11 fluid ounces of ALGAECIDE 60 per 10,000 gallons of water.

Maintenance Dosage: Subsequent additions of 2 to 4 fluid ounces of ALGAECIDE 60 per 10,000 gallons of water must be made every 5 to 7 days after initial treatment.

Spas, whirlpools, hot tubs, decorative fountains and ponds having just visible algae growth require an initial dose of 11 to 17 fluid ounces of ALGAECIDE 60 per 1,000 gallons of water. For treatment of freshly cleaned and filled pools add initially 6 to 11 fluid ounces of ALGAECIDE 60 per 1,000 gallons of water.

Maintenance Dosage: Subsequent additions of 0.2 to 0.4 fluid ounces of ALGAECIDE 60 per 1,000 gallons of water must be made every 5 to 7 days after initial treatment.

ALGAECIDE 60 is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. ALGAECIDE 60 can be used in pools and spas treated with chemicals and may reduce the amount of those chemicals normally required. However, do not mix ALGAECIDE 60 with concentrated dry or liquid chlorine products.

WINTERIZING DIRECTIONS

ALGAECIDE 60 will prevent growth of most algae during the off-season winter months when pools are not in use. For pools which have been properly treated during the swimming season and are free of visible algae, add 6 to 10 fluid ounces of ALGAECIDE 60 per 10,000 gallons of water. If the end of the swimming season pools have some visible algae growth, add 12 to 17 fluid ounces per 10,000 gallons. For maximum effectiveness, it is necessary to achieve a uniform distribution of algaecide throughout the water and the pool. If pool is not covered, it may be necessary to repeat the treatment one or more times during the season.

STORAGE AND DISPOSAL

Keep container closed when not in use. Store in a area inaccessible to children and persons unfamiliar with its use. Spilled or damaged containers must be placed in a plastic bag and discarded in the trash. Mop up spills with clear water. Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available. If not, discard in trash.
