SWIMMING POOL SANITIZER 56

TO CONTROL BACTERIA AND ALGAE IN SWIMMING POOLS

ACTIVE INGREDIENT
Sodium dichloro-s-triazinetrione dihydrate ___________ 99.0%

INERT INGREDIENTS ________________________________ 1.0%

Available Chlorine ________________________________ 100.0%

55%

KEEP OUT OF REACH OF CHILDREN

DANGER:

NET WT 25 LBS
FIRST AID

If swallowed: Call a poison control center immediately for treatment advice. Have the person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or a doctor. Do not give anything by mouth to an unconscious person.

If in eyes: Hold eyelids open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eye. Call poison control center or doctor for further treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for further treatment advice.

If inhaled: Move person to fresh air. If person is not breathing call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contaminate the use of gastric lavage.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the poison control Hot Line at 1-800-222-1222 for emergency medical treatment advice.

PRECAUTIONARY STATEMENTS - Hazard to humans and domestic animals.

DANGER: HIGHLY CORROSIVE. Causes irreversible eye damage and skin burns. Harmful if swallowed, irritating to nose and throat. Do not get in eyes, on skin or clothing. Wear protective eye wear (goggles or safety glasses). Wear protective clothing and rubber gloves when handling this product. Avoid breathing dust and fumes. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARDS: Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 464°F with liberation of harmful gases. When ignited, will burn with evolution of chlorine and equally toxic gases. Never add water to this product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible fire and explosion. Do not allow chemical to come in direct contact with the liner or painted surface of the pool as discoloration can occur. Do not pour into the pool skimmer. Do not mix with other chemicals.

IN CASE OF FIRE OR SMOKE: Call the fire department. Do not attempt to extinguish the fire with out self contained breathing apparatus (SCBA). Do not let the fire burn. Isolate the burning material, if possible to the open air or well ventilated area and flood with large quantities of water. Do not use ABC or other dry chemical extinguishers since there is the potential for a violent reaction.

IN CASE OF CONTAMINATION OR DECOMPOSITION: Do not reseal container. Follow disposal instructions on label.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR CONTROL OF BACTERIA AND ALGAE IN SWIMMING POOLS: Scatter directly over surface of pool. Each ounce of product will provide approximately 0.35 ppm of available chlorine in 10,000 gallons of water.

START-UP: In a clean pool with no visible algae, bring chlorine residual to 1 to 1.5 ppm as follows:
1. Add 3 oz. of Fresh & Clean® Sanitizer 56 for each 10,000 gallons of water.
2. Test for chlorine residual, using a suitable test kit.
3. If chlorine residual is below 1 ppm, continue to add Fresh & Clean® Sanitizer 56. Adjust pH to the ideal range of 7.2 to 7.6.

REGULAR CARE - Add 3 oz. of Fresh & Clean® Sanitizer 56 for each 10,000 gallons of water every other day, or as needed to maintain your chlorine residual from 1 to 1.5 ppm. Frequency of application will depend on the number of people swimming, water temperature and other conditions.

ADDITIONAL POOL CARE RECOMMENDATIONS - Maintain pH in the ideal range of 7.2 to 7.6. Test for pH at least once a week with a suitable test kit.

SUPERCHLORINATION - Keep your water sparkling clean by adding 12-13 oz. Fresh & Clean® Sanitizer 56 per 10,000 gallons of water, at least once every two weeks. Superchlorinate each week during excessive heat, when bathing loads are high, or when there is a "chlorine" like smell to the water. Before swimming, allow the pool to stand until the chlorine residual drops to 3 ppm. Reentry into treated swimming pools/spa is prohibited above levels of 3 ppm of chlorine. If algae appears, treat your pool with ALL CLEAR® Algae Kill following label directions.

STORAGE AND DISPOSAL:
Do not contaminate water, food, or feed by storage or disposal.
PESTICIDE STORAGE: Store in original container, tightly closed away from heat or open flame. Store in a cool, dry, well ventilated place. Keep container off wet floors.
PESTICIDE DISPOSAL: Do not put spilled product, filled or partially filled containers in the trash. Dispose of waste material according to label use directions otherwise call 1-800-CLEANUP for guidance from your local solid waste agency.
CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or mix tank. Fill the container 1/4 full with water and recap. Shake for ten seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling if available, or place in trash.
