**Panel 1 of 2**

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER**

HIGHLY CORROSIVE. Causes irreversible eye damage and skin burns. May be fatal if swallowed. Do not take internally. Irritating to nose and throat. Avoid breathing dust. Use with adequate ventilation. Do not get into eyes, on skin or clothing. Wear protective clothing, chemical resistant gloves, and protective eyewear (goggles, face shield or safety glasses). Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS**

CHEMICAL HAZARD: STRONG OXIDIZING AGENT. Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area. Flood with large volumes of water, if necessary.

**ACTIVE INGREDIENTS:**

- 1,3-Dichloro-5,6-dimethylhydantoin: 81.1%
- 1,3-Dichloro-5-ethyl-5-methylhydantoin: 16.1%
- OTHER INGREDIENTS: 2.6%
- TOTAL: 100.0%

Minimum available chlorine: 68.0%

**CONTENTS: BRICUETTES**

**EPA REGISTRATION NUMBER:** 6836-113-3876

**EPA ESTABLISHMENT NUMBER:** 6836-PA-1

**FIRST AID**

- If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.
- If swallowed: Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.
- If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

**HOT LINE NUMBER:** 1-800-722-7112

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

** NOTE TO PHYSICIAN**

Probable mucosal damage may contraindicate the use of gastric lavage.

**STORAGE AND DISPOSAL**

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL.

PESTICIDE STORAGE: Do not store in direct sunlight. Do not store at temperatures above 100°F. Do not store on side. Avoid creasing or impacting of side walls. Store in a well-ventilated area away from heat or open flame. In case of decomposition, isolate container, if possible, and flood with large amounts of water to dissolve all material before discarding.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinse is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. (Metal or plastic containers): Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incinerate or burn, if allowed by state and local authorities. If burned, stay out of smoke. (Fiber drums with liners): Completely empty liner by shaking and tapping sides and bottom to loosen clinging particles. Then dispose of liner and drum in a sanitary landfill or incinerate if allowed by state and local authorities. Do not reuse empty drum or liner.

RECIRCULATING COOLING WATER SYSTEMS AND SEWAGE SYSTEMS
This product aids in the control of bacterial, fungal & algal slimes in evaporative condensers, heat exchange water towers, influent systems such as flow through filters, industrial water scrubbing systems, brewery pasteurizers and sewage systems (septic tanks, leach fields, tank lines, sewers, lagoons and sewage effluent water). This product may be added to the systems either continuously or intermittently or as needed. The frequency of feeding and duration of the treatment will depend upon the severity of the problem. BADLY FOULED SYSTEMS must be cleaned before treatment is begun.

FOR CONTROL OF BACTERIA & FUNGI
INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably fouled, add 0.1 - 1.0 pound per 1000 gallons (or 12 - 120 ppm) of the water in the system. Repeat until control is achieved. SUBSEQUENT DOSE: When microbial control is evident, add 0.1 - 0.75 pounds per 1000 gallons (or 12 - 90 ppm) of water in the system every 3 days or as needed to maintain control.

CONTINUOUS FEED METHOD - INITIAL DOSE: When the system is noticeably fouled, add 0.1 - 1.0 pound per 1000 gallons (or 12 - 120 ppm) of water in the system. SUBSEQUENT DOSE: Continuously feed to maintain dosage of 0.1 - 0.75 pounds per 1000 gallons (or 12 - 90 ppm) of water in the system.

FOR CONTROL OF ALGAE
INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably fouled, add 0.1 - 1.0 pound per 1000 gallons (or 12 - 120 ppm) of water in the system. Repeat until control is achieved. SUBSEQUENT DOSE: When algal control is evident, add 0.1 - 0.75 pounds per 1000 gallons (or 12 - 90 ppm) daily or as needed to maintain control.

CONTINUOUS FEED METHOD - INITIAL DOSE: When the system is noticeably fouled, add 0.1 - 1.0 pound per 1000 gallons (or 12 - 120 ppm) of water in the system. Repeat until control is achieved. SUBSEQUENT DOSE: Continuously feed to maintain a dosage of 0.1 - 0.75 pounds per 1000 gallons (or 12 - 90 ppm) of water in the system.

AIR WASHERS: For use only in industrial airwasher systems that maintain effective mist eliminating components. This product controls slime forming bacteria, fungi & algae in industrial airwasher systems. Add this product at the rate of 0.1 - 1.0 pound (12 - 120 ppm) per 1000 gallons of water in the system, depending upon the severity of the contamination. Control the application by measuring the free chlorine residual in the treated water. There is no need to exceed 1.0 ppm as free chlorine. BADLY FOULED SYSTEMS must be cleaned before treatment is begun.

INTERMITTENT OR SLUG METHOD - INITIAL DOSE: When the system is noticeably fouled, add to airwasher sump or chill water sump to insure uniform mixing. Add 0.1 - 1.0 pound per 1000 gallons (or 12 - 120 ppm) of water. SUBSEQUENT DOSE: When microbial control is evident, add 0.1 - 0.6 pounds per 1000 gallons (or 12 - 72 ppm) of water.

CONTINUOUS FEED METHOD - INITIAL DOSE: When the system is noticeably fouled, add to airwasher sump or chill water sump to insure uniform mixing. Add 0.1 - 1.0 pound per 1000 gallons (or 12 - 120 ppm) of water. SUBSEQUENT DOSE: When microbial control is evident, add 0.1 - 0.6 pounds per 1000 gallons (or 12 - 72 ppm) of water.

ONCE-THROUGH INDUSTRIAL COOLING WATER SYSTEMS: When used as directed, this product effectively controls algal, bacterial & fungal slimes in open or closed-cycle, fresh or salt water, once through cooling systems. Treat cooling water with this product at the system intake or other critical areas, where mixing is uniform.

DOSAGE RATES - INITIAL DOSE: When the system is noticeably fouled, add 0.2 - 0.6 pounds per 1000 gallons of water contained in the system. Repeat initial dose until 1 - 3 ppm (mg/L) chlorine residual is established for at least 4 hours. SUBSEQUENT DOSE: When microbial control is evident, add 0.1 - 0.3 pounds to 1000 gallons of water contained in the system. Repeat as needed to maintain 1 - 3 ppm chlorine residual for at least 4 hours.
