JT EATON™

ANSWER®

KILLS MICE

With Refillable Bait Station

MAY BE HARMFUL IF EATEN BY CHILDREN OR PETS

MOISTURE RESISTANT BAIT

House Mice usually consume a lethal dose in a single night's feeding, but it may take two or more days for them to die. Due to Stop Peed Action, house mice cease feeding after consuming a toxic dose. This product is effective against anticoagulant-resistant house mice.

CONTAINS 8 BAIT BLOCKS®

THIS BAIT STATION IS RESISTANT TO WEATHER AND TO TAMPERING BY CHILDREN AND DOGS

FOR USE INDOORS AND OUTDOORS

ACTIVE INGREDIENT:
Bromophos (CAS No. 63333-35-7) 0.01%
OTHER INGREDIENTS 99.99%
TOTAL: 100.00%

KEEP OUT OF REACH OF CHILDREN

Contains: One Bait Station with 2 x .5 oz. of Bait and 6 x .5 oz. of Replacement Bait
Net Wt. 4 oz.

CAUTION
SEE SIDE/RACK PANELS FOR ADDITIONAL PRECAUTIONARY STATEMENTS

APPLICATION DIRECTIONS:
The active ingredient in this product is different from anticoagulant rodenticides. Individual house mice cease feeding after consuming a toxic dose. Bromophos is effective against all strains of house mice. Place the bait in the bait station. After several days, inspect bait station and replace with new bait until mice have been destroyed. Applicable rodent and animal activity and their movements should be discontinued. Evidence of current feeding should be removed by regular inspection and cleaning of stations. Regular and frequent inspections should be made.

APPLICATION NOTES:

INSTRUCTIONS FOR USE AND PESTICIDE STORAGE AND DISPOSAL continued on inside carton panels.
