Crabgrass Preventer with eVade® .375% Plus

ACTIVE INGREDIENT: Prodimiphos, [N,N3-di-propyl-2,4-dinitro-5-(trifluoromethyl)-2-phenylamidine] .0375%
OTHER INGREDIENTS: ....................................................... 99.625%
TOTAL: ....................................................... 100.000%

For selective preemergence control of grass and broadleaf weeds in:
- Established turf grasses (excluding golf course putting greens) and lawns
- Landscape ornamentals (including established perennials & wildflower plantings)
- Covers up to 16,390 square feet

KEEP OUT OF REACH OF CHILDREN

CAUTION

See the following section, Precautionary Statements, Hazards To Humans and Domestic Animals, for additional information.

EPA Reg. No. 34704-776
EPA EST. NO. 84156
EPA EST. NO. 82757
EPA EST. NO. 82757
EPA EST. NO. 49991

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

- Causes moderate eye injury (irritation). Harmful if inhaled or absorbed through the skin. Avoid contact with skin, eyes, or clothing. Avoid breathing dust. Wash thoroughly with soap and water for treatment.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Have a person sip a glass of water if able to swallow. Do not give anything by mouth to an unconscious person.

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If on skin or clothing: Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

If inhaled: More prone to thirst.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice.
- Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

FOR A MEDICAL EMERGENCY INVOLVING THIS PRODUCT CALL: 1-866-944-8565.

The product container or label with you when calling a poison control center or doctor, or going for treatment.

ENVIRONMENTAL HAZARDS

This product has low solubility in water. At the limits of solubility, this product is not toxic to fish. However, at concentrations above the level of water solubility, it may be toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent sites.

Waste cleanup equipment to prevent contamination elsewhere. Wash cleanup equipment to prevent contamination elsewhere. Excess quantities above normal application rates could result in damage to plants subject to spill. Water in remainder, disc under, cover with layer of soil, or leave exposed to sunlight, as deemed appropriate to the situation.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. STORAGE: Store in original container away from other fertilizers, feed, or food stuffs and separated from other pesticides.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment by shaking and tapping sides and bottom to loosen clinging particles. Offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration. Do not burn, unless allowed by state and local ordinances.

DIRECTIVES FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is a selective preemergence herbicide that provides residual control of many grass and broadleaf weeds in:
- Established turf grasses (excluding golf course putting greens) and lawns
- Landscape ornamentals
- Established perennials & wildflower plantings

This product controls susceptible weeds by inhibiting weed seed germination and root development. Most effective weed control will be obtained when this product is applied by at least 0.5 inches of rainfall or irrigation, or with shallow (1 to 2 inches) incorporation, prior to weed seed germination and within 14 days following application.

For use on plants being grown in ornamental gardens or parks, or on golf courses or lawns and grounds. Do not graze or feed livestock forage cut from areas treated with this product.

Do not apply this product through any type of irrigation system.

Do not apply alyerally.

Do not apply to golf course putting greens.

APPLICATION DIRECTIONS

Apply uniformly with suitable, calibrated application equipment.

ESTABLISHED TURF

This product is a selective preemergence herbicide that, when properly applied, will control certain grass and broadleaf weeds in established turf grasses and lawns. The maximum amount of this product that may be applied per year is given for each turf grass species in the Maximum Annual Rates section of this label. Most effective weed control in turf grasses will be obtained when this product is activated by at least 0.5 inches of rainfall or irrigation prior to weed seed germination and within 14 days following application.

DERIVED FROM: Polymer Coated Urea, Ammonium Sulfate, Muriate of Potash

*7.62% Slowly Available Nitrogen from Polymer Coated Urea

WARNING: THIS PRODUCT CONTAINS CHEMICALS KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER OR BIRTH DEFECTS OR OTHER REPRODUCTIVE HARM.

Information regarding the contents and level of metals in this product is available on the Internet at http://www.regulatory-info.lip.com

Florida Applications:
For application on turf or non-agricultural land planted exclusively for golf courses, parks and athletic fields. Minimum age 21 (Lot begins MF 1). Follow FL 104, "Recommendations for H, P, K, and S for Golf Course & Athletic Field Fertilization Based on Modified U.S. Environmental Protection Agency's (USEPA) or Florida's Golf Course's" available at http://www.dep.state.fl.us/central/Home/MeetingsTraining/FLGreen/BMP_Book_final.pdf

P.O. Box 1286, Greeley, CO 80632-1286

This product contains Duration CR, a registered trademark of Agrig, Inc.
This product is recommended for use on the turf grass species listed in the following table. Do not exceed the maximum annual rates per calendar year by species limitations.

1) These are the maximum rates per calendar year by species limitations.
2) May be used on newly sprinkled or plowed Bermudagrass at rates not to exceed 129 lb/A. Newly sprinkled or plowed Bermudagrass stooling may be temporarily retarded. Suppression only of Foliage, Grasscouch, and Reseedgrass due to reduced product rates used in sowing applications.
3) Do not apply more than 400 lbs of this product per calendar year.
4) Use higher rates of this product to achieve higher levels of fertility and longer periods of weed control for each turf type.
5) Do not exceed the maximum application rates specified in the Maximum Annual Rates Table.

Use Precautions

The following precautions apply to the use of this product in turf grasses and lawns. Application of this product may thin emerged annual bluegrass and newly overseeded grasses. Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seeding secondary roots are in the second inch of soil, not thatch plus soil.

Maximum annual use rate selection should be based on turf species. The length of time of residual weed control provided may be important in making an initial application of 175 to 267 lbs/A followed by 60 to 90 days by a subsequent application at doses that would not exceed those given in the Maximum Annual Rate Table. Do not exceed the maximum rate per year for turf grass species listed in the Maximum Annual Rate Table above.

Applications for this weed should be made in late summer, fall or winter prior to germination.

Suppression only.

Sequential applications may be made as long as the total amount of product applied does not exceed the maximum annual application rates recommended for each turf species. All applications must be made prior to germination of the weed seeds.

When to Apply After Overseeding Turf

Do not apply to overseeded turf within 60 days after seeding or until after the second mowing, whichever is longer. Injury to desirable seedlings is likely if this product is applied before seeding secondary roots are in the second inch of soil, not thatch plus soil.

When to Overseed After Application

This product will not harm most trees, shrubs, vines and flowers. Best results will be obtained when this product is uniformly applied to the soil surface, avoiding to ornamentum plants which may be defoliated in uniform distribution on the soil surface. This product may be applied over the top of all species. When plants are under stress (such as heat, drought, or frost damage) some cultivars of plants may be sensitive to this product.

Do not use on container grown plants.

Conditions of Sale and Limitation of Liability and Warranty

Do not use on food producing trees, vines, or plants.

MUST SEND WRITTEN NOTICE OF ITS CLAIM TO THE FOLLOWING ADDRESS:  LOVELAND PRODUCTS, INC., ATTN: DISTRIBUTION MANAGER.
