This fall, "Take A Vacation From Chlorination" and keep your pool water treated with just Pooltect Winter Layup. Using Pooltect throughout the non-swimming season not only controls algae and keeps pool water clear, but also allows a quicker start up in the spring. Winter Layup with Pooltect is easy, requires minimal effort, reduces pool filter time and provides very effective protection for both covered and uncovered pools from fall to spring.

**BEFORE YOU START:**
For best results, adjust pool water pH to between 7.4 and 7.8 with an alkalinity level in the range of 80 to 150 ppm. Further pH adjustment in unusual need for most pools) as long as water pH remains between 7.0 and 8.3. Remove excess leaves and debris in pool basin to prevent surface stains. For added protection, super chlorinate or shock pool as you begin to Winter Layup with Pooltect. Further pool chlorination is unnecessary.

**USING POOLTTEC FOR WINTER:**
At the end of the swimming season when water temperature has dropped below 70°F, add the correct Pooltect "Initial Dose" under "Clean" or "Visible Algae." Swimming pools with visible algae should follow summer cleanup instructions before Winter Layup. As needed, operate pool filtration system to keep surfaces clean from dirt and debris. Pooltect should undergo minimal pump circulation time as it is unaffected by evaporation, sunlight, and temperature. Winter treatment of clean pools with Pooltect usually eliminates sanitizer usage and reduces precautionary maintenance during the non-use period. It is normal for chlorine or other sanitizer levels to completely evaporate (dissipate) within several weeks after beginning Winter Layup treatment.

**SUMMER 2-STEP CARE:**

</table>

NOTE: Use Higher Weekly Dosage for Heavily Used Pools.

**DIRECTIONS FOR USE:**
It is a violation of Federal Law to use this product in a manner inconsistent with this labeling.

Pooltect provides an easier, more effective year-round treatment. Pooltect keeps water crystal clear and helps to remove and control all types of algae and bane green, blue-green, yellow and black type algae in swimming pools. Pooltect not only improves water quality, but synergizes action with all types of chlorine and bromine products, providing superior treatment results. The "SUMMER 2-STEP" maintenance program and the "WINTER 1-STEP" Layup treatment finally makes year-round pool care simple and more effective.

**BEFORE YOU START:**
The most effective use of Pooltect to keep water clear and to remove and control all types of algae growths is best achieved when pool equipment has been checked and is working properly. If needed, backwash or clean filter according to proper procedure. Adjust water pH balance to maintain a pH level of 7.2 to 7.8 in recreational water using a sanitizer. Maintain chlorine (or other sanitizer) treatement residual as recommended by product label instructions.

**USING POOLTTEC IN SUMMER:**

**MAINTENANCE:** To maintain water clear and algae free, add the proper Pooltect image under "Clean" or "Visible Algae" for your pool size. Thereafter, the addition of Pooltect "Weekly Dosage" not only makes for easier pool maintenance by keeping water clear and algae free, but usually reduces chlorine consumption and shocking frequency in residual swimming pools.

**CLEANUP:** For maximum effectiveness, pools containing heavy algae growth should be cleaned of excess debris. Add and dispense proper Pooltect dosage under "Visible Algae" directly to pool water. Use maximum Pooltect dosage for yellow or black type algae. Superchlorination or shock treatments further enhance Pooltect's removal of algae. Operate circulation pump during the algae clean-up period to ensure thorough distribution and maximum cleanup efficiency. Brush dead algae (especially yellow) from pool surfaces for more effective algae removal by filtration. Use a special wire brush and frequently scrub black algae.

**PRECAUTIONARY STATEMENTS:**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: May be harmful if swallowed. Avoid prolonged direct contact with skin, eyes and clothing.

FIRST AID: IF SWALLOWED: Call a Poison Control Center or doctor immediately. Have person sip a glass of water if able to swallow. Do not induce vomiting unless advised by poison control center or physician. Do not give anything by mouth to an unconscious person. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin with water. IF INHALED: Move person to fresh air. If person is not breathing, give CPR or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lens. If present, after the first 5 minutes, then continue rinsing eye. Call the Poison Control Center or doctor for further treatment advice. Have the product container or label with you when calling or going for treatment.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Keep out of lakes, streams, and ponds. Permits may be required for discharges containing this pesticide into lakes, ponds and public water. For guidance, contact the nearest office of the Environmental Protection Agency.

STORAGE & HANDLING: Keep container closed when not in use. Spills may be slippery. Mop up product with clean water. Do not blend directly with other pool chemicals.

DISPOSAL: Do not reuse empty container. Triple rinse container and dispense in brush.

For information on this product (including health concerns, medical emergencies, or pesticide incidents), call the National Poison Network 1-800-888-1111.

CONCENTRATE FOR ALL TYPES OF SWIMMING POOLS

The Easiest Year-Round Pool Treatment

Unique Synergy Keeps Water Algae-Free And Crystal-Clear

★ SUMMER... Easier 2-Step Treatment With Less Chlorine
Improves Water Quality and Swimmer Comfort

★ WINTER... Easier 1-Step Treatment Without Chlorine
Protects Uncovered, Mesh and Covered Pools

KEEP OUT OF REACH OF CHILDREN
CAUTION: See Side Panel For Additional Precautionary Statements

ACTIVE INGREDIENTS:
Poly (oxygenylethylene dimethylamino-ethylenedichloride), 30%

INERT INGREDIENTS: 70%

This product contains 2.67 lb. of active ingredients and weighs 8.9 lb. per gallon.

64 FL. OZ. (2 QTS.) 1.89 LITERS
