SulfOMEX™ fungicide

For the control of powdery mildew on apples, grapes, stone fruits, strawberries, vegetables and other crops including ornamentals

KEEP OUT OF REACH OF CHILDREN

CAUTION / PRECAUCIÓN

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand this label, find someone to explain it to you in detail.)

READ ENTIRE CONTAINER LABEL BEFORE USING THIS PRODUCT

ACTIVE INGREDIENTS:

* Mono Potassium Phosphate ............................................... 31.1%
** Sulfur ............................................................................ 31.1%

INERT INGREDIENTS: .............................................................. 37.8%

TOTAL 100.00%

* Contains 4.1 lbs mono potassium phosphate per gallon
** Contains 4.1 lbs sulfur per gallon

First Aid

If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

For Emergency Medical Response and Hazard Communications Only, Call the National Poison Control Center at (800) 222-1222.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

See attached booklet for additional Precautionary Statements and Directions for Use.

EPA REG. NO. 86868-2

Manufactured by: Omex Agrifluids, Inc.

<th>TIMING OF APPLICATIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Apples</td>
<td>3-6 pts</td>
<td>Start spraying at light cluster and continue spraying every 7 to 10 days until terminal shoots cease their vegetative growth. The rate of product per acre will vary depending upon the tree size (canopy development) and variety of apple. Use on sulfur tolerant varieties only. Macintosh, Golden Delicious, Jonathan and certain other varieties may be injured by sulfur under certain climatic conditions.</td>
</tr>
<tr>
<td>Stone Fruits (Cherries, Nectarines, Peaches and Plums)</td>
<td>3-6 pts</td>
<td>Follow local recommendations for powdery mildew control, or apply when disease first appears and repeat every 7 to 10 days.</td>
</tr>
<tr>
<td>Grapes</td>
<td>3-6 pts</td>
<td>Start spraying in the spring when shoots are 1-2 inches in length and when disease pressure is anticipated. Repeat every 10 to 14 days. For improved appearance on table grapes, use lower application rates.</td>
</tr>
</tbody>
</table>
**CAUTION**

Causesc moderate eye irritation. Avoid contact with eyes, skin or clothing. Wear safety glasses or goggles when handling undiluted product. Once product is diluted, eye protection is no longer required. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

**GENERAL INSTRUCTIONS**

**General:** SulfOMEX™ is a foliar applied fungicide for control of powdery mildew. It is designed for foliar application and may be applied alone or in tank mixes containing pesticides. However, when used in a tank mix, a compatibility test is always recommended. SulfOMEX™ can be applied by ground or air. Foliage must be thoroughly covered with spray. Dense leaf canopies can prevent adequate spray coverage. To facilitate necessary coverage a super spreading agent such as First Choice® Hi-Wet and/or First Choice® Brazeau is suggested. Powdered mildew control is best when applications of SulfOMEX™ are made within three days of a conidia spore release.

**Mixing Directions:** Fill the tank approximately 1/2 full with water before adding SulfOMEX™. Agitate thoroughly while adding remaining water. Do not allow mixture to stand. Failure to maintain agitation will cause SulfOMEX™ to settle and may necessitate manual stirring to redisperse. When used in combination with pesticides, add pesticides to the tank last. Sulfur in any form is a corrosive material. To reduce the effect, equipment should be flushed daily.

**Application Information:** Apply the specified rate of SulfOMEX™ listed in the table when directed.

When disease pressure is low, use a lower rate of Sulfomex™ early in the season. The per acre rate must be increased as disease pressure increases.

1. **Application Water Volume:** Orchard - apply in no less than 10 gallons of water per acre; All other applications - Apply in 5 to 20 gallons of water per acre.

2. **Ground Application (Concentrated Water Volume):** Orchard - apply in 20 to 100 gallons of water per acre. All other applications - Apply no less than 5 gallons of water per acre.

**USE RATES (FOLIAR APPLICATION)**

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters. Do not apply when weather conditions may cause drift. Do not apply when weather conditions favor drift from the treated areas. Do not apply where runoff is likely to occur. Do not use in a manner or at a time other than in accordance with label directions because animal, plant or crop injury, or other undesirable results may occur.

**DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or tribe, consult the agency responsible for pesticide regulation.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 190. The Statement of compatibility of pesticides with the products, forms, foods, nurseries, and gardens, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to products that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

PPE required for the early entry to treated areas that is permitte under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

1. Coveralls.
2. Chemical-resistant gloves made of any waterproof material.
3. Shoes plus socks.
4. Protective eyewear.
5. Chemical-resistant headgear for overhead exposure.

Remove PPE immediately after handling this product. Wash the outside of the gloves before storing them. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.
**SulfOMEX™ fungicide**

For the control of powdery mildew on apples, grape fruits, strawberries, vegetables and other crops including ornamentals

**KEEP OUT OF REACH OF CHILDREN CAUTION / PRECAUTION**

**If usted no entiende la etiqueta, busque a alguien para que le explique a usted en detail. (If you do not understand this label, find someone to explain it to you in detail.)**

**READ ENTIRE CONTAINER LABEL BEFORE USING THIS PRODUCT**

**ACTIVE INGREDIENTS:**

- Mono Potassium Phosphate ........................................ 31.1%
- Sulfur ........................................................................... 31.1%

**INERT INGREDIENTS:** 27.8%

**TOTAL 100.0%**

* Contains 4.1 lbs mono potassium phosphate per gallon
* Contains 4.1 lbs sulfur per gallon

---

**First Aid**

If ingested: Move person to fresh air. If person is not breathing, call 9-1-1 or an ambulance, then give artificial respiration, enough mouth to mouth assistance. Call poison control center or doctor for further treatment advice.

If on skin or clothing: Take off contaminated clothing. Skin wash immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If swallowed:

CAUTION

1. The operator of the property and the applicator must establish a buffer zone of enough distance to prevent drift off onto non-target areas and adjoining property.
2. Do not use on plants that are sensitive to sulfur.
3. Do not use on the surrounding areas and fields until the buffer zone is clear of sulfur residue.

**PRECAUTIONARY STATEMENTS**

**Hazards to Humans and Domestic Animals**

**CAUTION**

Causess moderate eye irritation. Avoid contact with eyes, skin or clothing. Wear safety glasses or goggles when handling undiluted product. Once product is diluted, eye protection is no longer required. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

Applicators and other handlers must wear:

1. Coveralls
2. Shoes plus socks
3. Protective eyewear
4. Chemical-resistant headgear for overhead exposure

Follow manufacturer’s instructions for cleaning / maintaining PPE. If no such instructions for washables, preferable mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 195. The Statement of application of product and the forms, labels, nurseries, and growers, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to users of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

If PPE required for the early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- 1. Conenirs
- 2. Chemical-resistant gloves made of any waterproof material
- 3. Sh Text plus socks
- 4. Protective eyewear
- 5. Chemical-resistant headgear for overhead exposures

**GENERAL INSTRUCTIONS**

**General:** SulfOMEX™ is a foliar applied fungicide for the control of powdery mildew. It is designed for foliar application and may be applied alone or in tank mixes containing pesticides. However, when use of an unformalized mix is made, a compatibility test is always recommended. SulfOMEX™ can be applied by ground or air. Foliage must be thoroughly covered with spray. Dense leaf canopies can prevent adequate spray coverage. To facilitate necessary coverage a super spreading agent such as First Choice Hi-App or First Choice Breakthrough® is recommended. Powdery mildew control best when applications of SulfOMEX™ are made within three days of a conidia spore release.

**Mixing Directions:** Fill the tank approximately 1/2 full with water before adding SulfOMEX™. Allow agitation thoroughly while adding remaining water. Do not allow more than 1 minute to pass. Failure to maintain agitation will cause SulfOMEX™ to settle and may necessitate manual stirring to redisperse. When used in combination with pesticides, add pesticides to the tank last. Sulfur in any form is a corrosive material. To reduce the effect, equipment should be flushed daily.

**Application Information:** Apply the specific rate of SulfOMEX™ listed in the table when directed. When disease pressure is low, use lower per acre rates early in the season. The per acre rate must be increased as disease pressure increases.

<table>
<thead>
<tr>
<th>CROP</th>
<th>RATE/ACRE</th>
<th>TIMING OF APPLICATIONS</th>
</tr>
</thead>
</table>
| Stone Fruits (Cherries, Nectarines, Peaches and Plums) | 3-6 pts | Follow local recommendations for powdery mildew control timings, or apply when disease first appears and repeat every 7 to 10 days. |}

3. Ground Application (Dilute Water Volume - Ornaments) - apply in 100 to 800 gallons of water per acre. All other applications - Apply in 20 to 60 gallons of water per acre.

**Compatibility:** SulfOMEX™ is compatible with most pesticides and can be applied in existing spray programs. When a chemical mixture that has not been used before, always test a small sample rate before application, or check compatibility by doing a test strip. Due to its acidic nature, adding SulfOMEX™ to the spray solution can lower the pH of the finished spray solution. Adhere to pesticide manufacturer’s recommendations regarding appropriate pH range.

**Use Precautions:**

1. Some plants are susceptible to injury from sulfur under certain climatic conditions. The user is advised not to use sulfur on any crop unless local use has proven that sulfur is safe in that locality. During periods of high temperature, sulfur may burn foliage and fruit. Do not make applications of this product at excessively high temperatures (90°F or higher).
2. Do not use SulfOMEX™ with oil or within 14 days of an oil application.
3. Do not include SulfOMEX™ with copper sprays.
4. Do not mix with any spray materials that work against low pH (-6.5) applications.
5. SulfOMEX™ is a contact fungicide. The use of a spreading agent will aid in the distribution of product. Do not use in any growing area where runoff is likely to occur.
6. Do not use SulfOMEX™ when weather conditions favor drift from the areas treated.
7. Do not apply SulfOMEX™ to plants under severe stress conditions such as heat or water stress or pest pressures. Do not apply when temperatures exceed 90°F.
8. Use caution when applying SulfOMEX™ in combinations with pesticides and adjuvants during the fruiting stage.
9. Use minimal effective rates of adjuvants during ripening. Organosilicone or high analysis non-ionic surfactants are not recommended during the ripening process.
10. Maximum product effectiveness occurs several days after application. Do not apply this product through any type of irrigation system.
11. Do not mix with any preharvest or postharvest sprays with a high concentration of tank mix. Follow the most restrictive precautions and Directions for Use of any tank mix partner.

In addition to the above ‘Use Precautions’, the following conditions must be followed:

1. The operator of the property and the applicator must establish a buffer zone of enough distance to prevent drift off onto non-target areas and adjoining property.
2. The operator of the property and the applicator must evaluate the method and equipment for each site to ensure proper and safe use.

3. Do not make applications of this product at excessively high temperatures (90°F or higher).
4. Do not make applications of this product when there is a minimum air movement of 2 miles per hour for at least 1 mile.
5. Do not make applications of this product at excessively high temperatures (90°F or higher).
6. Do not use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift.
7. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
8. If in eyes:
9. If swallowed:
10. Do not apply this product to plants under severe stress conditions such as heat or water stress or pest pressures. Do not apply when temperatures exceed 90°F.
11. Do not make applications of this product at excessively high temperatures (90°F or higher).
12. Do not apply this product through any type of irrigation system.
13. Do not mix with any preharvest or postharvest sprays with a high concentration of tank mix. Follow the most restrictive precautions and Directions for Use of any tank mix partner.

Additional information and precautions may be found on the EPA-registered label.

</tr>
</tbody>
</table>

1. Use low rates per acre when disease pressure is low and high use rates when disease pressure increases.

2. Pesticide application rates are for standard spray volumes per acre. For higher volume sprays, adjust the concentration of pesticide in the spray mix to achieve the specified application rate per acre.

### STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in cool dry area under lock and key. Post as a pesticide storage area. Always store pesticides in the original container. Store away from food, pet food, feed, seed, fertilizers and veterinary supplies. Avoid extreme variations in temperature. A reversible separation of ingredients may occur after prolonged storage. This separation has no effect on quality or effectiveness of product and agitation will resuspend mixture.

Pesticide Disposal: To avoid wastes, use all material in this container by application, according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

Container Handling:

Nonrefillable Container (five gallons or less): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Nonrefillable Container (greater than five gallons): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures.Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.

### WARRANTY STATEMENT

Omex Agrifluids, Inc. warrants that this product conforms to the chemical description on the label thereon and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risks inherent with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of Omex Agrifluids, Inc. To the extent consistent with applicable law, Omex Agrifluids, Inc. shall not be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the Buyer. To the extent consistent with applicable law, the exclusive remedy of any buyer or user of this product for any and all losses, injuries, or damages resulting from or in any way arising from the use, handling, or application of this product, whether in contract, warranty, tort, negligence, strict liability, or otherwise, shall not exceed the purchase price paid for this product or at Omex Agrifluids, Inc. election, the replacement of this product. Omex Agrifluids, Inc. MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

</thead>
<tbody>
<tr>
<td>Ornamentals (including woody and herbaceous ornamentals)</td>
<td>3-6 pts</td>
<td>Start spraying when conditions become favorable for disease development, or when disease is first observed and continue spraying on a 7 to 14 day schedule for the entire season.</td>
</tr>
</tbody>
</table>

1. Use low rates per acre when disease pressure is low and high use rates when disease pressure increases.
2. Pesticide application rates are for standard spray volumes per acre. For higher volume sprays, adjust the concentration of pesticide in the spray mix to achieve the specified application rate per acre.

### OTHER CROPS

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in cool dry area under lock and key. Post as a pesticide storage area. Always store pesticides in the original container. Store away from food, pet food, feed, seed, fertilizers and veterinary supplies. Avoid extreme variations in temperature. A reversible separation of ingredients may occur after prolonged storage. This separation has no effect on quality or effectiveness of product and agitation will resuspend mixture.

Pesticide Disposal: To avoid wastes, use all material in this container by application, according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

Container Handling: Nonrefillable Container (five gallons or less): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

Nonrefillable Container (greater than five gallons): Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times.
