ecoFOG®-170 DPA is recommended for reducing scald damage to apples while in storage. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Application Restrictions
Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Do not protect treated apples in any manner that prevents removal of the pesticide residue prior to harvest. Do not use this product in a manner inconsistent with its labeling.

Preparation for Fogging
• Treat only dry fruit as received from the field.
• Apply to fruit within 15 days after harvesting, prior to placing in storage.
• In case of prolonged storage (more than 4 months) or particularly high danger of scald due to climatological conditions, a second treatment is advisable between the second and third months of storage. This second treatment must be applied at a rate of between 50% and 100% of the initial dosage, depending on the importance of the danger and the length of further storage. A second treatment of 100% of the dose is recommended for any additional storage of 3 months or longer.
• Before treatment, protect fruit in bins at the top of each stack with plastic liners, cardboard or Kraft paper sheets. Also protect fruit directly in front of the fogging equipment by covering windows and doors to maintain a dosage value of 2% of the total volume of the real tonnage of the fruit.

Braeburn, Cortland, Fugi, Idared, McIntosh 2.3 fl oz (65 mL)
Red Delicious, Granny Smith 1.7 fl oz (47 mL)
Empire, Jonagold, Rome Beauty, Royal Gala, Stayman, Winesap 1.3 fl oz (38 mL)
Golden Delicious 0.7 - 0.9 fl oz (20 - 26 mL)

Electrofog Operation
Please electrofog the machine horizontally outside the treatment room at a height of 3 to 5 feet above the floor. Cover the door or entrance to the treatment room with a plastic sheet and insert the fogging pipe through a hole in the plastic. Place a bucket under the nozzle to catch any drops. Seal the opening around the nozzle. For temperatures below 60°F, insert pipe into product container and start pump. Stop pump when product reaches the pump body. Start fan and resistance, and start pump again when fog exit temperature reaches the outlet fan's trigger temperature temperature. Fan resistance is necessary during operation to maintain 18°C.

Application Procedures
• Turn off room cooling systems and humidifiers 12 hours prior to and during application.
• Turn off room circulation fans immediately prior to and during treatment.
• Allow the fog to stay overnight or until the fog has totally disappeared (about 5 hours post-treatment) before restacking fans and cooling systems.
• DO NOT rinse after treatment.
• DO NOT apply to fruit treated with Diphenylamine prior to harvest.
• DO NOT use treated apples for pomace or livestock feed as illegal residues may occur in meat or milk.
• DO NOT wrap apples in Diphenylamine-treated paper.

Physical or Chemical Hazard
Combustible. Do not mix with sawdust or near heat or open flame. Do not store near or use with ignition agents.

DIRECTIONS FOR USE
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

STORAGE & DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Washes resulting from the use of this product may be disposed of in an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Discard container in a suitable approved disposal area.

Do not contaminate water, food, or feed by storage or disposal.

Store ruggedly, out of reach of children.

Additional Storage Instructions
Store ruggedly, out of reach of children.

This pesticide is toxic to birds and aquatic invertebrates. Do not contaminate water by cleaning of equipment or disposing of wastewater or residue. Do not discharge effluent from this product into lakes, streams, ponds, estuaries, or other waters unless in accordance with the requirements of a National Pesticide Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewersystems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD
Combustible. Do not mix with sawdust or near heat or open flame. Do not store near or use with ignition agents.
