Active Ingredients:

*Bacillus thuringiensis* Cry1F protein and the genetic material (PHP27118 T-DNA) necessary for its production in corn event DP-ØØ4114-3 ............................................................ ≤0.0015%*

*Bacillus thuringiensis* Cry34Ab1 protein and the genetic material (PHP27118 T-DNA) necessary for its production in corn event DP-ØØ4114-3 ............................................................ ≤0.0064%*

*Bacillus thuringiensis* Cry35Ab1 protein and the genetic material (PHP27118 T-DNA) necessary for its production in corn event DP-ØØ4114-3 ............................................................ ≤0.0100%*

Other Ingredients:

Phosphinothricin acetyltransferase (PAT) protein and the genetic material (PHP27118 T-DNA) necessary for its production in corn events DP-ØØ4114-3 .......................................................... ≤0.0011%*

* Percentage (wt/wt) on a dry wt. basis for whole plant

KEEP OUT OF REACH OF CHILDREN

CAUTION

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This plant-incorporated protectant (PIP) may be combined through conventional breeding with other registered plant-incorporated protectants that are similarly approved for use in combination, through conventional breeding, with other registered plant-incorporated protectants to produce inbred corn lines and hybrid corn varieties with combined pesticidal traits.

4114 maize may be used for breeding purposes, agronomic testing, increasing inbred seed and producing hybrid seed corn up to a total of 20,000 acres per county and up to a combined United States (U.S.) total of 250,000 acres per plant-incorporated protectant active ingredient per registrant per year. Harvested seed are not allowed for sale as commercial seed in the U.S. under the conditions of this registration, but any non-treated seed (i.e., seed without a seed treatment applied) containing 4114 may be sold commercially as grain.
