FEEDS FOR A FAST GREEN-UP AFTER WINTER
TIPS FOR LAWN CARE SUCCESS

Feed Regularly
Regular feedings provide the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought and family activity.

1 ANNUAL FEEDING 2-3 ANNUAL FEEDINGS 4 ANNUAL FEEDINGS

Benefits of Multiple Feedings

Mow and Leave the Grass Clippings on Your Lawn
Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively. Grass clippings recycle the plant nutrients back into the soil.

Conserve Water
Well-cared-for lawns are more efficient at using available water. Feeding with Scotts® lawn food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat, drought and other stresses. Remember your lawn will begin to use water as needed, as much as possible to take advantage of nature’s supply and rely on the rain to water your lawn.

Scotts® & Your Environment
We care. Scotts® products are designed with care to grow a thicker, greener lawn.

Níquel para hierbas y malezas anuales: Halts Crabgrass Preventer and Lawn Food B
PACIENCIAS: Este producto no es nocivo para los animales domésticos. El producto está libre de sustancias nocivas para los animales domésticos. Los animales domésticos pueden masticar el producto de forma segura.

PRECAUCIONES: Este producto no es nocivo para los animales domésticos. Los animales domésticos pueden masticar el producto de forma segura.

SCOTTS® RECOMMENDED FEEDING ROUTINE
EARLY SPRING
An early spring feeding helps grass grow strong for the season. You should feed around the first time you mow your grass.

LATE SPRING
Feeding now prepares grass for stress during the summer by thickening the blades on top and building deep roots below.

EARLY FALL
An early fall feeding replenishes the nutrients lost in the harsh summer months for quicker recovery. You should feed when your grass comes out of dormancy.

LATE FALL
Late fall is the best feeding time because it builds strong deep roots and promotes grass growth for winter. You should feed when all the leaves have fallen.

Florida Annual Fertilizer Applications:
On centipede lawns, do not exceed rate of 8 lbs. of Nitrogen per 1,000 sq. ft. in the north and 2 lbs. of Nitrogen per 1,000 sq. ft. in the central and south. On Bahia lawns, do not exceed rate of 8 lbs. of Nitrogen per 1,000 sq. ft. in the north.

FIRST AID
If IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes. Do not rub eye.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF SWALLOWED: Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow.

Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably with mouth-to-mouth, if possible.

Call a poison control center or doctor for advice. This product has no label or container with you or contact your pharmacist.

CAUTION: Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing.

USER SAFETY RECOMMENDATIONS:
Do not eat, drink, or chew gum while feeding. Wash hands and equipment after using this product.
