5) Rinse all surfaces thoroughly with a potable water rinse.

4) Drain transfer lines and tanks.

1) Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, precleaning. After cleaning and sanitizing equipment, spread Sterilex Ultra Powder evenly to the floor and drain surface, at a rate of 0.42 lb per gallon, applying Sterilex Ultra Powder powder for treatment. Use Sterilex Ultra Powder at a concentration of 1500 mg/L. Sterilex Ultra Powder may be used to disinfect and sanitize food processing plants, kitchen areas and household surfaces.

SANITIZING DIRECTIONS FOR NON-FOOD CONTACT SURFACES

PREPARATION OF NON-FOOD CONTACT SANITIZER USE SOLUTION:

1) Add 0.42 lb. of Sterilex Ultra Powder to 1 gallon tap water (50 g of Sterilex Ultra Powder to 1 liter tap water) in an appropriate plastic container and stir. This solution can be used to treat areas, floors, countertops, utensils, equipment, tables, chairs, benches, benches, and areas with hard nonporous material.

3) Allow surfaces to remain wet for at least 10 minutes.

3) Allow surfaces to remain wet for at least 5 minutes prior to entering area. Foamed entranceways must be washed and the foam allowed to air dry. Use product within 24 hours after powder has been dissolved in water.

DO NOT BREATHE SPRAY. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 5 minutes. Rinse or clean surfaces thoroughly with a damp cloth or brush, if necessary.

Avoid breathing vapor. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water if contact occurs.

FIRST AID

If inhaled, remove individual to fresh air immediately. If coughing, dyspnea, or other respiratory symptoms occur, call a physician immediately. If irritation occurs, seek medical attention. If swallowed, immediately rinse mouth and wash thoroughly with plenty of water. If contact occurs, wash the affected area with soap and water. If irritation persists, seek medical attention. Sterilex Ultra Powder is a hospital-use disinfectant at 0.42 lb per gallon (50 grams per liter), Bactericidal according to EPA Reg. No. 63761-5, EPA Est. No. 67441-IL-001.

4) Rinse all surfaces thoroughly with a potable water rinse.

4) Drain transfer lines and tanks.

1) Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, precleaning.
DIRECTIONS FOR USE

1) Add 0.42 lb. of Sterilex® Ultra Powder to 1 gal. tap water (50 g of Sterilex Ultra Powder per gallon of water) using coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping. The use-solution can be used to disinfect hatchers, setters, trays, racks, carts, equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing equipment through the system or mopping. Clean all areas of vehicles, including mats, crates, cabs and wheels.

2) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or mopping. Sterilex® Ultra Powder has been evaluated at a concentration that supports a dilution of 0.93 ounces /gallon [7 grams/liter] (or equivalent use dilution). Mix 0.93 ounces Sterilex Ultra Powder per gallon of water (7 grams/liter) (or equivalent use dilution). Gently mix for uniform solution. Apply solution to hard, non-porous (environmental) surfaces of the (Personal Protective Equipment) as directed.

3) Application of Sterilex® Ultra Powder to the hard, non-porous surfaces is ideal. Sterilex® Ultra Powder has been shown to be effective when applied in a coarse spray pattern.
1) Add 0.42 lb. of soap or detergent, and rinse with potable water before reuse.

6) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a to 1 liter tap water) in an appropriate plastic container and stirring.

7) Allow surfaces to remain wet for at least 10 minutes and fixtures occupied or traversed by animals.

Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 5 minutes. Rinse or allow to air dry. Use product within 24 hours after powder has been dissolved in water.

PREPARATION OF NON-FOOD CONTACT SANITIZER USE SOLUTION:

Mix 0.93 ounces Sterilex Ultra Powder per gallon of water (7 grams/liter) (or equivalent use dilution). Gently mix for coarse trigger sprayer, sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or ceramic, sealed stone, hard fiberglass, plastic (such as polystyrene, polypropylene), glazed porcelain tiling, stainless steel fixtures, copper, brass, galvanized steel, cement, tile, stone, wood, porcelain, ceramic, glass, foam, rubber, lacquer, plastic, porcelain enamel, stainless steel, chrome, carbon steel, painted or galvanized metal, metal, aluminum, fiberglass, porcelain, and many more coated or coated surfaces.

Sterilex Ultra Powder does not become active until it comes in contact with moisture on the floor.

To prevent cross contamination into animal areas and the packaging and storage areas of food plants, dip entire doorway path must be covered with the spray, foam or footbath. Ensure a continuous wet blanket of solution on all surfaces for at least 10 minutes.

Do not let sanitizing solution come into contact with exposed skin.

POLLUTED WATER DIRECTIONS:

Use 20 oz. of Sterilex Ultra Powder per milk container (0.45 pt. milk) or equivalent use dilution. Use with enough freshly made sanitizing solution to cover the gloves. Do not let sanitizing solution come into contact with exposed skin.

CLEANING AND CONTROL

Do and animal parts of conditioning an refrigeration equipment and heat pumps, refrigeration freezing food components, boiling the milk. Add an atomizer. Add lighter gas for dry air, vacuum systems, heat pumps, to prevent cross-contamination.

For surface protection, replace after the flow begins to drip. Repeat this procedure two more times. Dispose of rinsate as pesticide waste. Do not swallow. Do not induce vomiting unless told to do so by a poison control center or doctor.

Shoe Foam Directions:

Add a solution of 0.93 ounces Sterilex Ultra Powder per gallon of water [7 grams/liter] (or equivalent use dilution) to one-Step Disinfectant – Cleaner.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial breathing. If breathing continues, call a poison control center or doctor for treatment advice.

IF IN EYES: Do not rub eyes. Wash out with plenty of water. If irritation persists, call a poison control center or doctor for treatment advice.

If on skin, wash with plenty of soap and water. If irritation persists, call a poison control center or doctor for treatment advice.
APPLICATION INSTRUCTIONS FOR TRANSFER LINES:

Mix 0.93 ounces Sterilex Ultra Powder per gallon of water (7 grams/liter) (or equivalent use dilution). Gently mix for at least 2 minutes. Use within 24 hours after powder has been dissolved in water.

PREPARATION OF NON-FOOD CONTACT SANITIZER USE SOLUTION:

Add a solution of 0.93 ounces Sterilex Ultra Powder per gallon of water [7 grams/liter] (or equivalent use dilution) to 1 liter tap water. Use the solution within 24 hours after powder has been dissolved in water.

PESTICIDE STORAGE:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions. If not triple rinsed these containers are acute hazardous wastes and must be disposed in accordance with Federal, State, and local regulations. Any contaminated material must be disposed of according to Federal, State, and local regulations. Where State or local regulations require, dispose of in an approved landfill.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment information.

RINSE INSTRUCTIONS:

Rinse all treated feed racks, mangers, troughs, automatic feeders, fountains, and waterers with a potable water rinse. Use within 24 hours after powder has been dissolved in water.

SANITIZING OF INANIMATE SURFACES:

Spray or wipe with a presoaked cloth, mop, sponge, sprayer, foaming or by immersion. For sprayer applications, use a coarse pump or trigger sprayer. Avoid spraying near food processing equipment; do not use sprayer near: inanimate surfaces, contaminated areas, or equipment where water enters or exists. Sanitize hard, non-porous surfaces. Apply sanitizer use solution to pre-cleaned, hard, non-porous surfaces with a clean cloth, mop, sponge, sprayer, foaming or by immersion. Use within 24 hours after powder has been dissolved in water.
DIRECTIONS FOR USE:

1) Prepare a precleaning solution by adding 0.01 - 0.21 lb. of Sterilex Ultra Powder to 1 gal. tap water (50 g of Sterilex Ultra Powder to 1 liter tap water) in an appropriate plastic container and stirring.

2) Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities.

3) Thoroughly wet surfaces with use-solution by pouring, wiping, brushing, scrubbing, foaming, spraying with a coarse trigger sprayer, pre-scrape and, if necessary, presoak. Mix 0.42 lbs Sterilex Ultra Powder per gallon of water (50 grams/liter).

4) Do not use on animals. Do not use on milking equipment, food processing or handling equipment, or water bottles or water coolers, except as specified in MULTIPURPOSE
diseases, or other serious or life-threatening conditions. A doctor should be notified immediately if a healthcare provider is considered necessary. Avoid breathing vapor. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water before eating, drinking, or using tobacco. Do not store about 30  

5) Rinse all surfaces thoroughly with a potable water rinse.

6) Do not use on detectable levels of viable Salmonella enterica, norovirus, 

7) Allow surfaces to remain wet for at least 10 minutes. Treated surfaces must remain wet for 5 minutes. Rinse or sponging, using a clean in place (CIP) system, pumping it through the system, drawing it through the system or

STERILEX ULTRA POWDER
SOPHOUS SANITIZER TECHNIQUE

APPLICATION INSTRUCTIONS FOR Transfer LINES:

1) Remove gross food particles and soil from all articles using a pre-flush, or pre-scrape and, if necessary, a potter brush. Treated surfaces must remain wet for five (5) minutes.

2) Introduce use solution into transfer lines and tanks.

3) Soak or circulate use solution for at least 10 minutes.

4) Drain transfer lines.

5) Rinse all surfaces thoroughly with a potable water rinse.

APPLICATION INSTRUCTIONS FOR SURFACES:

Treat hard, non-porous surfaces in the process environment with the Sterilex Ultra Powder use solution. The solution is effective at the rate of 3.7 oz. (105 grams) per 100 square feet of floor surface having 1.3 fl. oz. – 5.1 fl. oz. [38 ml – 150 ml] of solution.

a) Pour: Allow to air dry. Use product within 24 hours after powder has been dissolved in water.

b) Soak: Use solution should remain in contact with the treated surfaces for at least 10 minutes. Drain thoroughly and rinse.

c) Immersion: Thoroughly wet all surfaces to be sanitized. Treated surfaces must remain wet for five (5) minutes. Drain thoroughly and rinse.

The Sterilex Ultra Powder solution is proven to be effective against the following organisms:

Escherichia coli (ATCC 11229) Listeria monocytogenes (ATCC 49594)

Application of Sterilex Ultra Powder as a Floor Sanitizer:

DISINFECTION OF HARD NON-POROUS SURFACES

a) Pour: Allow to air dry. Use product within 24 hours after powder has been dissolved in water.

b) Soak: Use solution should remain in contact with the treated surfaces for at least 10 minutes. Drain thoroughly and rinse.

c) Immersion: Thoroughly wet all surfaces to be sanitized. Treated surfaces must remain wet for five (5) minutes. Drain thoroughly and rinse.

The Sterilex Ultra Powder solution is proven to be effective against the following organisms:

Escherichia coli (ATCC 11229) Listeria monocytogenes (ATCC 49594)

PRECAUTIONARY STATEMENTS

PREVENT CONTACT WITH THE EYES, SKIN, CLOTHING, AND SHOES. If contact occurs, wash exposed areas with soap and water. If eye irritation occurs or persists, call a doctor. If skin irritation occurs or persists, call a doctor. Do not use an emesis basin or induce vomiting unless told to do so by a doctor or poison control center.

FIRST AID IN CASE OF ACUTE TOXICITY

Inhalation: Remove to fresh air. Call a doctor for treatment advice.

Eye Contact: Rinse with large amounts of water if able to swallow. Do not induce vomiting unless told to do so by a doctor or poison control center.

Skin Contact: Wash with soap and water. Do not rub eye. Do not apply heat. Do not use emesis basin or induce vomiting unless told to do so by a doctor or poison control center.

Ingestion: Do not induce vomiting unless told to do so by a doctor or poison control center. Rinse mouth with water if able to swallow. Do not give anything by mouth to an unconscious person.

Other Information:

Sterilex Ultra Powder has not been tested for use as a food additive. It has been approved for use as a pesticide by the U.S. Environmental Protection Agency (EPA) under Pesticide Registration Number 45229-1. Contact the nearest EPA Regional Office for guidance.

Keep out of reach of children.

Do not breathe spray. Rub with brush, cloth, or sponge. Treated surfaces must remain wet for 5 minutes. Rinse or allow to air dry. Use product within 24 hours after powder has been dissolved in water.

For heavily soiled areas, a preliminary cleaning is required. Mix 0.93 ounces Sterilex Ultra Powder per gallon of water.

Do not use in the presence of foods, beverages, or other substances likely to contaminate food. Do not allow solution to come in contact with food-related equipment, fountains, and waterers, forks, shovels, scrapers, barns, pens, stalls, facilities and fixtures occupied and traversed by animals.

Keep the product out of reach of children. If swallowed, call a doctor for treatment advice.
