STORAGE AND DISPOSAL

TURFCIDE 10G is a soil-applied fungicide for protection against a variety of soil borne fungal diseases. For Turfcide 10G to be effective, the treated area will not be used as a soil surface for at least 14 days after treatment. It is recommended that the treated area be irrigated 1/4 inch water before it is used as a soil surface. See the Use and Rate Requirements for Non-Residential Ornamentals, Table 4, for specific plant and disease treatments. See the Use and Rate Requirements for Non-Residential Ornamentals Table for specific plant and disease treatments.
