DENSIL C40 Antimicrobial

ACTIVE INGREDIENT:
Chlorothalonil (tetrachloroisothiocyanate) ........... 40.4%
Other Ingredients ........................................ 59.6%
Total .................................................. 100.0%

Contains 4.17 pounds of chlorothalonil per gallon.

KEEP OUT OF REACH OF CHILDREN

SEE SIDE PANEL FOR OTHER PRECAUTIONARY STATEMENTS

MANUFACTURED FOR:
ARCH WOOD PROTECTION
360 Interstate North Parkway, Suite 450
Atlanta, GA 30339

Densil® is a registered trademark of Arch UK Biocides Limited

EPA Reg. No. 62190-36

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed with storage or disposal or cleaning of equipment. PESTICIDE STORAGE: Store in a cool place. Protect from excessive heat. PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not refill or reuse this container. Type rinse as follows: Fill the container 1/4 full with water. Tap container on its side and roll it back and forth, ensuring at least one complete excitation, for 30 seconds. Stand the container on its end and tip it back and forth several times. Follow Pesticide Disposal instructions for rinse disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning. If not available, puncture and dispose in a sanitary landfill.

FIRST AID:
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth, if possible. Call a Poison Control Center or doctor for further treatment advice. If in Eyes: Hold eye open and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a Poison Control Center or doctor for treatment advice. If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice. If Swallowed: Call a Poison Control Center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by Poison Control Center or doctor. Do not give anything by mouth to an unconscious person.

Do not give any person anything to eat or drink until you are sure it is safe to do so. Have the product container or label with you when you call a Poison Control Center or doctor. In case of emergency, call 1-800-858-4891.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

EPA EST NO. 70815-GA-2
NET WEIGHT: 1 LBS

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

This product is used to protect treated articles from decay, mildew or mold, including paints and stains, adhesives, cauls, glues, sealants, wood and wood composites.

This product must not be sold as a moisture paint additive designed for direct sale to retail customers, e.g. in a paint pack or other small volume or one-use package. This product may be added to paint products that are labeled
A) with product-specific instructions for the use of a respirator during application, or
B) as follows: When applying with a sprayer, wear a P100 approved respirator with any R, P, or HE filter. (If oil is not present in the paint product or recommended for use as an additive in the paint product, add "N" as an additional respirator type.)

This product must not be used as an in-container preservative. Mix contents slowly before using to assure uniform mixture. DENSIL C40 Antimicrobial is an aqueous dispersion containing 40.4% (w/w) active ingredient. DENSIL C40 Antimicrobial is to be used in water-based or water-compatible products only.

Do not apply this product by means of ultraviolet light blower or thermal "flamming" devices.

LATEX EMULSION PAINTS, STAINS, AND COATINGS
Dispers 12.4 to 24.6 pounds (8.9 to 19.3 parts) of DENSIL C40 Antimicrobial per 100 gallons of exterior paint to obtain effective mildew control in the paint film after it is applied. Use the high rate in areas favorable to mildew and mold growth, such as where painted surfaces frequently are warm and moist. DENSIL C40 Antimicrobial, when used at recommended rates, is used as a fungicide for the control of mold and mildew. DENSIL C40 Antimicrobial is used in latex paint formulas that are to be applied by spraying or airless spraying. DENSIL C40 Antimicrobial is compatible with zinc oxide in latex paints. DENSIL C40 Antimicrobial can be used with either unmodified or alkyl modified acrylic, vinyl acrylic, or polymethylacrylate latexes. DENSIL C40 Antimicrobial can be added into the paint formula during the pigment grind operation, during or after thicken, or post-added to a finished paint product after manufacture.

Note: If DENSIL C40 Antimicrobial is used to produce post-manufacturing paint additive products, such products must be distributed to and used by only professional personnel engaged in the mixing or blending of paints. Such post-manufacturing paint additive products may not be sold directly to homeowners or non-professional painters.

If an in-container preservative is used in combination with DENSIL C40 Antimicrobial, its compatibility with DENSIL C40 Antimicrobial should be examined first. DO NOT use in paints designed for applications on food-contact surfaces, or on the interior of buildings engaged in food processing or food handling. DO NOT use in paints designed to be handled by children.

AQUEDUS ADHESIVES
DENSIL C40 Antimicrobial may be incorporated into adhesives to protect the applied adhesive films from mold growth and decomposition. Fully disperse 1.2 to 2.4 pounds of DENSIL C40 Antimicrobial per 1,000 pounds of adhesive while it is being manufactured. Use the high rate in areas favorable to mildew and mold growth, such as where surfaces frequently are warm and moist. DO NOT use adhesives designed for applications on food-contact surfaces, or on the interior of buildings engaged in food processing or food handling.

AQUEDUS CAULKS AND SEALANTS
To provide mildew and mold control on caulkings or sealing deposits after application, fully disperse 2.5 to 12.5 parts of DENSIL C40 Antimicrobial per 1,000 pounds of caulk or sealant products while they are being manufactured. The high rate is recommended for exterior caulk. DO NOT use in caulks or sealants designed for applications on food-contact surfaces, or on the interior of buildings engaged in food processing or food handling.

GROUPS AND JOIN TCOMPONDS
Add DENSIL C40 Antimicrobial to gums and joint compounds at 1.0 to 5.0% by weight during the blending process, e.g. 1.0 to 5.0 parts of DENSIL C40 Antimicrobial per 100 pounds of gum or joint compound blend.

WOOD PRESERVATIVE STAINS
Apply Ground Application: Add DENSIL C40 Antimicrobial at the rate of 10 to 25 parts per 100 gallons of water-based stain formulation to prevent growth of mold, mildew, and wood decay fungi.

DENSIL C40 Antimicrobial can be added during the pigment grind operation, during or after thicken, or post-added to a finished product. DENSIL C40 Antimicrobial is compatible with stains containing zinc oxide. It is the responsibility of the formulator to determine the suitability of DENSIL C40 Antimicrobial for this use and to obtain end-use product registrations.
