For 8-month prevention and treatment of ticks, fleas and lice on small dogs and puppies 7 weeks of age and older and up to 18 lbs. (8 kg)

- Repels AND kills fleas and ticks.
- Repels and kills ticks for 8 months, including Deer ticks (vector of Lyme disease and anaplasmosis), American dog ticks (vector of Rocky Mountain spotted fever and ehrlichiosis), Brown dog ticks (vector of ehrlichiosis, anaplasmosis, Bartonella, canine hemoplasmosis, babesiiosis, and Rocky Mountain spotted fever), and Lone Star ticks (vector of ehrlichiosis).
- Prevents tick infestations within 48 hours after application.
- Re-infesting ticks are repelled and/or killed as quickly as 6 hours.
- Treatment with Seresto kills fleas that may vector tape-worm infections (Dipyldium caninum), Bartonellosis (Bartonella vinsonii, Bartonella spp.), and rickettsiosis (Rickettsia felis), which are types of sarcoptic mange.
- Re-infesting fleas are killed within 2 hours with protection against further flea infestation lasting 8 months.
- Kills and repels fleas before they lay eggs.
- Seresto aids in the control of flea larvae in the dog’s surroundings following contact with a Seresto-treated dog.
- Kills chewing lice.
- Aids in the treatment and control of Sarcoptic mange.
- No need to remove collar when your pet goes swimming or gets bathed.

For external use on dogs only. Do not use on other animals. Do not use on puppies under seven weeks of age. Do not get this product in dog’s eyes or mouth. As with any pesticide product, consult a veterinarian before using the product on debilitated, aged, breeding, pregnant, or nursing animals. Individual sensitivities, while rare, may occur after using ANY pesticide product for pets.

PRODUCT INFORMATION
Fleas which may cause flea allergy dermatitis (FAD) or flea bite hypersensitivity (FBH).
Seresto kills existing fleas on dogs within 24 hours. Reinfesting fleas are killed within 2 hours with protection against further flea infestation lasting eight (8) months. Pre-existing pupae in the environment may continue to emerge for six (6) weeks or longer depending upon the climatic conditions.
Seresto aids in the control of flea larvae in the dog’s surroundings following contact with a Seresto-treated dog.
Ticks already on the dog prior to treatment may not be killed immediately after collar application and may remain attached and visible. At the time of application remove ticks already on the dog. The prevention of infestations with new ticks starts within 48 hours after application of the collar.
Re-infesting ticks are repelled and/or killed as quickly as 6 hours.
Kills lice on dogs.
Aids in the treatment and control of Sarcoptic mange.
Seresto is water-resistant and remains effective following a shampoo treatment, swimming or after exposure to rain or sunlight. Under normal conditions, effectiveness lasts for 8 months. In order to maintain an eight-month duration, dogs must not be bathed more than once per month. For dogs that swim once a month, the control duration is reduced to 5 months for flea control and reduced to 7 months for tick control.
Occasionally scratching may be observed in animals that are not used to wearing collars in the first few days after fitting. Ensure that the collar is not fitted too tightly. Slight hair loss, and mild skin reactions due to the mechanical irritation of the collar may occur at the application site which usually recover within 1 or 2 weeks without the need for collar removal. Further guidance regarding individual animal sensitivities, see information below.
In case of loss of collar, a new collar may be applied immediately. Do not attach a leash to the collar as this may cause breakage.
Keep the collar in the bag and in the outer packaging until use. As with any pesticide product, do not allow small children to play with the collar or reflectors, or to put them into their mouths. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and cold water after fitting the collar. People with sensitivity reactions to the ingredients of the collar should avoid contact with the collar. Choking hazard. Contains small parts. Do not place collar or reflectors in mouth. Not intended for use on humans.

Bayer Polymer Matrix ensures that both active ingredients are continuously released in low concentrations.

- Make sure to replace the collar after 8 months for year-round flea and tick prevention.
- Light reflectors for added visibility in the evening and at night.

Active Ingredients: % by Weight
Imidacloprid...........................................45.5 %
Flumethrin...........................................10.0 %

This collar is designed with a release mechanism. In the unlikely event of a dog being trapped, the dog’s own strength is sufficient to widen the collar to allow for quick release.

Replace the collar after 8 months for optimal tick and flea protection.
This collar is designed with a release mechanism. In the unlikely event of a dog being trapped, the dog's own strength is sufficient to widen the collar to allow for quick release.

**PRODUCT INFORMATION**

- **Seresto** kills existing fleas on dogs within 24 hours. Reinfesting fleas are killed within 2 hours, lasting eight (8) months. Pre-existing pupae are killed within 24 hours. Seresto aids in the control of flea larvae in the surroundings following contact with a Seresto-treated dog. Ticks already on the dog prior to treatment may not be killed immediately after collar application, and re-infesting ticks are repelled and/or killed. Treatment with Seresto kills fleas that may vector tape worm infections with the dog.

- **Tick control**:
  - Prevents tick infestations within 48 hours after application.
  - Re-infesting ticks are repelled and/or killed.
  - Seresto aids in the control of flea larvae in the surroundings following contact with a Seresto-treated dog.

- **Flea control**:
  - Re-infesting fleas are killed within 2 hours, lasting eight (8) months. Pre-existing pupae are killed within 24 hours.
  - Seresto aids in the treatment and control of *Sarcops caninum*, *Babesia* spp., *Anaplasma* spp., *Rocky Mountain spotted fever*, *Rocky Mountain无私*, *Live*, and *Rocky Mountain tick*. At the time of application remove ticks – preventions with new ticks starts within 48 hours.

- **Other ingredients**:
  - **Bayer Polymer Matrix** ensures that both active ingredients are continuously released in low concentrations.
  - There are no remnants from the plastic container.
  - Do not contaminate water, food or feed by applying this product. Do not use container for food storage or disposal.
  - Hot Line Number: Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**DIRECTIONS FOR USE**

- Insert end of the collar through the buckle. Adjust the collar around the animal’s neck without tightening it too tight or leaving it too loose. As a guide, it should be possible to only insert 2 fingers comfortably between the collar and the neck. Pull excess collar through the loop(s). Collar length of greater than 1 inch (2 cm) beyond the loop(s) should be cut off unless it is on a growing puppy, where some additional length may be needed for adjustment as the animal grows.

- After application of the collar, three reflector clips may be fixed permanently to the collar to increase the animal’s visibility in the dark. Take the clips out of the bag. The clips should be evenly distributed on the non-overlapping part of the collar. The clips are correctly applied when a clicking sound is heard. For safety reasons once the reflectors are fixed to the collar the clips close permanently and cannot be re-opened.

- The collar should be worn continuously for the 8 month protection period. Check periodicaly and adjust fit if necessary, especially when puppies are rapidly growing.

**STORAGE AND DISPOSAL**

- Do not contaminate water, food or feed by applying this product. Do not use container for food storage or disposal.
- Pesticide Storage: Store in original unopened container in a cool, dry place that is inaccessible to children.
- Container Disposal: Dispose of pouch and expired collar in trash. Outer container may be recycled or disposed of in trash.
