SOFT BAIT

KILLS RATS, MICE & MEADOW VOLES*
Kills Warfarin Resistant Norway Rats And House Mice

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panels for First Aid and additional precautionary statements.

ACTIVE INGREDIENT:
Brodifacoum (CAS #56073-10-0): ..................  0.0025%
OTHER INGREDIENTS†: .......................... 99.9975%
†Contains Denatonium Benzoate  TOTAL  100.0000%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat
**FIRST AID IF SWALLOWED**

- Call a poison control center, doctor, or 1-887-654-2494 immediately for treatment advice.
- Have the person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.

**NOT TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁ intramuscularly or orally. Vitamin K₁ is antidotal at doses of 10–20 mg (net mg/kg). Repeat as necessary based on monitoring of prothrombin times.

**NOTE TO VETERINARIAN**

Brodifacoum: For animals ingesting bait and/or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K₁ at doses of 2–5 mg/kg. If needed, check prothrombin times every 3 days until values return to normal (up to 30 days). In severe cases, blood transfusions may be needed.

**TREATMENT FOR POISONING**

- If animal eats bait, call veterinarian or 1-887-654-2494 at once.

**CAUTION**

- Harmful if swallowed. Keep away from children, pets, or nontarget animals to rodenticides.
- To help to prevent exposure:
  1. Store unused product out of reach of children and pets.
  2. Apply bait in locations out of reach of children, pets, domestic and nontarget wildlife, and in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are lifted, units must be secured or otherwise immobilized. Stronger bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
  3. Dispose of product container and unused, spoiled, or unconsumed bait as specified on this label.

**APPLICATION DIRECTIONS**

- Place 2 to 8 sachets at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.
- MICE AND MEADOW VOLES: Place 1 sachet per placement. Space placements at 8 to 12 foot intervals in infested areas. Three sachets may be needed at points of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mice or mouse/voles activity cease.
- FOLLOW-UP: Replace contaminated or spoiled bait immediately.

**PRECAUTIONARY STATEMENTS**

- Hazards to Humans and Domestic Animals: CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets.
- All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

**WARRANTY**

- To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesian rat, Meadow vole, White-throated woodrat, Southern plains woodrat, and Mexican woodrat.*
