PROXEL® CMC-E
MANUFACTURED FOR LONZA INC, 90 BOROLINE DRIVE, ALLENDALE, NJ 07401
2017.04.25

Active Ingredients:
- 5-Chloro-2-methyl-4-isothiazolin-3-one: 1.11%
- 2-methyl-4-isothiazolin-3-one: 0.39%
- Other Ingredients: 58.50%
- 100.00%

PRECAUTIONARY STATEMENTS

DANGER, CORROSIVE: Causes eye damage and skin burns. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. May be harmful if inhaled. May be fatal if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA. Do not contaminate water by cleaning of equipment or disposal of waste.

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferable by mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in manner inconsistent with its labeling. Proxel CMC-E is an in-container preservative for the control of bacteria and fungi in industrial and household consumer products including all purpose liquid cleaners; polishers and anti-tarnish products; air fresheners and carpet shampoos; presspots; liquid dishwashing detergents; automotive appearance products such as waxes, car-care products; household cleaners; household utility products; package utility products such as remoistened sponges and mops; paints and coatings.

Proxel CMC-E preserves and controls the growth of bacteria and fungi in adhesive, polymer emulsions and various lifts, surfactant solutions and dispersions, concrete admixtures, water-based building compounds, caulk and sealants, pesticides for non-food applications, including fungicides, herbicides, insecticides, repellants and biocides. Add 0.5 to 4.0 lbs Proxel CMC-E (227 – 1814 g) to each 1000 lbs (463.6 kg) of product to be treated to provide 0.8 – 3.0 ppm active isothiazolones. To ensure uniform distribution, slowly disperse Proxel CMC-E into product with agitation. Mix thoroughly until evenly dispersed throughout product.

METALWORKING FLUID PRESERVATION

Proxel CMC-E is used for the control of bacteria and fungi in soluble and emulsifiable-type aqueous metal working fluids. For the maintenance of a nonfouled system, use Proxel CMC-E at 33 fl. ounces (2.2 lbs.) per 1000 gallons of emulsion every 4 weeks or 33 – 141 fl. ounces (2.2 – 9.5 lbs.) per 1000 gallons of emulsion to be followed by subsequent maintenance dosages depending upon the treatment interval noted above. A higher dosage and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc. Proxel CMC-E must be dispersed into the use-dilution of the hydraulic fluid using a metering pump and uniformly dispersed throughout the system.

INDUSTRIAL PROCESS WATER SYSTEMS

Proxel CMC-E is used as a preservative for the control of bacteria and fungi in pretreatment system and process water used for washing metal or plastic parts and/or paint reduction. Add Proxel CMC-E to some other point in the system to ensure uniform mixing. Badly fouled systems must be precleaned before treatment is begun.

INITIAL DOSE: When the system is noticeably fouled, add 2.46 to 7.46 lbs. (37 to 113 fl. ounces) of Proxel CMC-E to each 1000 gallons of water in the system. Repeat until control is achieved.

For the maintenance of a nonfouled system, use Proxel CMC-E at 0.003 - 0.005 lbs. of Proxel CMC-E at each 1000 gallons of water to be treated to provide 0.8 – 3.0 ppm active isothiazolones. To ensure uniform distribution, slowly disperse Proxel CMC-E into product with agitation. Mix thoroughly until evenly dispersed throughout product.

For a noticeably fouled system use an initial dose of 133 - 224 fl. ounces (9.0 - 15.1 lbs.) per 1000 gallons fluid followed by subsequent maintenance dosage. A higher dosage range and/or increased frequency of treatment may be required depending upon rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc. Proxel CMC-E must be dispersed into the use-dilution of the hydraulic fluid using a metering pump and uniformly dispersed throughout the system.

For maintenance of a non-fouled system, use Proxel CMC-E at 108 - 133 lbs (7.3 - 9.0 lbs) per 1000 gallons fluid every 8 weeks.

NOTE: Regardless of the manner of incorporation the total active ingredient level in the system must not exceed 35 ppm equivalent to 2333 ppm Proxel CMC-E or 23 gallons per 10,000 gallons system fluid.

For direct addition to a fouled system, add 52.5 - 210 fl. ounces (3.6 - 14.4 lbs.) of Proxel CMC-E to each 1000 gallons of water for 15 – 20 minutes.

For a noticeably fouled system use an initial dose of 66 – 141 fl. ounces (4.5 – 9.5 lbs.) per 1000 gallons of emulsion to be followed by subsequent maintenance dosages depending upon the treatment interval noted above. A higher dosage and/or increased frequency of treatment may be required depending upon the rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Proxel CMC-E must be dispersed into the use-dilution of the metalworking fluid using a metering pump and uniformly dispersed throughout the system.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

For use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL

Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Metal Containers: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities by burning. If burned, stay out of way of smoke.

Plastic containers:
- Triple rinse (or equivalent).
- Then offer for recycling or reconditioning, or dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities by burning. If burned, stay out of way of smoke.

EPAL Reg No. 6836-259 EPA Est. No. 6836-IL-001 Net Wt. 440lbs.

For disposal by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Open dumping is prohibited. Store in original container in areas inaccessible to children.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray or mixture of rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

For disposal by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
