DIRECTIONS FOR USE:
KAPOW! may be sprayed on fruits, vegetables and foliage to combat mites, thrips, aphids, molds, mildews and most leaf dwelling insects. It is safe to use up until the day of harvest. For best results rinse with water in between uses. Allow KAPOW! 24 hours on the plant prior to rinse. Saturate the stem and the tops and bottoms of leaves starting at the bottom of the plant and working your way to the top. KAPOW! must be used between 38°F and 88°F. Use only as directed. Happy growing.

PH 6.5. We advise testing the pH of all ready-to-use products prior to use.

Ready to use. Do not dilute. Shake vigorously prior to application.

Store in original container in a dry place inaccessible to children and pets. Do not reuse empty containers. Recycle or discard in trash.
