FILL & SET SPREADER (for application in all environments)

HOW TO USE

1. **Select your area and estimate**. Choose a location that is free from obstructions, such as trees, fences, or power lines. Use a map or GPS to find the location of the area you want to treat.

2. **Prepare the ground**. Remove any debris, such as rocks, sticks, or leaves, before applying the granular products. For broadcast application, spread the product evenly over the area using a broadcasting technique. For drop application, apply the product at a rate of 2-3 pounds per 1,000 square feet.

3. **Apply at a rate of 100 ft**. Apply the product evenly over the area, using a broadcast or drop method, as appropriate. For broadcast application, use a broadcast spreader and adjust the settings to achieve the desired coverage. For drop application, use a drop spreader and adjust the settings to achieve the desired coverage.

4. **Water the area**. Water the area immediately after applying the granular product to ensure proper distribution and water the area thoroughly, using an overhead sprinkler or a hose. Allow the area to dry before mowing or using the area.

5. **Monitor the area**. Check the area regularly to ensure that the product is being distributed properly and to monitor the effectiveness of the treatment. Adjust the application rate or technique as needed to achieve the desired results.

**DIRECTIONS FOR USE**

**INSTRUCCIONES DE USO**

**Scotts® QUICK START GUIDE: You’re Just Three Simple Steps Away From A Beautiful Scotts® Lawn**

**Guía de inicio rápido de Scotts®: Estás a sólo tres sencillos pasos de tener un hermoso césped con Scotts®**

**FILL & SET SPREADER**

**Uñar y ajustar el espaciador**

- **Scotts® Broadcast / Rotary Spreaders**
  - **4%**

- **Scotts® Drop Spreaders**
  - **8%**

**Apply**

Applicar

- **Apply on a calm day.**
- **Apply to mowed grass.**
- **Be sure that the grass is well watered before applying.** This helps particles adhere to the lawn and produce best results.
- **Apply when weeds are actively growing.** When daytime temperatures are consistently between 60°F and 90°F.
- **Set grass should be mowed a day or two before application.**
- **For even application walk at a steady pace slightly overlapping each pass.**
- **Scotts® Drop Spreaders: Align hopper arrow with preview window.**

**CLEAN-UP**

Limpieza

Sweep product from hard surfaces onto the lawn to keep valuable feeding elements on the grass.

Be sure the product remains on the surface during bagging to prevent the nutrients from being blown away.

**YOU’RE DONE! WHAT’S NEXT?**

**¿Listo? ¿Qué sigue?**

- Do not allow product to contact people or pets directly or through drift. Keep people and pets off the lawn during application. Do not allow people or pets to enter treated areas until dew has settled.

**WATER CONTROL**

**Scotts® RECOMMENDED FEEDING ROUTINE**

**TIPS FOR LAWN CARE SUCCESS**

**FEED REGULARLY**

Regular feedings provide the nutrients your lawn needs to look its best and withstand the stresses of weeds, heat, drought & family activity.

**MOW AND LEAVE THE GRASS CLIPPINGS ON YOUR LAWN**

Mowing high allows the grass to develop a deep root system & helps your lawn use water more effectively. Grass clippings recycle the plant nutrients back into the soil.

**CONSERVE WATER**

Well-fed lawns are more efficient at using available water. Feeding with Scotts® lawn food helps grow a thick lawn with more roots to better absorb water and nutrients than an unfed lawn. This helps protect your lawn against heat drought and other stresses. Remember your lawn will begin to wilt when water is needed. As much as possible take advantage of nature’s sporadic and rely on the rain to water your lawn.

---

**WEED CONTROL**

**WEEDS**

- **Weed Care.** Scotts® products are designed with care to grow thicker & stronger. A Green Lawn is a Good Lawn - A healthy lawn can clean the soil and prevent runoff and soil erosion. You can make a difference in water resources cleanly. Apply this product only to your lawn, and sweep any remaining granules into the lawn.

**FEEDING ROUTINE**

EARLY SPRING

- An early spring feeding helps grass grow green & strong for the season. You should start your feeding the first time you mow your grass.

LATE SPRING

- Feeding now prepares grass for summer stress by thickening the blades on top and building deep roots.

EARLY FALL

- An early fall feeding strengthens the root system but in the harsh winter months for spring quicker. You should feed your grass once comes out of dormancy.

LATE FALL

- Late fall is the best feeding time because it builds strong deep roots and provides grass for winter. You should feed when all the leaves have fallen.

Florida Annual Turf Applications: 4 annual applications with the exception of fertilizing in spring and spring applications feeding in the fall and fall feeding in the early and early winter.

North Florida is north of Tallahassee, Central Florida is defined as south of Ocala and the area extending from Vero Beach to Tampa. Scotts® includes the remaining eastern portion of the state.
