How to Apply: Treating Subsurface Runways

Locate active tunnels

Make a 1-inch hole in the roof of a mole surface tunnel. Do not crush tunnel. Always mark open tunnels. Make these openings to allow you to revisit later.

Place the product in tunnels

Poke a small hole in the roof of the active tunnel just larger than the diameter of the product. Drop the product down into the hole and reseal with dirt. Repeat the process for every 5 to 10 feet of active tunnel.

Checking the results

From days after placing the product into the active tunnels, use procedure above to recheck if tunnel remains active and if so, reapply at the same active site. Use procedure above to recheck every 3 to 5 feet of active tunnel.

FIRST AID:

Have the product container or label with you when calling a poison control center or going for treatment.

IF SWALLOWED:

• Call a poison control center, doctor, or 1-800-222-1222 (nights, weekends) or 1-800-837-7644 (Monday – Friday, daytime) immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

Treatment for pet poisoning:

If an animal eats bait, call veterinarian or numbers listed above at once.

Note to Physician or Veterinarian:

Contains the nerve poison Bromethalin. This is not an anticoagulant type rodenticide. For humans or animals ingesting bait, see above poisoning section. If an animal is vomiting, use emetic syrup or other emetic as directed. If not vomiting, treatments need to be given to offset symptoms and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

NET WEIGHT: 5.75 OZ (162.5g)

This Product May Only be Used to Control Moles in Manual, Below-Ground Applications

Kills Moles
DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

Important: Do not expose children to this product or use for any purposes other than to control moles. To help prevent accidents:

1) Store product and all use instructions out of the reach of children and pets. 2) Follow all application directions and USE RESTRICTIONS on this label. Apply bait only in underground runways of moles. Keep pets out of treated areas. Do NOT expose product stems greater. 3) Dispose of product container and unused or spoiled product as specified on label.

USE RESTRICTIONS: This product may only be applied at the use sites and by the application methods indicated on this label.

This product may only be used in lawns, parks, residential lawns, ornamental gardens, non-crop grassy areas, or on or under water for the control of eastern moles (Scalopus aquaticus), star-nosed moles (Condylura cristata) or (Scapanus spp). It must be applied directly into moles' burrowing systems. This bait must be applied underground in either main underground runway or in subsurface feeding tunnels. This bait may not be used above ground. Wear gloves when bait is handled. "For use on more than one (Condylura cristata) or NC"

How to select proper treatment areas: The presence of moles is indicated by a network of underground runways in the turf caused by moles foraging for food just below the soil surface. They may also see a series of conical mounds of earth pushed up from deep burrows.

1. Remove all of the mounded loose dirt that is at ground level.
2. Continue to remove loose dirt that is at ground level and you will eventually locate the primary tunnel shaft.
3. Once the main tunnel shaft has been discovered and opened, leave it open and return in 48 hours to see if the opening has been reclosed with loose dirt.
4. Reopen the tunnel shaft and drop the product down into the shaft and reclose opening with dirt.
5. Revisit this mound in 5 days and check again to see if it remains active.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container, in a dry place inaccessible to children and pets. Keep out of reach of children and out of reach of other chemicals.

Pesticide Disposal and Container Handling: Collect and containerize. Do not use or handle this container. If empty, clean and thoroughly dry before offering for recycling or disposal. Never place unused product down ANY indoor or outdoor drain.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

FIRST AID:

Have the container or label with you when calling a poison control center or going for treatment.

IF SWALLOWED:

• Call a poison control center, doctor, or 1-800-222-1222 (nights, weekends) or 1-800-837-7644 (Monday – Friday, daytime) immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by the poison control center or doctor.

Treatment for pet poisoning:

If an animal eats bait, call veterinarian or any numbers listed above at once.

Note to Physician or Veterinarian:

Contains the nerve poison Bromethalin. This is not an anticoagulant type rodenticide. For humans or animals ingesting the bait and/or showing poisoning signs such as muscle tremors, loss of vision, anxiety, convulsions, or loss of balance, call veterinarian. Symptoms of poison, unless the product is vomited, should be treated accordingly through administration of an osmotic diuretic and corticosteroids.

Environmental Notices

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed on carrion that has been eaten this bait. Do not contaminate water when disposing of equipment, bait or containers. Do not apply directly to water.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container, in a dry place inaccessible to children and pets. Keep out of reach of children and other chemicals.

Pesticide Disposal and Container Handling: Non-refillable container. Do not reuse or refill this container.

If empty:

Place in trash or offer for recycling if available.

If partly filled:

Call your local solid waste agency for disposal instructions. Never place unused product down ANY indoor or outdoor sink drain.
