PREFERRED Clear Shock

• Kills bacteria and destroys organic contaminants
• Kills algae
• Fast dissolving
• One dose treats 10,000 gallons

1 balance
2 sanitize
3 shock
4 prevent algae

ACTIVE INGREDIENT:
Sodium Dichloro-s-Triazinetrione dihydrate .................. 59%
Other Ingredients: .............................................. 1%
TOTAL ....................................................... 100%
Available Chlorine .................. 56%

KEEP OUT OF REACH OF CHILDREN

DANGER

Contamination or improper use may cause fire or explosion or the release of toxic gases. Do not allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not mix this product with a small amount of water. Only add directly to your pool. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through skin.
Read all precautionary statements on label and first aid statements before use.
See back panel for Precautionary and First Aid Statements.

Net Wt. 1 lb. (16 oz.) (454 g)
DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
READ ALL PRECAUTIONARY STATEMENT’S BEFORE USE.
WHY YOU SHOULD USE THIS PRODUCT: This product is an effective multi-purpose sanitizer & shock that protects against chlorine loss, optimizing pool usage and swimmer comfort with no sediment. This product is convenient and easy to use to control the growth of algae, kill bacteria and destroy organic materials.
For crystal clear pool water, follow our 4 step pool care program! Step 1: Test and adjust pool water balance; Step 2: Chlorinate and clarify; Step 3: Shock treat your pool at least once a week; and Step 4: Add algicide regularly.
HOW TO USE: Add the recommended dosage of this product directly to the pool during evening hours while the filter is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. Use entire contents when opened. If any granules settle to the bottom of the pool, use brush to disperse.
WATER BALANCE: For best product performance, maintain comfort and crystal clear water: Maintain pH in the range of 7.2 to 7.6. Maintain total alkalinity in the range of 80 to 120 parts per million (ppm). Maintain calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Use HTH® pool care products to make adjustments. Follow label directions for each product.
OPENING YOUR POOL: For best results, see the Water Balance section above before treatment. Always adjust and maintain pH in the 7.2 to 7.6 range. Follow SHOCK TREATMENT instructions on this package. Allow 36 minutes for product to disperse. Test free available chlorine residual with a pool test kit. Do not enter pool until the free available chlorine residual is 1 - 4 ppm. Repeat treatment as needed. SHOCK TREATMENT / SUPER CHLORINATION: For best results, see “WATER BALANCE” and “HOW TO USE” sections above before treatment. Every 7 days, or as necessary to prevent pool problems, shock treat/superchlorinate the pool by adding one (1) to two (2) bags per 10,000 gallons of water to provide a dose of 5 to 10 ppm free available chlorine in your pool. Use entire contents of bag when opened.
Additional shock treatments may be required to correct problems which are caused by visible algae, high buffering loads, heavy wind or rainstorms. Additional shock treatments may also be required to correct problems such as unpleasant odors and eye irritation. Check the available chlorine with a suitable test kit. Do not reenter pool until the free available chlorine residual is 1 - 4 ppm.
ALGAE CONTROL: Follow “SHOCK TREATMENT” directions on this label. Add this product as close as possible to any algae on the sides or bottom of the pool. Do not enter pool until the free available chlorine residual is 1 - 4 ppm. If necessary, repeat the treatment. To prevent possible staining or bleaching, take the following steps immediately after treatment: Thoroughly clean pool by brushing surface of algae growth, vacuum and cycle through filter. For preventative algae control, use your preferred HTH® algicide product regularly. Follow label directions on the algicide.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Corrosive. Causes irreversible eye damage and skin burns. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Irritating to nose and throat.
• Open in a well ventilated area. Do not breathe dust and fumes.
• Do not get in eyes, on skin, or on clothing.
• Wear protective rubber gloves when handling this product.
For additional protection of skin, wear long sleeves and long pants.
• Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.
• Remove and wash contaminated clothing before reuse.
FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
First Aid continued on next column.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6611

PHYSICAL AND CHEMICAL HAZARDS:

DANGERS. If product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not add water to this product. Add only into water.
- Do not allow to become wet or damp before use. Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.
- Keep all foreign water, including other water treatment products, away from this product.
- Do not mix with other products or dissolve before use.
- Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer.

Strong oxidizing agent. This product can increase fire intensity.
- Keep away from heat and from flame and burning material (like a lit cigarette).

ENVIRONMENTAL HAZARDS:

This product is toxic to fish and aquatic organisms.

STORAGE & DISPOSAL:

Keep this product dry in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE EMERGENCY HANDLING.

EMERGENCY HANDLING: In case of contamination or decomposition — Do not reseal container. Immediately remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.

IN CASE OF EMERGENCY CALL: 1-800-654-0461

PHYSICAL AND CHEMICAL HAZARDS:
DANGER. If product is exposed to small amounts of water, it can react to cause explosion or the release of toxic gases. Do not add water to this product. Add only water.
- Do not allow to become wet or damp before use.
- Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases.
- Keep all foreign matter, including other water treatment products, away from this product.
- Do not mix with other products or dissolve before use.
- Do not allow this product to contact other water treatment products. Handle with a Skinner, make sure Skinner is completely clean and free of residue from other water treatment products before adding this product in a Skinner.

Strong oxidizing agent. This product can increase fire hazard.
- Keep away from heat and flame of the water, material to avoid accidental contamination.
- Do not release into the environment. Do not enclose containers (or nests) with this material prior to disposal. Offer for recycling if available.
- Do not contaminate feed or food by storage or disposal of this product. Use only as directed.
- Do not contaminate feed or food by storage or disposal of this product. Use only as directed.
- Do not contaminate feed or food by storage or disposal of this product. Use only as directed.

STORAGE & DISPOSAL:
- Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area.
- Keep away from heat or open flame. Keep out of reach of children.
- Do not release into the environment. Do not enclose containers (or nests) with this material prior to disposal. Offer for recycling if available.
- Do not contaminate feed or food by storage or disposal of this product. Use only as directed.
- Do not contaminate feed or food by storage or disposal of this product. Use only as directed.
- Do not contaminate feed or food by storage or disposal of this product. Use only as directed.

ACTIVE INGREDIENTS:
Sodium dichromate - sodium dichromate dehydrate 99%
Other ingredients: 1%

IN CASE OF EXPOSURE:
- In case of exposure, flush eyes with copious amounts of water for at least 15 minutes.
- In case of exposure, flush eyes with copious amounts of water for at least 15 minutes.
- In case of exposure, flush eyes with copious amounts of water for at least 15 minutes.

IN CASE OF FIRE:
- Firefighters should use water if possible. Wet prussiate of potash may react with water to release highly toxic gases. Use water or dry chemical for dry prussiate of potash. Do not use water on dry prussiate of potash.

DIRECTIONS FOR USE:
- It is a violation of Federal law to use this product in a manner inconsistent with this label.
- Read all precautionary statements before use. You should review this product. This product is effective against algal blooms in standing water and provides additional benefit against biofouling. This product is inert and does not contain any alkyl and aromatic components.
