FLOWTRON®

FLY SEX LURE

More Effective than Ultra-Violet Light Alone

- Makes your Insect Killer More Effective – In luring and killing House Flies and Black Garbage Flies
- Powerful Pheromone – Works 24 hours a day

CAUTION:
Harmful if swallowed. Avoid inhalation and avoid skin, mouth and eye contact with the pheromone strip.

How Your Sex Lure Works:
Your sex lure strip continuously releases a synthetic duplicate of the fly sex lure (pheromone) to attract house and garbage flies to your insect control device.

Since flies are active during daylight hours, operation of your pheromone enhanced device 24 hours per day is recommended.

This product is intended for use only in devices in which pheromones are the sole active ingredient.

Directions for Use:
Remove lure strip from its protective pouch and discard pouch. Always wash hands thoroughly after contact with the lure strip.

Installation:
Electronic Insect Killers:
Attach strip to the outer enclosure by placing oval cut-out around enclosure strut as shown.

Other Fly Control Devices:
Refer to the owner's manual accompanying the device for instructions on locating and installing the pheromone strip.

For best results replace the lure strip after 30 days of use.

Storage:
Store unopened pouch in a cool, dry place.

Disposal:
Do not reuse lure strip or empty pouch. Wrap strip in newspaper and dispose in trash.
