This Product May Only be Used Inside and Within 100 Feet of Man-made Structures and For All Burrow Baiting.

ACTIVE INGREDIENT:
Bromethalin (CAS #63333-35-7): . . . 0.01%
OTHER INGREDIENTS†: . . . . . . . . . . . 99.99%
†Contains Denatonium Benzoate
TOTAL 100.00%

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panels for First Aid and additional precautionary statements.

KILLS RATS, MICE, AND MEADOW VOLES*
TREATMENT FOR PET POISONING

If an animal eats this bait, call a veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN

Contains the nerve poison Bromethalin. This product is not an anticoagulant-type rodenticide. For humans or animals ingesting this bait and showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emetics or gastric lavage. Sublethal symptoms, if present, would be the result of central edema and should be treated according to administration of an osmotic diuretic and corticosteroid.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for sites, pests, and application methods described on the label.

IMPORTANT: Do not expose children, pets or non-target animals to rodenticides. To help prevent exposure:

1. Store unused product out of reach of pets and children.
2. Apply bait in locations out of reach of children, pets, domestic animals and non-target wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are filled, they must be sealed or otherwise immobilized. Stronger bait stations are needed in areas exposed to hooded livestock, raccoons, bears or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spilled or unopened bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant bait stations must be used wherever children, pets, non-target mammals, or birds may have access to the bait placement location.

USE RESTRICTIONS: This product may only be used to control the following rodent pest in and around man-made structures: House mouse (Mus musculus), Norway rat (Rattus norvegicus), Roof rat (Rattus rattus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys灰рма), Golden mouse (Ochrotomys nuttlai), Polynesian rat (Ratus exulans), Meadow vole (Microtus pennsylvanicus, White-throated vole (Microtus albogriseus), Southern plains vole (Microtus ochrogaster), and Mexican vole (Microtus mexicanus). This product must be used in and within 100 feet of man-made structures constructed in a manner so as to be vulnerable to commensal rodent invasions and/or to harboring or attracting rodent infestations. Examples of such structures include homes and other permanent or temporary residences, food processing facilities, industrial and commercial buildings, storage depots, agricultural and public buildings, transport vehicles (ships, trains, aircraft), docks and piers or terminal buildings and related structures and associated with these sites. Fences and perimeter baubing, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to food or feed crops. Do not broadcast bait.

This product may be applied to active rodent burrows to control rats within or beyond 100 feet of buildings and man-made structures, provided that infestations of these rodents have been confirmed. Bait shall not be placed less than six inches into active rat burrows. Do not broadcast bait. Because rat infestations may occur in areas larger than 100 feet from buildings and man-made structures, the rodents have ample supplies of food and cover, efforts should be made to remove food trash, garbage, trash, and debris.

Do not leave bait near or inside ventilation duct openings. Do not contaminate water, food, feedstuffs, food or feed handling equipment, or milk or meat handling equipment or surfaces that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

Do not sell this product in individual containers holding less than 4 pounds of bait.

KEEP OUT OF REACH OF CHILDREN

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

CONTAINER HANDLING: Non-returnable container. Do not reuse or refill this container. Offer for recycling, if available. Dispose of empty container by placing in trash, at an approved disposal facility or by incineration.

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than as indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

Net Weight: 12 lbs (5.4 kg)

RAMPAGE® MEAL BAIT

KILLS RATS, MICE, AND MEADOW VOLES

KILLS ANTICOAGULANT RESISTANT NORWAY RATS, ROOF RATS AND HOUSE MICE

Norway rats, roof rats and house mice cease feeding after consuming a toxic dose.

ACTIVE INGREDIENT: Bromethalin (CAS #63333-35-7): 0.01%

OTHER INGREDIENTS: 0.99%

CONTAINS: Denatonium Benzoate TOTAL: 100.00%

PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets.

All handlers (including applicators) must wear shoes, socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

User Safety Requirements

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Follow PPE immediately after handling this product. Wash the outside of gloves before removing from them. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and changing into clean clothing.

ENVIROMENTAL HAZARDS

This product is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not allow direct or contact to water, or to areas where surface water is present of in intertidal areas below the mean high water mark. Randall also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinse.
