Cattle - This product may be fed to beef and dairy cattle, including breeding cattle, lactating dairy cattle, growing and finishing cattle and calves, either in dry lot or on pasture up to slaughter and to lactating dairy cows without withholding milk from market during or after treatment.

ClariFly Larvicide Concentrate 8% is a specially formulated granular material for use in cattle feeds. It is approved for use in supplements, complete feeds, concentrates, premixes, feed mineral supplements, blocks, and tubs. It may also be used in liquid feeds when suspension agents are used to maximize the positional stability of the other feed ingredients.

Cattle Feeding Directions - 0.10 mg/kg/day

The following formula can be used when mixing cattle rations, including complete feeds, liquid feeds, supplements, premixes, supplements for hand feeding and mineral mixes.

\[
\text{GWL} \times 0.25 = \text{lbs of ClariFly Larvicide Concentrate 8\% per ton of product being manufactured}
\]

Species of importance are house flies, stable flies, face flies, and horn flies from the manure of treated cattle. When fed to cattle according to label directions, the Larvicide Concentrate 8\% is effective against these species.
