STORAGE AND DISPOSAL

Store to maintain product quality, store at temperatures below 35°C. Keep container tightly closed when not in use. For proper disposal, contact your State Pest Control or Environmental Protection Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office.

Container Disposal: Nonhazardous containers. Do not reuse or return this container to the marketplace or pour contents onto the ground or into a sewer. Save original container for use in returning empty containers. For further assistance, write to the manufacturer at the address below.

Inhalation: If symptoms occur, call a physician or poison control center immediately.

If Swallowed: Do not induce vomiting. Seek medical attention immediately. Do not give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

Pesticide: Precautionary Statements:

- **Environmental**: Prevent accidental exposure. Keep out of reach of children and pets. Do not use near fish-bearing water.
- **Fish**: Do not contaminate fish-bearing water.
- **Water**: Do not apply to or near ponds, lakes, streams, or ditches. Do not contaminate water sources.
- **Drift**: Do not apply to lands or water bodies where drift may cause allergic reactions in some individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using the toilet, or engaging in any other activity while hands are moist.

Storage: Store in the dark in a cool, dry place.

Check-Mark 40224 may be used to control bacteria and reduce biofilms in various membrane systems (reverse osmosis, ultrafiltration, nanofiltration, and microfiltration) used industrial and commercial cooling water systems, for control of microbial growth in water systems using either continuous or slug dosing.

Air-Washer systems:

- **Users** must wear long-sleeved shirts, long pants, chemical-resistant gloves, goggles, and protective clothing.
- **User Safety Requirements**: Keep and wash PPE separately from other laundry. Avoid contamination of food and drink. Washables must be washed in hot soapy water and thoroughly rinsed before reusing.
- **Engineering Controls**: When handling or applying the product, wear non-porous disposable gloves.
- **Personal Protective Equipment**:
  - **Goggles**
  - **Chemical-resistant gloves**
  - **Face shields**
  - **Safety clothes**

- **PPE, APR, or face shields** should be worn to protect against splashes or spills of liquid or dry products.

- **Eye protection**: Wear goggles or face shields when using this product. To protect against eye injury, it is recommended that you wear goggles or face shields when using this product.

- **Respiratory protection**: Use N95 or higher respirator when dust or mist is generated while using this product.

- **Engineering controls**: Use local exhaust ventilation (fume hoods) or a portable respirator in all work areas where the product is used.

- **Personal Protective Equipment**: Use approved respirators when the airborne concentration of the product exceeds the recommended exposure limit. Users must use a respirator that is approved by the National Institute for Occupational Safety and Health (NIOSH) or the Occupational Safety and Health Administration (OSHA).

- **Engineering Controls**: Use local exhaust ventilation (fume hoods) or a portable respirator in all work areas where the product is used.

- **Personal Protective Equipment**: Use approved respirators when the airborne concentration of the product exceeds the recommended exposure limit. Users must use a respirator that is approved by the National Institute for Occupational Safety and Health (NIOSH) or the Occupational Safety and Health Administration (OSHA).
