FOR USE IN ORGANIC PRODUCTION

For control of adult mosquitoes in Outdoor Residential, Recreational and Agricultural Areas
Contains pyrethrins - a botanical insecticide derived from chrysanthemums

ACTIVE INGREDIENT:
Pyrethrins, a botanical insecticide ............................................................................................................................................................................... 5.0%

OTHER INGREDIENTS* ............................................................................................................................................................................................. 95.0%

Contains 0.41 pounds Pyrethrins per gallon

* contains petroleum distillate

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

Have product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies or information on health concerns for this product, you may call 1-800-214-7753.

IF SWALLOWED:
• Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

NOTICE TO PHYSICIAN: Contains petroleum distillate. Vomiting may cause aspiration pneumonia.

MANUFACTURED FOR
CLARKE MOSQUITO CONTROL PRODUCTS, INC.
159 N. GARDEN AVE - ROSELLE, ILLINOIS 60172

EPA Est. No.: 1021-MN-02
EPA Reg. No.: 8329-94
AL0409J

MERUS™ is a Trademark of Clarke Mosquito Control Products, Inc.

Refer to inside of label booklet for Precautionary Statements and Directions for Use including Storage and Disposal.
Do not apply more than 0.2 lb a.i. per acre in any treated area. More frequent treatments may be made to prevent or control a threat to public and/or animal health determined by a state, tribal, or local health or vector control agency on the basis of documented evidence of disease causing agents in vector mosquitoes or the occurrence of mosquito-borne disease in animal or human populations, or if specifically approved by the state or tribe during a natural disaster recovery effort.

WIND SPEED: Apply only when wind speed is greater than 1 mph.

MERUS 2.0 may be used undiluted or diluted with suitable light mineral oil and applied as a ultra low volume (ULV) non-thermal aerosol (cold fog) or in suitable mechanical spray equipment. MERUS 2.0 cannot be diluted in water.

MERUS 2.0 may be used to control adult mosquitoes in mosquito control program including residential, industrial, recreational, and agricultural areas, in vegetation surrounding swamps, marshes, overgrown waste areas, roadsides and pastures and other areas adult mosquitoes occur. For best results, treat when mosquitoes are most active. Application during the cool hours of the night or early morning is usually preferable, with a minimum application temperature of 50°F.

SPRAY DRIFT MANAGEMENT for WIDE AREA MOSQUITO ABATEMENT: A variety of factors including weather conditions (e.g., wind direction, wind speed, temperature, relative humidity) and method of application (e.g., ground, aerial) can influence pesticide drift. The applicator must evaluate all factors and make appropriate adjustments when applying this product.

GROUND-BASED WIDE-AREA MOSQUITO ABATEMENT APPLICATION: Spray equipment must be adjusted so that the volume median diameter is less than 30 microns (Dv 0.5 < 30 μm) and that 90% of the spray is contained in droplets smaller than 50 microns (Dv 0.9 < 50 μm). Directions from the equipment manufacturer or vendor, pesticide registrant, or a test facility using a laser-based measurement instrument must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressure at the nozzle and nozzle flow rate(s) are properly calibrated.

To control mosquitoes, apply MERUS 2.0 using any standard ULV vehicle-mounted applicator capable of producing a non-thermal (cold fog) aerosol spray cloud with appropriately sized droplets. Apply undiluted at a flow rate of 3.0 to 4.7 fluid ounces per minute at an average vehicle speed of 10 mph. If a different vehicle speed is used, adjust rate accordingly. These rates are equivalent to 0.0016 to 0.0025 pounds active ingredient per acre. Within this range, vary flow rate according to vegetation density and mosquito population. Use higher rate in heavy vegetation or when pest population numbers are high.

If dilution is preferred, adjust the flow rate accordingly to achieve 0.0016 to 0.0025 pounds a.i./Acre. Application flow rates for a 1 part concentrate to 1 part oil dilution are presented. If an alternate dilution rate is used, adjust the flow rate accordingly.

Applications up to 2.50 fl oz. (0.008 lb a.i.) per acre may be made when targeting Aedes taeniorhynchus or other difficult to control species.

Urban ULV mosquito control: for control of resting or flying adult mosquitoes in areas such as utility tunnels, pipe chases, underground basements, underground passages, parking decks, crawl spaces or uninhabited buildings. Apply using handheld or truck-mounted ULV equipment, or other spray equipment suitable for this application. Apply at rates up to but not exceeding 0.0025 pounds a.i. /ac per day (0.78 fluid ounces of undiluted spray per acre per day). DO NOT use hand-held equipment for this type of application in enclosed spaces.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic organisms, including fish and aquatic invertebrates. Runoff from treated areas or deposition of spray droplets into a body of water may be hazardous to fish and aquatic invertebrates. Do not apply over bodies of water (lakes, rivers, permanent streams, natural ponds, commercial fish ponds, swamps, marshes or estuaries), except when necessary to target areas where adult mosquitoes are present, and weather conditions will facilitate movement of applied material away from the water in order to minimize incidental deposition into the water body. Do not contaminate bodies of water when disposing of equipment rinsate or wash waters.

PRESERVATION OF BENEFICIAL INSECTS

The maximum application rate for wide-area mosquito adulticide applications is 0.0025 lb a.i./acre per day. When targeting Aedes taeniorhynchus or other difficult species, applications may be made up to 0.008 lb a.i./acre/day.
MERUS 2.0 may also be applied with non-thermal, portable, motorized backpack equipment adjusted to deliver ULV particles of less than 100 microns VMD. Use 0.50 to 0.78 fl.oz. of the undiluted spray per acre (equal to 0.0016 to 0.0026 lb a.i./acre) as a 50 ft (15.2 m) swath while walking at a speed of 2 mph (3.2 kph). Dilute with a suitable mineral oil if dilution is preferred. Do NOT use portable backpack equipment for application in enclosed spaces.

AERIAL WIDE-AREA MOSQUITO ABATEMENT APPLICATION:

Spray equipment must be adjusted so that the volume median diameter produced is less than 60 microns (Dv 0.5 < 60 μm) and that 90% of the spray is contained in droplets smaller than 80 microns (Dv 0.9 < 80 μm). The effects of flight speed, and for non-rotary nozzles, nozzle angle on the droplet size spectrum must be considered. Directions from the equipment manufacturer or vendor, pesticide registrant, or a test facility using a wind tunnel and laser-based measurement instrument must be used to adjust equipment to produce acceptable droplet size spectra. Application equipment must be tested at least annually to confirm that pressure at the nozzle and nozzle flow rate(s) are properly calibrated.

Apply using nozzle height of no less than 100 feet for fixed wing aircraft or 75 feet for rotary wing aircraft above the ground or canopy, unless specifically approved by the state or tribe based on public health needs.

Apply by suitable fixed wing or rotary aircraft equipped with nozzles capable of producing a non-thermal (cold fog) aerosol spray cloud with appropriately sized droplets. Flow rate and swath width should be set so as to achieve 0.50 to 0.78 fluid ounces of undiluted MERUS 2.0 per acre.

Flow rate and swath width should be set so as to achieve 0.50 to 0.78 fluid ounces of undiluted MERUS 2.0 per acre.

MERUS 2.0 may also be diluted with suitable diluent light mineral oil and applied by suitable aircraft at appropriate flow rates to achieve a dosage of 0.0016 to 0.0025 lb a.i. per acre. Diluted or undiluted, applications up to 2.50 fl.oz. MERUS 2.0 (0.008 lb a.i.) per acre/day may be applied with non-thermal, portable, motorized backpack equipment adjusted to deliver ULV particles of less than 100 microns VMD. Use 0.50 to 0.78 fl.oz. of the undiluted spray per acre (equal to 0.0016 to 0.0026 lb a.i./acre) as a 50 ft (15.2 m) swath while walking at a speed of 2 mph (3.2 kph). Dilute with a suitable mineral oil if dilution is preferred. Do NOT use portable backpack equipment for application in enclosed spaces.

STORAGE AND DISPOSAL:

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE AND SPILL PROCEDURES: Keep this product in its tightly closed original container when not in use. Store upright at room temperature in a dry (preferably locked) area that is inaccessible to children and animals. Avoid exposure to extreme temperatures. In case of spill or leakage, soak up with an absorbent material such as sand, sawdust, earth, Fuller’s earth, etc. Dispose of with chemical waste.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Do not contaminate water, food or feed by storage or disposal.

Wait for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling if available or reconditioning if appropriate, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

NOTICE: To the extent consistent with applicable law, Clarke Mosquito Control Products, Inc. makes no other warranties, express or implied, of merchantability or of fitness for a particular purpose or otherwise, that extend beyond the statements made on this label. To the extent consistent with applicable law, Buyer assumes all risk of use/handling of this material when use and/or handling is contrary to label instructions.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

Have product container or label with you when calling a poison control center or doctor, or going for treatment. For medical emergencies or information on health concerns for this product, you may call 1-800-214-7753.

IF SWALLOWED:

• Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

NOTICE TO PHYSICIAN: Contains petroleum distillate. Vomiting may cause aspiration pneumonia.
For control of adult mosquitoes in Outdoor Residential, Recreational and Agricultural Areas

This product is toxic to aquatic organisms, especially fish and invertebrates. Runoff from treated areas or disposal of spray solutions into a body of water may be hazardous to fish and aquatic invertebrates. Do not apply over bodies of water (lake, river, stream, permanent irrigation) near fish nurseries, commercial fish ponds, or shrimp farms, or where fish or other aquatic organisms are present. Always evaluate the possibility of spray drift to water bodies. Waste water disposal systems and areas which are outlets for such systems may be exposed when spraying. Prevent water disposal systems from coming into contact with spray drift.

USER SAFETY Recommendations:
• Keep this product away from children or pets. Do not give anything by mouth to a unconscious person. Do not administer drug or medicine. Do not give any liquid to the person. Do not give any thing by mouth to a unconscious person.

Keep out of reach of children.

CAUTION
---

This product contains petroleum distillate. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing before re-use. Protracted or frequent repeated skin contact may cause allergic reactions in some individuals.

FOR USE IN ORGANIC PRODUCTION

For control of adult mosquitoes in Outdoor Residential, Recreational and Agricultural Areas, MERUS 2.0 may be used in organic production. MERUS 2.0 is approved by the United States Department of Agriculture, Agricultural Research Service, Mosquito and Vector Control or Mosquito Abatement District personnel, or persons under direct supervision.

This pesticide is toxic to aquatic organisms, including fish and aquatic invertebrates. Runoff from treated areas or dispersion of spray droplets into a body of water may be hazardous to fish and aquatic invertebrates. Do not apply over bodies of water, lakes, permanent streams, ponds, shores, swamps, marshes, man-made reservoirs, or areas adjacent to such water bodies where deposition of equipment rinsate or wash waters. Applications up to 2.50 fl.oz. (0.008 lb a.i.) per acre/day may be made when targeting: Aedes aegypti/aegypti-like or other difficult to control species.

SAFETY PRECAUTIONS

Hazardous to Humans, Pesticides. Wash hands with plenty of soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

User Safety Recommendations: Follow manufacturer’s instructions for cleaning spraying equipment. Pesticides, when handled and used properly in accordance with these instructions, are not known to be harmful to the health and well-being of the general population.

Pesticide Disposal: Washes, cleaners, and equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate the water. The equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate the water. The equipment or mix tank.

Storage and Disposal:
Do not contaminate water, food or feed by storage or disposal. Do not apply directly to, or within 100 feet of, any watercourse, water-filled containers, or other aquatic body. Keep out of reach of children. Avoid exposure to extreme temperatures. In case of spill or leakage immediately clean up. Do not use in or near wells or bodies of water (lakes, rivers, permanent streams, natural ponds, commercial fishing, aquaculture ponds, marinas, or other bodies of water). Do not apply this product in a manner inconsistent with its labeling. It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
