**DIRECTIONS FOR USE**

**METHOD OF APPLICATION:**

This product is designed to dissolve slowly, providing a steady source of available chlorine and copper in swimming water for comfort and crystal clear water. Use GLB® products to prevent algae and clarify water stabilized for extended chlorine life.

GLB® products to prevent and control algae growth in swimming pools. Use this product to dissolve and disperse before adding additional GLB® products to the pool. Use a new chlorinating device or any device which has been cleaned and prepared according to directions in the GLB® manual. This product is intended for use in any chlorinating device which has been used alone or with any other tablets or sticks in the same container. DO NOT use this product in any chlorinating device which has been used with other water treatment products before putting this product in the water. Use in any chlorinating device which has been used with other water treatment products, away from this product.

**NOTE TO USER:**

- **Contamination or improper use may cause fire, explosion or the release of toxic gases.**
- **Do not remove floater or other dispensing device from water for more than five minutes if it contains a tablet or tablet residue.** • Can react with other materials, including other water treatment products, to cause fire, explosion, and the release of toxic gases. • Can cause decomposition – Do not reseal container. Immediately dispose. • Can react with other products to the pool. • Do not mix this product with a small amount of water. Only add directly to your pool. Do not remove floater or other dispensing device from water for more than five minutes if it contains a tablet or tablet residue. If product is exposed to small amounts of water, it can react to cause contamination or improper use. DO NOT use bare hands when handling product. DO NOT use in floaters or feeders that have been used with other water treatment products, to cause fire, explosion, and the release of toxic gases. Use in any chlorinating device which has been used alone or with any other tablets or sticks in the same container. DO NOT use this product in any chlorinating device which has been used with other water treatment products before putting this product in the water. Use in any chlorinating device which has been used with other water treatment products, away from this product.

**WARNING:**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

- **Causes irreversible eye burns and skin irritation. May be fatal if inhaled. Harmful if swallowed.**
- **Probable mucosal damage may contraindicate the use of gastric lavage.**
- **Note to Physician:**
  - IF IN EYES: Hold eye open and rinse slowly and gently with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.**
  - IF INHALED: Move person to fresh air. If person is not breathing, give artificial respiration. Do not use breathing equipment unless trained to do so.**
  - IF SWALLOWED: Immediately call a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.**
  - IF ON SKIN OR CLOTHING: Take off contaminated clothing before reuse. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.**
  - **FIRST AID:**
    - • Remove and wash contaminated clothing before reuse.**
    - • Keep away from heat and from flame and burning material (like a lighted cigarette).**
    - • Do not breathe dust or vapor.**
    - • Keep out of reach of children.**
    - • Keep container closed and store in a cool, dry place.**
    - • This product is flammable.**
    - • Store away from sources of ignition, do not expose to heat or open flame. Nonrefillable container. Do not keep for more than five years after manufacturing.**
    - • Do not contaminate water, food, or feed by storage or disposal.**
    - • For further information on proper handling and disposal, contact the manufacturer or supplier.**
    - • Do not incinerate.**
    - • **METHOD OF DISPOSAL:**
        -• Remove container to an open and well-ventilated outdoor area by itself. Flood with large amounts of water. Dispose of empty container by scrubbing for recycling if available. If not, discard in the trash on the surface of the ground.**
        -• Rinse empty container with water before recycling or discarding.**
        -• Keep this product dry in its tightly closed container when not in use.**
        -• Do not reuse or refill this container. Rinse empty container with water before recycling or discarding.**

**ENVIRONMENTAL HAZARDS:**

- • Keep away from sources of water.**
- • Do not contaminate water, food, or feed by storage or disposal.**
- • For further information on proper handling and disposal, contact the manufacturer or supplier.**
- • Do not incinerate.
GLB Triple Tab

3-IN-1 ACTION
SANITIZER, PREVENTS ALGAE AND CLARIFIES WATER
STABILIZED FOR EXTENDED CHLORINE LIFE

KEEP OUT OF REACH OF CHILDREN
DANGER

ACTIVE INGREDIENTS
Chlorine Tris (methylennediyl) Triamine............84%
Sodium Hypochlorite..............................16%
TOTAL........................................100.0%
Trichloro-s-Triazinetrione.......................93.5%
OTHER INGREDIENTS....................5.0%

STABILIZED FOR EXTENDED CHLORINE LIFE

If product is exposed to small amounts of water, it can react to cause explosive products.
Do not allow product to contact any foreign matter, including other water treatment
Contamination or improper use may cause fire, explosion or the release of toxic gases.

3-IN-1 ACTION

71445A

If used with any other tablets or sticks in the same device, do not use with any other product.

DO NOT
Use in skimmers, floaters, or feeders.

DO NOT
Use in skimmers.

DO NOT
Use in floaters or feeders that have been used with other water treatment products.

METHOD OF APPLICATION:
Add one tablet per 10,000 gallons of pool water every week or as often as needed to maintain a chlorine residual at 1.0 to 4.0 ppm.

ROUTINE CHLORINATION:
Add one tablet per 10,000 gallons of pool water after shock treatment, thoroughly clean pool by scrubbing, and after rainstorms, or if algae does develop with resulting green color and slimy feeling.

SHOCK TREATMENT:
Add one tablet per 10,000 gallons of pool water as measured with a reliable test kit.

NECESSARY, REPEAT THE PROCEDURE.
POOL MUST NOT BE ENTERED
UNTIL THE CHLORINE RESIDUAL IS 1-4 PPPM.

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS:

STORAGE AND DISPOSAL:

IN CASE OF EMERGENCY CALL:
PMS 109

Available Chlorine: 84%
Total Alkalinity: Acceptable Range of Balance
pH: 1-4 ppm
