ProGuard Ablative

Black NAU993

KEEP OUT OF REACH OF CHILDREN

WARNING
SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENT

ACTIVE INGREDIENT:
CUPROUS OXIDE 41.97%
INERT INGREDIENTS 58.03%
COTTON FIBER 100.00%
CONTAINS PETROLEUM DISTILLATES
EPA EST. NO. 2893-NJ-1
EPA REG NO. 2893-142

NET CONTENTS:
ONE GALLON
(3.785 LITERS)
PRO GUARD ABLATIVE

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: This product uses Abrasive Copolymer technology to enable it to wash away with use. It constantly exposes fresh and effective abrasive. This Abrasive Copolymer technology also eliminates the buildup of old spent coatings and the heavy work needed to remove them. This product provides season-long protection against algae, barnacles and other forms of marine fouling in waters with moderate to heavy fouling. For use in fresh, salt and brackish waters.

COMPATIBILITY: This product can be applied over existing antifouling systems with the old coating tightly adhered and is in sound condition. When applying over conventional antifouling paints, thoroughly sand with 80 grit wet-or-dry sandpaper. Soft, rough-based coatings should be removed prior to application of this product.

VOC: Less than 370 grams/liter

COATS REQUIRED: 2 coats. 3 coats on bare wood.

THINNING: Thin only if necessary. Do not exceed 10% by volume.

THINNER: Interlux Brush Ease 433

DAYS BEFORE USE: Touch-up 2 hours, 77°F (25°C) To recoat - 16 hours

CLEAN UP: Interlux® Brush Ease 433

THEORETICAL COVERAGE: 455 sq. ft./gallon/coat

APPLICATION TEMPERATURE: 60°F (16°C) and above

APPLICATION SYSTEMS

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of old paint and contamination by sanding the entire surface well with 80 grit sandpaper. Wipe surface clean with Interlux Special Thinner 216. Stir thoroughly. Touch up bare areas. Apply two full coats of this product by brush or 3/8 inch roller. Do not apply thinned coats. If using application, the brush or roller dries thin with Interlux® Brush Ease 433 to improve handling. See compatibility section for additized systems.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux® Fiberglass Primer® 200 for fiberglass and epoxy surfaces. Interlux® Primer® 199 for wood and by sandblasting underwater metals to rear white metal. Proceed with application system for bare wood as described below.

FIBRIGLAS® - (POLYESTER OR VINYL ESTER)

SURFACE PREPARATION: Wash entire surface thoroughly with Interlux® Fiber/pansolvant Wash 202 changing rags frequently. Before liquid dries, wipe with a clean dry cloth. Be sure all wax and other contamination is removed. Failure to properly clean the surface will result in paint delamination. Sand any imperfections and repair with Interlux® Surfacing and Filling Compound 417A/418B sand and wipe clean. Sanding does not remove surface contamination.

FIBRIGLAS® - NO SAND SYSTEM: After the surface has been prepared as described above - Apply one thin continuous coat of Interlux® AL200 Fiber/pansolvan/Primer® with brush or roller. Follow label directions for overcoating. Apply two coats of this product.

FIBRIGLAS® - SANDING SYSTEM: After the surface has been prepared as described above – Sand entire surface well with 80 grit sandpaper until a flat, matte finish is obtained. Wipe off sanding residue with Interlux® Fiber/pansolvan Solvent Wash 202 HA. Apply two coats of this product.

FIBRIGLAS® - BAREWOOD: Remove any surface contamination by wiping with Interlux Special Thinner 216. Sand entire surface with 80 grit sandpaper. Wipe off sanding residue with Interlux Special Thinner 216. Repair any imperfections with Interlux Surfacing and Filling Compound 417A/418B sand and wipe clean. Apply first coat of this product reduced with Interlux® Brush Ease 433 (10% maximum). Apply two additional coats unthinned. Allow a minimum of 16 hours between coats. Fill seams if necessary with Interlux® Seam Compound 50 between first and second coats of antifouling paint.

UNDERWATER METALS: Contact the Interlux® Technical Service Department at 1-800-400-7606 for full details on how to properly prime underwater metals. Do not use aluminum.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS WARNING

Causes eye irritation. Harmful if inhaled through skin. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as goggles, long-sleeved cotton shirt, long pants and hat. Wear long-sleeved shirt, long pants and hat. Wear barbecue gloves with rubber gloves if necessary. May be fatal if inhaled. Do not breathe vapor or mist. While spraying paint or sanding or sandblasting boat surfaces wear a mask or a respirator jointly approved by the Mine Enforcement and Safety Administration of the National Institute for Occupational Safety and Health. Remove contaminated coating and wash before exposure. Wash thoroughly with soap and water after handling.

FIRST AID

If swallowed:

• Immediately call a poison control center or doctor.

• Do not induce vomiting unless told to do so by a poison control center or doctor.

• Do not give any liquid to the person.

• Do not give anything by mouth to an unconscious person

If on skin or clothing:

• Take off contaminated clothing.

• Wash skin immediately with plenty of water for 15-20 minutes.

• Call a poison control center or doctor for treatment advice.

If in eyes:

• Hold eye open and rinse slowly and gently with water for 15-20 minutes.

• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

• Call a poison control center or doctor for treatment advice.

Other:

• Wash the product container and label with you when disposing of a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate - vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS:

This material is toxic to fish. Do not apply directly to water by cleaning or disposal of wastes. Do not allow this or any material to enter sewers or storm drains. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans and other water bodies unless in accordance with the requirements of a National Oil Discharge Elimination System (NODS) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without the proper drain field loop. For guidance, contact your local State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Flammable. Keep away from heat, sparks or open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open drumming is prohibited.

PESTICIDE DISPOSAL: Pesticide waste are acutely hazardous. Improper disposal of excess pesticide, spray mixtures or residue is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the hazardous waste representative of the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-hazardous container. Do not reuse or refill this container. Container may be recycled. Do not keep over 1 year. Pesticide into appropriate equipment at a mix tank or store in airtight container. Drain for 10 seconds after the flow begins to drip. Fill the container to the top with water and reclose. Store for 10 seconds. Pour sludge into an appropriate equipment or a mix tank or store in airtight container. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
