NET CONTENTS
ONE U.S. GALLON (3.785 L)

YBC103
BLACK

ACTIVE INGREDIENTS
1H-PYRROLO[2,3-C]CARBONITRILE
4-BROMO-2-(4-CHLOROPHENYL)-5-(TRIFLUOROMETHYL)
ZINC 2-PYRIDINETHIOL 1-OXIDE
INERT INGREDIENTS
CONTAINS PETROLEUM DISTILLATES
ZINC PYRITHIONE

AkzoNobel

EPA EST NO. 2693-NJ-1
EPA REG NO. 2693-230
MICRON® CF

PRODUCT DESCRIPTION: Micron CF is a copper-free antioxidizing that provides excellent protection from shell and wood burning. It uses Biorad® technology to block slime and Escoa to avoid rodent and bird damage. Its natural colors and its attractive action reduces paint buildup and helps to improve fuel efficiency. Micron CF is available in bright colors and is suitable for use on both metal and wood. Its application reduces paint buildup and helps to improve fuel efficiency. Micron CF can be colored or roller applied.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. GENERAL APPLICATION PROCEDURES: For applications by Residential or Commercial means, apply as desired. Do not apply by airless spray. Do not apply more than one coat of this product within 24 hours. Apply only in outdoor, non-enclosed space. Apply at least 1-2 full coats of Micron CF by brush or roller resistant 3/8" nap roller. Do not apply thin coats. Keep in mind that the application volume is directly related to the amount of paint applied. Do not apply paint to the hull, such as the leading edge of the keel and rudder, the waterline and the bow stems, and in lesser areas of the hull. On these areas we suggest an additional coat of paint to ensure that the Micron CF does not polish away before the hull areas of the boat.

Approximate time it will take to paint your boat:

Boat Sizes / Application Time:

- 14 ft: 40 Minutes per coat
- 19 ft: 1 Hour 20 Minutes per coat
- 30 ft: 2 Hour 40 Minutes per coat

V.D.C.: Less than 300 gram/m² (7.25 lbs/gallon)

THEORETICAL COVERAGE: 155 m²/m² (215 ft²/gal)

THINNER: Special Thinner 216

THINNING: Do not exceed 10% by volume.

*Note: the air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum.

COMPATIBILITY: Micron CF is compatible with most of the antioxidizing paints and can be applied to partially submerged or painted surfaces. Thin based epoxies should be sealed or removed with Primacryl® 500 or TFI Sealer 500B.

PREPARATION

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to remove the mold release wax completely before application of the antioxidizing paint. Begin by brushing the surface thoroughly with a stiff brush using soap and water to remove dust and contamination. Flux with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following leaves: Surfmaster® Pro YM201, Fiberglass Solvent Wash 202 or Low VOC Fiberglass Solvent Wash 202C following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water breaks up or seizes, clean again. When the water clears, all contamination has been applied to the surface. BARE FIBERGLASS - NO SAND SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux® Watertite® filler. Sand and wipe clean. Apply one coat, using one of the following Interlux® products: Interflex®/Protect® 2030 or No Sand Primer YM201, following the label instructions for applying the primer and overcoating with antifouling paint. BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux® Watertite® filler. Sand and wipe clean. Apply the surface has been cleaned with sandpaper. Use a 60-grit sandpaper until a flat, mate finish has been obtained. Wipe off the sanding residue with Fiberglass Solvent Wash 202, BARE WOOD: Sand the surface thoroughly to a smooth finish with 80-grit sandpaper. Clean off the sanding residue. Prime with Primacryl® thinned 10% with Special Thinner 216 or think first coat of Micron CF 10% with Special Thinner 216. Apply two more coats of this product allowing for proper cure between each coat.

ALUMINUM & UNDERWATER METALS: Please check checklist for preparation to aluminum and underwater metals or contact Interlux Technical Service at 1-800-463-7583.

PREVIOUSLY PAINTED SURFACES: In good condition, primes and removes all contamination. Sand the entire surface with 80-grit sandpaper, remove sanding residue. In Poor Condition: Remove all previous coatings using Interlux® 298E and proceed with the system for the bare substrate.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 on bare wood) by brush or roller (Residential use). Commercial (non-residential) users may apply Micron CF by airless spray while wearing the proper protective equipment.

NOTE: Important! Do not apply Micron CF above the true waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive. Causes irreversible eye damage or skin burns. Harmful if swallowed. Avoid eye contact. Do not get in eyes, on skin or on clothing. If swallowed, rinse with water. Do not breathe dust, vapor, or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Potential health effects are not known.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear, tight-fitting, solid-color, rubberized footwear, and long-sleeved shirt and long pants. Do not inhale. In addition to those in more severe PPE, commercial users will wear a disposable coverall with hood and chemical-resistant resistant boots.

While removing existing paint by sanding or blasting, or applying new antioxidizing paint, commercial users must wear a respirator with an organic vapor removal cartridge for a approved pesticides (MSHA/NIOSH approval number NIOSH TC-263), or a cartridge approved for pesticides (MSHA/NIOSH approval number TC-1-9) or a NIOSH approved full face respirator with an organic vapor removal cartridge with a P100 filter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and filters as by commercial users.

FIRST AID

IN THE EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing. Call a Poison Control Center or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Have person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

OTHER: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, birds, and marine life. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Disposal of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, swamps, oceans or any other waters unless in accordance with the requirements of a Highway and Waterway Elimination System (WES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinse is a violation of Federal Law. If these wastes are to be disposed of by use according to labeled instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonreturnable container. Do not reuse or refills refills this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container to full with water and recapture. Shake for 10 seconds. Pour rinse into equipment application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPLOSION OR ACCIDENT, CALL TOLL FREE: CHEMTREC 1-800-463-7583 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-854-6813.
