MICRON® CF

PRODUCT DESCRIPTION: Micron CF is a copper-free antifouling that provides excellent protection from barnacles and weed growth. It uses Silox® technology to black slime and Econol to ward off crumbs and zebra mussels. The fast dry film of Micron CF allows the boat to be painted and launched quickly and its ability to reduce paint buildup helps to improve paint efficiency. Micron CF is available in bright colors and is suitable for use on all boats, including fiberglass, aluminum, wood, steel, and can be used in water ways. Micron CF can be brush or roller applied.

DIRECTIONS FOR USE: It is important to note that Federal Law prohibits the use of this product in a manner inconsistent with its labeling. GENERAL APPLICATION PROCEDURES: For applications by residents non-commercial users, do not apply by airless spray. Do not apply more than one coat of this product within 24 hours. Apply only in outdoor, non-enclosed spaces. Apply at least 3-4 coats of Micron CF by brush or resistant 5/8" roller. Do not apply thin coats. Keep in mind that the life of the paint is directly related to the amount of paint applied. Certain areas of the hull, such as the leading edge of the keel and rudder, the waterline and the bow stem polish faster than other areas. On these areas we suggest an additional coat of primer to ensure that the Micron CF does not polish away before other areas of the bottom. Allow time to walk before painting your boat.

Paint Size/Applications Time: 14' 40 minutes per coat; 20' 1 hour 20 minutes per coat; 32' 2 hour 40 minutes per coat

DRY TIME:

| Temperature (°F) | Touch Dry | Secoado | Time de Exposición Entre 
| Min | Max | Caps | Min | Max |
|-----------------|----------|---------|-----------------|----------|---------|
| 41°F (5°C)      | 6 Hours/Hours | 12 Hours/Hours | 18 Hours/Hours | N/A |
| 50°F (10°C)     | 3 Hours/Hours | 6 Hours/Hours | N/A | 9 Hours/Hours | N/A |
| 73°F (20°C)     | 2 Hours/Hours | 4 Hours/Hours | N/A | 6 Hours/Hours | N/A |
| 86°F (30°C)     | 1 Hours/Hours | 2 Hours/Hours | N/A | 4 Hours/Hours | N/A |

*Exposure to air temperature below 68°F (20°C) during the 4 hour dry time extend the dry times to 24 hours minimum.

COMPATIBILITY: Micron CF is compatible with most other antifouling paints and can be applied after sanding the surface. The bare surfacer should be removed or treated with Primcol Y645 or 1221 Sealer Y647.

PREPARATION

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to remove the mold release wax completely and prevent contamination of the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush, stainless steel, or soap and water to remove loose dirt and contamination. Wash with fresh water to remove the soap residue and rinse clean. Apply release wax using one of the following Interlux products: fiberglass Surface Pre Y649, fiberglass Solvent Wash 202 or Low VOC fiberglass Solvent Wash 202W following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water beads up or separates, clean again. When the water beads up, clean the surface following the preparation procedure above. Repeat any surface imperfections using Interlux Waterline Filler, sanding and rinse. Apply one coat, using one of the following Interlux products: Interprox 2100 or No Sand Primer Y7650, following the label instructions for applying the primer and coat over the antifouling paint. Apply a minimum of 2 layers over the fiberglass. BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure above. Repeat any surface imperfections using Interlux Waterline Filler, sanding and rinse. After the surface has been cleaned sand with 60-grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Fiberglass Solvent Wash 202, BAROC Y6412. Sand the entire surface thoroughly to a smooth finish with 80-grit sandpaper. Clean the sanding residue. Prime with Primcol Stripped 100% with Special Thinner 216 or apply one coat Micron CF. Apply two more coats of this product uninterrupted, allowing approximately dry times.

ALUMINUM, UNDERWATER METALS: Clean the surface with Interlux Waterline Filler, sanding and rinse. Apply one coat, using one of the following Interlux products: Interprox 2100 or No Sand Primer Y7650, following the label instructions for applying the primer and coat over the antifouling paint. BARE FIBERGLASS - SANDING SYSTEM: Clean the surface following the preparation procedure above. Repeat any surface imperfections using Interlux Waterline Filler, sanding and rinse. After the surface has been cleaned sand with 60-grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Fiberglass Solvent Wash 202, BAROC Y6412. Sand the entire surface thoroughly to a smooth finish with 80-grit sandpaper. Clean the sanding residue. Prime with Primcol Stripped 100% with Special Thinner 216 or apply one coat Micron CF. Apply two more coats of this product uninterrupted, allowing approximately dry times.

PREVIOUSLY PAINTED SURFACES: In General Condition. Remove all contamination. Sand the entire surface with 60-grit sandpaper; remove sanding residue. In Poor Condition: Remove all previous coatings using Interlox 2500 and proceed with the system for the bare substrate.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 on bare wood) by brush or roller (Residential users). Commercial (non-residential) users may apply one coat Micron CF by airless spray while wearing the proper personal protective equipment.

NOTE: Do not apply Micron CF above the true waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed and inhaled. Do not breathe dust, vapour or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Survey commercial (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses or face shield), long-sleeved shirt and long pants, socks and shoes. In addition to these minimum F, commercial users must wear a disposable coverall with hood and chemical resistant footwear.

While removing existing paint by sanding or blasting, or applying new antifouling paint, commercial users must wear a respirator with an organic vapour removing cartridge with a respirator approved for pesticides (MSHA/NIOSH approval number PC-730) or a respirator approved for pesticides (OSHA/NIOSH approval number TC-120 or a NIOSH approved full face respirator with an organic vapour removing cartridge with a P100 filter). Residential (non-commercial) users are advised to wear the same respirators, cartridges, and respiratory as required by commercial users.

FIRST AID

IN THE EVENT OF EXPOSURE: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Wash skin immediately with plenty of water for 15-20 minutes. Call a poison control center of doctor for further treatment advice.

Other: Have the product container or label with you when calling a poison control center or doctor for treatment advice.

NOTE to physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, oysters and shrimp. Do not apply directly to water by clearing of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been allowed in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewerage treatment plant authority. For guidance contact your State Water Board or Regional Office of the E.P.A.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are abnormally hazardous. Improper disposal of excess pesticide, soaps, mixtures or containers is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Engage all remaining contents into application equipment or a new tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour into container equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

For CHEMICAL, EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTREC 1-800-242-9330 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-242-9330.
