MicronCF
Copper Free Antifouling

KEEP OUT OF REACH OF CHILDREN
DANGER
See Side Panel for Additional Precautionary Statements

ACTIVE INGREDIENTS
1H-PYRROLE-3-CARBOXYLIC ACID, 4-BROMO-2-(4-CHLOROPHENYL)-5-(TRIFLUOROMETHYL) 3.90%
ZINC 2-PYRIDINETHIOL 1-OXIDE* 4.12%
INERT INGREDIENTS 91.08%
CONTAINS PETROLEUM DISTILLATES (ZINC PYRITHIONE)

MICRON® CF

PRODUCT DESCRIPTION: Micron CF is a copper-free antifouling that provides excellent protection from shell and weed fouling. It uses BiocidX® technology to block slime and encrustation without losing full efficacy and maximum effectiveness. The fast dry formula of Micron CF allows the boat to be painted and launched quickly and its cation action reduces paint build-up and helps improve fuel efficiency. Micron CF is available in bright colors and is suitable for use on all boat types including fiberglass, aluminum, wood, steel, and can be used in well water. Micron CF can be brushed or roller applied.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURES: For applications by residential/non-commercial users: Do not apply by airless spray. Do not apply more than one coat of this product within 24 hours. Apply only to outdoor, non-environmental spaces. Apply at least 2-3 full coats of Micron CF by brush or solvent resistant 3/8" roller. Do not apply this coating. Keep in mind that the life of the paint is directly related to the amount of paint applied. Certain areas of the hull, such as the leading edge of the keel and rudder, the waterline and the bow stem polish thicker than other areas. On these areas we suggest an additional coat of paint to ensure that the Micron CF does not polish away before other areas of the bottom. Approximate time it will take to paint your boat:

Boat Size / Application Time:
14' / 40 Minutes per coat
16' / 1 Hour 20 Minutes per coat
20' / 2 Hour 20 Minutes per coat
22' / 2 Hour 40 Minutes per coat
1000 lbs. / More than 3000 lbs.

THEORETICAL COVERAGE: 520 lb/gal (250 lb/2.5 gal) DRY FILM THICKNESS: 10 mils

THINNING: Do not exceed 10% by volume.

"The air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum."

COMPATIBILITY: Micron CF is compatible with most sealers, polishes, and can be applied after sanding the surface. The coated layers should be removed or sealed with Interlux YP694 or TSB® Sealer YP694.

PREPARATION

BARE FIBERGLASS: It is very important that bare fiberglass be properly prepared to remove the mold release wax completely to prevent contamination of the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove latex dirt and contamination. Finish with fresh water to remove the soap residue and allow to dry. Remove mold release wax using one of the following cleaning agents:

- Fibreglass Surfa YP6501
- Fibreglass Surfacer Wash 202
- Low VOC Fibreglass Surfacer Wash 202X following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water breaks up or separates, clean again. When the water sheeted off, all contamination has been removed.

BARE FIBREGLASS – NO SAND SYSTEM Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Witterlite Filler. Sand and wipe clean. Apply one coat, using one of the following Interlux Products InterProtect2000 or No Sand Primer YP2000, following the label instructions for applying the primer and allowing with antifouling. BARE FIBREGLASS – SANDING SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Witterlite Filler. Sand and wipe clean. When the surface has been cleaned sand with 80-grit sandpaper until a flat, matte surface has been obtained. Wipe off the sanding residue with Fibreglass Surfacer Wash 202X. Sand the entire surface thoroughly to a smooth finish with 80-grit sandpaper. Polish off the sanding residue. Prime with Primcote Bledex 100% with Special Thinner 216 or thick first coat of Micron CF 10-15% with Special Thinner 216. Apply two more coats of this product over the primer, allowing to dry.

ALUMINUM & UNDERWATER METALS: Please check datasheet for preparation to aluminum and underwater metals or contact Interlux Technical Service at 1-800-468-7585.

PREVIOUSLY PRINTED SURFACES: In Good Condition, Remove all contamination. Sand the entire surface with 80-grit sandpaper; remove sanding residue. In Poor Condition: Remove all previous coatings using Interlining YP600 and proceed with the primer for the bare substrate.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 oz bare wood) by brush or roller (Residential users). Commercial (non-residential) users may apply Micron CF by airless spray while retaining the proper personal protective equipment.

NOTE: Importants: Do not apply Micron CF above the true waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS KEEP OUT OF REACH OF CHILDREN

DANGER

Carcinogenic. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed and inhaled. Do not breathe dust, vapour or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wear suitable impermeable worksuit. Use respiratory protection if dust is generated. In addition to the minimum PPE, commercial users must wear a respirator with an organic vapor removing cartridge with a prefilter approved for pesticides (NOSH/OSHA approval number plexus TC-240), or a canister approved for pesticides (NOSH/OSHA approval number TC-14) or a NIOSH approved full face respirator with an organic vapor removing cartridge with a P100 prefilter. Residential (non-commercial) users are advised to wear the same respirators, cartridge, and prefilters as required by commercial users.

FIRST AID

In the eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

If swallowed: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If inhaled: Remove to fresh air. If not breathing, give artificial respiration or mouth to mouth resuscitation if possible. Call a Poison Control Center or doctor for further treatment advice.

Note to physicians: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by cleaning of equipment or disposal of waste. Do not allow ships and grit dust generated during paint removal to enter water. Disperse of paint debris is an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rags is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the filter begins to drip. Fill the container with water and let stand for 5 minutes. Drain off water and recaps. Shake for 10 seconds. Pour into application equipment or a mix tank or store reseal for later use or dispose. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTRAC 1-800-424-0500 (DAY OR NIGHT) MEDICAL ADVISORY, CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-554-5812.
