NET CONTENTS
ONE U.S. GALLON (3.785 L)

YBC104
SHELL WHITE

ACTIVE INGREDIENTS
1H-PYRROLE-3-CARBOXANILIDE, 4-BROMO-2-(4-CHLOROPHENYL)-5-(TRIFLUOROMETHYL)
3.90%
ZINC 2-PYRIDINETHIOL 1-OXIDE* 4.12%
INERT INGREDIENTS 31.98%
100.00%

CONTAINS PETROLEUM DISTILLATES *ZINC PYRITHIONE

EPA EST NO. 2693-NJ-1
EPA REG NO. 2693-230

AkzoNobel
MICRON® CF

PRODUCT DESCRIPTION: Micron® CF is a copper free antifouling that provides excellent protection from shell and weed fouling. It uses Interlux’s technology to block slime and encrustation on hulls and keels. It can also be applied as a barrier coat. The antifouling action does not build up and helps to improve fuel efficiency. Micron® CF is available in bright colors and is suitable for use on all boats including fibreglass, aluminum, wood and steel and can be used in well water. Micron® CF can be brush or roller applied.

DIRECTIONS FOR USE: It is in violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL APPLICATION PROCEDURE: For applications by residential and non-commercial users: Do not apply by airbrush. Do not apply more than one coat of this product within 24 hours. Apply only in outdoor, well-ventilated, non-enclosed spaces. Apply at least 2-3 full coats of Micron® CF by brush or paint resistant 3/8" or roller. Do not apply thin coats. Keep in mind that the life of the paint is directly related to the amount of paint applied. Areas of the hull, such as the leading edge of the bow and rudder, the transom and the stern step will wear faster than other areas. On these areas we suggest an additional coat of paint to ensure that the Micron® CF does not peel away before other areas do. Approximate time it will take to paint your boat: Brush Size / Application Time: 14" x 40" Brushes per coat: 30' 1 Hour 20 Minutes per coat / 30' 2 Hour 40 Minutes per coat

VOC: Less than 300 grams/liter (2.75 lbs/gallon)

THEORETICAL COVERAGE: 228 ft²/gal (dry film thickness).

THINNER: Special Thinner 216

HARDENING: Do not exceed 15% by volume.

*If the air temperature falls below 41°F (5°C) during the 4 hour dry time extend the dry times to 24 hours minimum.

COMMUNITY CLEANUP: Micron® CF is compatible with most other antifouling paints and can be applied over existing European paints after applying the product to the surface. Tin based epoxies should be removed or sealed with Primocyn YP084 or TBI™ SteriSeal YP087.

PREPARATION

BARE FIBREGLASS: It is very important that bare fiberglass be properly prepared to remove the mold release completely to prevent delamination of the antifouling paint. Begin by scrubbing the surface thoroughly with a stiff brush using soap and water to remove loose dirt and contamination. Flush with fresh water to remove the soap residue and allow to dry. Remove mold release was using one of the following: Bare Pre YP606, Fibreglass Solvent Wash 232 or Low VOC Fibreglass Solvent Wash 262V following the product label instructions. To be certain that all of the contamination has been removed, run water over the surface. If the water runs up or seeps, clean again. When the water sheet off, all contamination has been removed. BARE FIBREGLASS – NO SANITIZED SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Waterfiller. Sand and wipe clean. Apply one coat, using one of the following: Interuro Pre P1.0 or Super Paint Primer 2090 or Sand Primer Primer 2000, following the label instructions for applying the primer and overcoating with antifouling paint. BARE FIBREGLASS – SANITIZED SYSTEM: Clean the surface following the preparation procedure above. Repair any surface imperfections using Interlux Waterfiller. Sand and wipe clean. After the surface has been cleaned sand with 80-grit sandpaper until a flat, matte finish has been obtained. Wipe off the sanding residue with Primocyn Solvent Wash 232. BARE WOOD: Sand entire surface thoroughly to a smooth finish with 80-grit sandpaper. Clean off all sanding residue. Prime with Primocyn Thinned 10% with Special Thinner 216. Apply two coats of Micron CF 10-15% with Special Thinner 216. Apply two more coats of this product until the prime is dry, clean off all sanding residue. ALLUMINUM & UNDERWATER METALS: Please check distribution for preparation to aluminum and underwater metals or contact Interlux Technical Service at 1-800-468-9559.

PREVIOUSLY PAINTED SURFACES: In Good Condition. Remove all contamination. Sand the entire surface with 80-grit sandpaper; remove sanding residue. Poor Condition: Remove all previous coatings using Interstrip 2005 and proceed with the system for the bare substrate.

APPLICATION

After the surface has been properly prepared and cleaned as above, apply two coats of Micron CF (3 or 6 oars) by brush or roller. (Residential users) Commercial (non-Residential) users may apply Micron CF by airless spray while wearing the proper personal protective equipment.

NOTE: Important: Do not apply Micron CF above the waterline.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

DANGER

Concise. Causes irreversible eye damage or skin. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed and inhaled. Do not breathe dust, vapors or smoke. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses or face shield), long sleeved shirt and long pants, socks and shoes. In addition to this, minimum PPE, commercial users must wear a disposable coverall with hood and chemical resistant footwear.

While removing existing paint by sandblasting, or applying any new antifouling paint, commercial users must wear a respirator with an organic vapour removing cartridge in a prefiltered approved for pesticides (NOSH/NOSH approval number prefix TC-265), or a canister approved for pesticides (MSHA/NOSH approval number prefix TC-14) or a NIOSH approved full face respirator with an organic vapour removing cartridge with a P100 prefilter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilter as required by commercial users.

FIRST AID

IN THE EVENT OF EXPOSURE: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and then continue rinsing. Call a Poison Control Centre or doctor for treatment advice.

IF SWALLOWED: Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible. Call a poison control center or doctor for further treatment advice. Other: Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to physician: Contains petroleum distillate – vomiting may cause aspiration pneumonitis.

ENVIRONMENTAL HAZARDS

This material is toxic to fish, aquatic invertebrates, oysters, and shrimp. Do not apply directly to water by pouring of equipment or disposal of wastes. Do not allow or direct the dying or disposal of paints into lakes, streams, ponds, estuaries, storm drains, or other waters unless in accordance with the requirements of a National Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

FLAMMABLE: Keep away from heat and open flame.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Store in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste representative at the nearest EPA Office.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour into application equipment or a mix tank or rinse water for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

For CHEMICAL EMERGENCY, SPILLS, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMREC 1-800-434-0800 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-345-4812.
