SUPER PRO GUARD

PRODUCT DESCRIPTION
This product provides multi-season antifouling protection against barnacles, algae and hydroids in salt and fresh water on boat bottoms only. Its cobalt-based propylene imide polymer base resists growth, smooths finish with durability and abrasion resistance. It resists glaze by the constant exposure of new paint film to the water. It has a universal application over all types of properly prepared bottom paints (except aluminum). For use on fast fiberglass boats, as well as wood and steel hulls. Extended protection is possible, since performance is directly proportional to the amount of paint applied.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

SURFACE PREPARATION
Surfaces must always be clean, dry and properly prepared prior to painting. Failure to do so will lead to eventual blistering and/or peeling. All sandblasted surfaces must be cleaned with Interlux Fiberglass Solvent Wash 202 to remove sanding residue.

GENERAL APPLICATION
For use on boats below the waterline. Can be brushed or rolled on fiberglass, wood, steel and previously painted surfaces per application systems below. Do not use on aluminum. Apply at least 3 coats for best performance. The life of the paint is proportional to the number of coats applied.

MIXING AND THINNING
Shake or mix thoroughly and stir continuously while using. Thin when necessary with Interlux Special Thinner 216; Brush Base 433.

THEORETICAL COVERAGE
Depending on surface and conditions, one gallon of bottom paint will usually cover over 350 square feet of surface when brushed or rolled.

CLEAN UP
Interlux Special Thinner 216 for cleaning equipment and paint brushes.

ESTIMATED DRY TIMES
Bottom coats are designed for overcoating after one day. Prior to launching, allow 24 minimum dry of overnight and maximum of 60 days. If drying conditions are poor, or if paint was applied too thickly, longer periods of drying will be required. Fresh coats of paint must be thoroughly dry before overcoating.

YEARLY REPAINTING
Scrub bottom clean at haul-out. Repaint only if old paint is sound and light. If not, remove it by sanding or with paint remover. If old paint is rough, sand it with 100-150 grit sandpaper. Prepare sealer, nicks and chips as below. Spot coat any rough with antifouling. Apply 3 coats of antifouling.

ON BARE WOODS: If seams are not flush, fill them with sealant compound; dry several days until the seam forms. Do not sand. Fill nicks with Interlux Interprotect Waterlites WA1135. Dry hard, sand, apply Interlux Primer 3000. Then apply 3 coats of antifouling.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: This product is flammable. Do not smoke or use open flames around the product. Keep out of reach of children.

MATERIALS HANDLING:
- Avoid breathing dust and mist.
- Avoid contact with skin, eyes or clothing.
- Wash hands thoroughly with soap and water after handling.

FIRST AID:
- If swallowed: Call a poison control center or doctor for treatment advice.
- If inhaled: Call a poison control center or doctor for treatment advice.

ENVIRONMENTAL HAZARDS:
This product is toxic to fish. Do not apply directly to water by clearing of equipment or disposal of wastes. Do not allow spills and dust generated during paint removal to enter water. Do not discharge effluent containing this product into lakes, streams, ponds, seas, oceans, or other waters unless in accordance with the permits of the National Discharge Elimination System (NDES) permit program. The permitting authority has been notified in writing prior to discharge.

PHYSICAL AND CHEMICAL HAZARDS:
Physical characteristics:
- Odor: Odorless
- Appearance: Clear yellow

STORAGE AND DISPOSAL:
Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL:
Pesticide wastes are hazardous substances. Improper disposal of excess pesticides, empty containers, or debris is prohibited. Used residues or degradates of this pesticide must be disposed of in a manner that will not be hazardous to the environment. Do not contaminate water, food, or feedstuff with the active ingredient or malign materials. If this product is disposed of improperly, it may be harmful to the environment.

CONTAINER DISPOSAL:
Non-refillable containers. Do not reuse or refill container.
