WOOD guard® XL

EXTERIOR WOOD PRESERVATIVE AND FINISH

LASTS 3-5 YEARS • OIL-BASED WOOD PRESERVATIVE
- CONTROLS SURFACE MOLD, DECAY & MILDEW • MEETS ALL VOC STANDARDS
- EXCEPTIONAL WATER REPELLENCY • THE SUPERIOR DEEP PENETRATING TREATMENT
- CONTAINS SYNERGISTIC FUNGICIDES (U.S. PATENT NO. 5200421)

KEEP OUT OF REACH OF CHILDREN
WARNING
SEE BACK PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

INGREDIENTS:
ACTIVE INGREDIENTS:
3-iodo-2-Propynyl Butyl Carbamate ........................................ 0.450%
Propiconazole: 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]-methyl]-1H,1,2,4-triazole ........................................ 0.125%
OTHER INGREDIENTS: .......................................................... 99.425%
TOTAL ................................................................. 100.000%
THIS PRODUCT CONTAINS PETROLEUM DISTILLATES

WOODguard® X11

IDEALLY SUITED FOR LOG HOMES, ROOFS, SIDING, AND FENCES
ESPECIALLY ROUGH SAWN LUMBER
OLD WEATHERED WOOD
NEW POROUS WOODS
Test before using on smooth dense wood.
Do not use on painted surfaces.
WOODGUARD® XL must penetrate to be effective.
Wood must be dry before application (less than 18% moisture).

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes skin irritation. Do not get on skin or on clothing. Avoid contact with eyes. Wear coveralls over long-sleeved shirt and long pants and chemical resistant gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE):

- Coveralls over long-sleeved shirt and long pants
- Shoes plus socks
- Chemical resistant gloves
- For Cleaning Equipment: Chemical resistant apron

USER SAFETY REQUIREMENTS:

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS:

- Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Users should avoid clothing immediately if pesticide gets inside. Then wash thoroughly and put on cleaning clothing.
- Use personal protective equipment immediately after handling this product. Wash outside of gloves before removing. As soon as possible, wash thoroughly.

FIRST AID

IF SWALLOWED:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Avoid inducing vomiting unless told to by a poison control center or doctor.
- Do not give anything to an unconscious person.

IF IN EYES:

- Hold open eye and rinse slowly and gently with water for 15 - 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 - 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for further treatment advice.

IN CASE OF EMERGENCY, call Chemtrec toll free at 800-424-9300. Have the product container or label with you when calling a poison control center or doctor for going for treatment.

NOTE TO PHYSICIAN: This product contains petroleum distillates. Vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and shrimp. DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do NOT discharge effluent containing this product to sewer systems without notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the Environmental Protection Agency.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PECTICIDE STORAGE: Store in a secure, well-ventilated area protected from extreme temperatures. Do not transfer to unmarked containers. Keep container closed when not in use.

PECTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable containers. Do not reuse or refill this container.

IF IN PLACE in trash or offer for recycling if available.
If Partially Filled: Call your local solid waste agency or 1-800-CLEANNUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

WOODGUARD® X11 is an oil-based, transparent preservative designed for log homes, wood shingle roofs, siding, and fences. WOODGUARD® X11's oil formulas provide long-term protection by penetrating deeply into the wood. It achieves maximum performance on rough sawn lumber, old weathered wood and new porous wood. Where maximum penetration results in exceptional water repellency on sloping roofs and vertical surfaces; horizontal surfaces are normally subjected to more severe weathering and will usually require easier retreatment. In harsh exposures involving standing water, retreatment may be required annually to maintain water repellency.

Surfaces treated with a semi-transparent stain (non-film forming) may be satisfactorily recoated with WOODGUARD® X11 when a superior, water repellent wood preservative is desired. If WOODGUARD® X11 is applied to non-porous or film-covered surfaces which prevent or significantly retard penetration, reduced performance or even complete failure can result. Test first if in doubt.

See the WOODGUARD Preparation and Application Guide for guidelines on the application of the wood surface for WOODGUARD® X11 application.

WOODGUARD® X11 combines controlled evaporation with unique and EXCEPTIONAL WATER REPELLENCY THAT WITHSTANDS OUTDOOR VERTICAL WEATHERING, ESPECIALLY ON OLD, CRACKED, WEATHERED WOOD. WILL LAST 3 - 5 YEARS.

WOODGUARD® X11 cannot chip, crack or peel. When applied as directed, it leaves a uniform, streak-free appearance.

WOODGUARD® X11 protects and extends service life by inhibiting mold and decay, as well as cupping and warping. A single coat application is recommended for 3 to 5 years on vertical surfaces. Always apply to the point of refusal. Double coat applications are not needed or recommended.

WOODGUARD® X11 cleans up with water and detergent at time of application - provided it has not soaked into the surface. Cured WOODGUARD® X11 will clean up with paint thinners or mineral spirits.

WOODGUARD® X11 (clear) temporarily darkens wood color which later greys after weathering. Use pigment WOODGUARD® X11 to help hide this grayed effect.

DIRECTIONS FOR USE

It is a violation of Federal Law to use WOODGUARD® X11 in a manner inconsistent with the directions on this label. Do not apply WOODGUARD® X11 until plants are hardened off and no longer under stress. Do not allow adults, children, or pets to enter the treated area until sprays have dried. Do not apply this product in a way that will contact adults, children, or pets.

Apply liberally to log buildings, roof, wood siding, or fence by simply wetting down the surface as follows:

Spray - Do not use airless spray equipment. Use a garden-type, pump-up sprayer with adjustable nozzle. Set nozzle to deliver a low pressure, coarse spray and brush back as necessary.

Brush - A regular paint brush is fine for most surfaces. For uneven shingle or rough surfaces, use stiff wire brushes. Apply evenly, brushing out sags, etc. as necessary.

Roller - Use a long nap for rough surfaces.

ONE COAT IS SUFFICIENT. Surface must be clean and free of all loose debris. Apply to dry wood for maximum penetration and fastest drying. Wood must be dry before application (less than 18% moisture).

Avoid contact with plants, shrubs and trees.

NOTE:

1. The wood surface must be clean before application. See the Preparation and Maintenance Guide for cleaning directions.
2. Stir or shake well before use.
3. WOODGUARD® X11 goes on "dark" but lightens considerably during the curing period.
4. Cure time will range from 4 days to 2 weeks, depending on temperature and wood porosity.
5. Coverage: 150 to 300 sq. ft. per gallon, depending on surface condition and wood porosity. Always apply to the point of refusal.
6. Application temperatures: Do not apply if the overnight low temperature is below 55°F/13.5°C or the daytime high temperature is above 95°F/35°C. At 55-66°F, dilute with mineral spirits or turpentine one part to one gallon of WOODGUARD® X11. Below 65°F, WOODGUARD® X11 may become too viscous to spray, but easily spreads by brush down to 55°F.
7. WOODGUARD® X11 contains asphalt (including asphalt shingles) - avoid contact.
8. Do not apply if rain is expected within 48 hours.
9. WOODGUARD® X11 provides an immediate water repellent barrier; however, its ability to bead water develops as it cures. Re-treat when the surface exhibits signs of losing capability to inhibit water penetration.
10. Avoid open flame during application and until WOODGUARD® X11 has soaked in completely.
11. Subsequent painting - WOODGUARD® X11 provides such strong properties of water repellency that subsequent applications of paint will not adhere as long as the WOODGUARD® X11 barrier remains intact. If in doubt, test first.
12. WOODGUARD® X11 protection will not withstand repeated contact with chlorine or other strong acids or bases. Avoid using on wood in contact with this chemical, or react as necessary.
13. Until WOODGUARD® X11 has thoroughly cured, treated surface may be slippery. WOODGUARD® X11 is a water-based printed film is effective on many wood products - greenhouse items, fruit and vegetable boxes, and other farm uses, especially wood surfaces in close proximity with animals, feedstuffs and the like.

TINING INSTRUCTIONS

WOODGUARD® X11 is compatible with and may be colored by the addition of small quantities of the Universal Machine Colors employed to color oil or water based paints. It is important to note that different colorants weather differently, and color development varies with wood species, wood grain and wood undertone. Consult your dealer for assistance in tinting. WOODGUARD® X11 is a transparent preservative oil finish that can be tinted to any light shade, providing an attempt to obtain a heavy or solid color stain by overloading with pigment. Approved formuals are available from your dealer or handling of this product that results from their failure to read and comply with the Directions for Use. WOODGUARD® X11, the養的 product which appears on the product label. For the sake of clarity, the seller makes no other EXPRESS or IMPLIED WARRANTY, INCLUDING ANY OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF THE SELLER IS AUTHORIZED EXPRESSLY OR IMPLICITLY, and/or to sell, offer for sale, or sell for a price of the product as to which a claim is made.

WARRANTY AND LIMITATION OF DAMAGES

Sellers warrant to those persons lawfully acquiring this product at the time of the first sale of this product by the seller this product conformed to its chemical description and that it was reasonably fit for the purpose as stated on the product label when used both in accordance with the Directions for Use and under normal conditions of use. Buyers and users of this product assume the risk of all loss or damage from use or handling of this product that results from their failure to read and comply with the Directions for Use.
