This label expires on November 27, 2015 and must not be distributed or used after that date.

READ THE ENTIRE LABEL FOR ABBA® 0.15EC MITICIDE/INSECTICIDE BEFORE PROCEEDING WITH THE USE DIRECTION CONTAINED IN THIS SUPPLEMENTAL LABELING.

“Label” as used in this supplemental labeling refers to the label booklet for ABBA 0.15EC and this supplement.

ACTIVE INGREDIENT: % BY WT.
Abamectin (CAS No. 65195-56-4 and 65195-55-3)…………………………………………………………………….1.9%

INERT INGREDIENTS:…………………………………………………………………………………….98.1%

TOTAL:…………………………………………………………………………………………………….100.0%

KEEP OUT OF REACH OF CHILDREN

WARNING / AVISO
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

DIRECTIONS FOR USE
• It is a violation of Federal law to use this product inconsistent with its labeling.
• This supplemental labeling must be in the possession of the user at the time of pesticide application.
• Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
• These directions can be found on the currently registered EPA Stamped Label

Physical Or Chemical Hazards

Attention: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

DRY BEANS

Cicer arietinum – Chickpea, Garbanzo bean
Lupinus spp. – Sweet lupine, White sweet lupine, White lupine and Grain lupine
Phaseolus spp. – Kidney bean, Lima bean, Mung bean, Navy bean, Pinto bean, Snap bean, and Waxbean
Vicia faba – Broad bean and Fava bean
Vigna spp. – Adzuki bean, Asparagus bean, Blackeyed pea, Catjang, Chinese longbean, Cowpea*, Crowder pea, Moth bean, Mung bean, Rice bean, Southern pea, Urd bean, and Yardlong bean

* For use on cowpeas grown for dry seed only. Do not allow livestock to graze cowpea forage and do not harvest cowpea forage or hay for use as livestock feed.
For controlling *Liriomyza* leafminers and spider mites
Apply ABBA 0.15EC when adult leafminer flies or spider mites are initially seen. Repeat applications when needed to maintain control (see Use Restrictions). When low to moderate infestations are present, use 8 – 12 fl oz per acre; for severe infestations, use 13 – 16 fl oz per acre.

Apply as a foliar spray in at least 10 gallons of water per acre by ground or in at least 5 gallons per acre by air. Under conditions such as high pest populations, dense or rank foliage, high temperatures or other such adverse application situations, use a greater water volume to ensure adequate coverage. For best results, ensure that good upper and lower leaf coverage is attained. Do not apply ABBA 0.15EC by aerial application equipment in New York State.

**Use Restrictions – Dry Beans**
- Do not apply in less than 10 gallons of water per acre by ground or in less than 5 gallons per acre by aircraft.
- Do not apply at intervals of less than 7 days.
- Do not apply more than 16 fl oz per acre (or 0.019 lb ai/A) of ABBA 0.15EC or any other foliarly applied product containing abamectin per application.
- Do not use more than 48 fl oz per acre (0.056 lb ai/A) of ABBA 0.15EC or any other foliarly applied product containing abamectin in any growing season.
- Do not apply within 7 days of harvest.
- For resistance management, do not exceed 2 sequential applications of ABBA 0.15EC or any other foliarly applied product containing abamectin.

**HERB CROP SUBGROUP (CROP SUBGROUP 19A)**
Some of the crops in this group are Angelica; Balm; Basil; Borage; Burnet; Chamomile; Catnip; Chervil (dried); Chives; Chives (Chinese); Clary; Coriander (leaf); Cilantro (leaf); Costmary; Culantro (leaf); Curry (leaf); Dill weed; Horehound; Hyssop; Lavender; Lemongrass; Lovage (leaf); Marigold; Marjoram (*Origaniun* spp.); Nasturtium; Parsley (dried); Pennyroyal; Rosemary, Rue; Sage; Savory (summer and winter); Sweet bay; Tansy; Tarragon; Thyme; Wintergreen; Woodruff; and Wormwood.

For controlling *Liriomyza* leafminers and Spider mites.
Apply using conventional ground sprayers only in a minimum of 20 gallons of water per acre. Apply as a foliar spray providing thorough coverage of the upper and lower leaf surfaces. ABBA 0.15EC can be used without a wetting agent. When it is necessary to smooth out spray deposits or improve the wetting of foliage, a nonionic surfactant can be used for all crops in the Herb Crop Subgroup 19A with the exception of chives. To avoid crop injury, carefully follow the DIRECTIONS FOR USE and PRECAUTIONS sections of non-ionic surfactant labels and/or official spray guides when using ABBA 0.15EC with a non-ionic surfactant.

Use the lower rate for low to moderate infestations and the higher rate for severe infestations. Apply when adult flies are first observed and repeat application as necessary to maintain control (see User Restrictions).

Use Restrictions – Herb Crop Subgroup 19A

- Do not apply within 14 days of harvest. For chives, do not apply within 7 days of harvest.
- Do not reapply at less than 7 day intervals.
- Do not apply more than 16 fl oz/A (or 0.019 lb ai/A) of ABBA 0.15EC or any other foliarly applied product containing abamectin per application.
- Do not make more than 2 applications of ABBA 0.15EC or any other foliarly applied product containing abamectin per single cutting (harvest).
- Do not apply more than 16 fl oz/A of ABBA 0.15EC or any other foliarly applied product containing abamectin per acre per cropping season (6 applications at 8 fl oz/A or 3 applications at 16 fl oz/A) of ABBA 0.15EC or any other foliarly applied product containing abamectin.
- Do not apply aerially.

ONION, BULB (CROP SUBGROUP 3-07A)

Onion, bulb including daylily bulb; Fritillaria bulb; Garlic bulb; Garlic, great-headed bulb; Garlic, serpeant bulb; Lily bulb; Onion, Chinese bulb; Onion, pearl; Onion, potato bulb; Shallot, bulb; Cultivars, varieties and/or hybrids of these.

For controlling Liriomyza leafminers and thrips.

For leafminers, apply as ABBA 0.15EC when adult leafminer flies are initially seen and repeat applications as needed for control (see Use Restrictions). For thrips, apply ABBA 0.15EC when thrips are at economic threshold and repeat applications when needed to maintain control (see Use Restrictions). Do not use ABBA 0.15EC as a rescue treatment for thrips control. When low to moderate infestations are present use 8 – 12 fl oz per acre; for severe infestations, use 13 – 16 fl oz per acre. Add a non-ionic activator type wetting, spreading and/or penetrating adjuvant approved for use of bulb onion. Do not use binder sticker type adjuvants. Tank mixing with products that have binder sticker type formulations can reduce ABBA 0.15EC performance (see Use Restrictions).

Apply as a foliar spray in at least 20 gallons of water per acre by ground or in at least 5 gallons per acre by air. Under conditions such as high pest populations, dense or rank foliage, high temperatures or other such adverse application situations, use a greater water volume to ensure adequate coverage. For best results, ensure that good upper and lower leaf coverage is attained. Do not apply ABBA 0.15EC by aerial application equipment in New York State.

Use Restrictions – Onions, Bulb (Crop Subgroup 3-07A)

- Do not apply in less than 20 gallons of water per acre by ground or in less than 5 gallons per acre by aircraft.
- Do not apply at intervals of less than 7 days.
- Do not apply more than 16 fl oz/A (or 0.019 lb ai/A) of ABBA 0.15EC or any other foliarly applied product containing abamectin per application.
- Do not use more than 48 fl oz per acre (0.056 lb ai/A) in any growing season.
- Do not apply within 30 days of harvest.
- For resistance management, make 2 consecutive applications of ABBA 0.15EC then rotate to a chemistry with a different mode of action before making additional ABBA 0.15EC applications. Do not exceed 2 sequential applications of ABBA 0.15EC or any other foliarly applied product containing abamectin in a growing season.
