How to Apply

1. To REMOVE Applicator: Lift and remove the plastic tab to expose foil backing; then peel away the foil. Or use scissors to open.

2. OPEN Applicator
Hold upright with tip toward you and snap applicator tip.

3. APPLY FRONTLINE TOP SPOT
Part the dog's hair between the shoulder blades. Place the applicator tip just above the skin and squeeze. Apply entire contents of the applicator in a single spot directly onto the dog's skin. Do not apply on top of the hair coat. Avoid contact with treated area until dry. Do not apply to dogs weighing less than 5 lbs or younger than 8 weeks of age. Do not apply more than one application per dog per month.

FRONTLINE Top Spot® for Dogs
FRONTLINE Top Spot® kills fleas, ticks, chewing lice, and sarcoptic mange infestations. Multiple monthly treatments are recommended where tick control is needed.

FRONTLINE Top Spot® for Dogs is approved for use on all dogs, including breeding, pregnant, and lactating bitches and puppies as young as 8 weeks.

FRONTLINE Top Spot® is a fast-acting, long-lasting, waterproof treatment and control of fleas, ticks, chewing lice, and sarcoptic mange for use ONLY on dogs and puppies 8 weeks or older and 5-22 lbs.

Directions for Use
1. Apply ONE Frontline Top Spot® for Dogs spot to each dog per month. DO NOT use more than one application per dog per month.
2. APPLY FRONTLINE TOP SPOT on the dog's skin. Hold the applicator tip just above the skin and squeeze. Apply entire contents of the applicator in a single spot directly onto the dog's skin. Do not apply on top of the hair coat. Avoid contact with treated area until dry.

FRONTLINE Top Spot® typically kills fleas, ticks, chewing lice, and sarcoptic mange for 30 days.

FRONTLINE Top Spot® remains effective even after bathing, water immersion, or exposure to sunlight.

FRONTLINE Top Spot® kills all life stages of ticks (larva, nymph and adult). FRONTLINE Top Spot® is approved for use on all dogs, including breeding, pregnant, and lactating bitches and puppies as young as 8 weeks.

FRONTLINE Top Spot® provides fast-acting, long-lasting, waterproof treatment and control of fleas, ticks, chewing lice, and sarcoptic mange for use ONLY on dogs and puppies 8 weeks or older and 5-22 lbs.

FRONTLINE Top Spot® kills fleas, flea eggs & larvae, ticks, & chewing lice

FRONTLINE Top Spot® kills adult fleas, flea eggs, and flea larvae for up to three months. A once monthly application is recommended where tick control is needed.

FRONTLINE Top Spot® kills all life stages of ticks (larva, nymph and adult). FRONTLINE Top Spot® is approved for use on all dogs, including breeding, pregnant, and lactating bitches and puppies as young as 8 weeks.

FRONTLINE Top Spot® provides fast-acting, long-lasting, waterproof treatment and control of fleas, ticks, chewing lice, and sarcoptic mange for use ONLY on dogs and puppies 8 weeks or older and 5-22 lbs.

FRONTLINE Top Spot® for Dogs
FRONTLINE Top Spot® kills fleas, ticks, chewing lice, and sarcoptic mange infestations. Multiple monthly treatments are recommended where tick control is needed.

Frequency of Application
FRONTLINE Top Spot® for Dogs is applied monthly. Flea and tick control lasts for up to 30 days. The product may be reapplied after 30 days if needed. Mode of Action: Fipronil is a new generation insecticide and acaricide. It is rapidly and completely absorbed after oral and topical exposure. In the body, fipronil is converted to its more potent active metabolite, which is the active ingredient in the product. Fipronil is a potent insecticide and acaricide, killing fleas, ticks, lice, and sarcoptic mange mites by inhibiting the sodium channel in the insect nervous system. This affects the ability of the insect to move and function. After topical administration, the insecticide is concentrated in the hair and skin, providing ongoing protection from flea, tick, lice, and mite reinfestations. Fipronil is not known to affect the central nervous system of dogs and cats.

FRONTLINE Top Spot® for Dogs is used on dogs and puppies 8 weeks or older and 5-22 lbs. A once monthly application is recommended for the control of sarcoptic mange infestations. Multiple monthly treatments are recommended where tick control is needed.

FRONTLINE® Top Spot® for Dogs:
- Fast-acting
- Long-lasting
- Waterproof

One spot application is all that’s needed:
FRONTLINE TOP SPOT spreads from the single point of application, rapidly covering the entire dog and localizing in the hair, skin, and sebaceous glands. The treated dog continues to release active ingredients from the site of application through sebaceous glands. FRONTLINE TOP SPOT onto the skin and hair coat, so it keeps working even if the dog gets wet.

Fleas, flea eggs & larvae, ticks and chewing lice are killed quickly after coming into contact with a treated dog. Fleas and ticks do not need to bite the dog in order to die.

FRONTLINE TOP SPOT for Dogs:
- Kills fleas, flea eggs and flea larvae
- Prevents all flea stages (eggs, larvae, pupae) from developing
- Stops existing infestations and prevents establishment of new infestations
- Kills fleas which may cause flea allergy dermatitis

FRONTLINE TOP SPOT kills all life stages of ticks (larva, nymph and adult), including deer ticks (Ixodes scapularis), brown dog ticks (Rhipicephalus sanguineus), American dog ticks (Dermacentor variabilis) and lone star ticks (Amblyomma americanum). Ticks that may transmit Lyme disease, Rocky Mountain spotted fever, ehrlichiosis, babesiosis, anaplasmosis and other tick-borne diseases are killed.

FRONTLINE TOP SPOT is approved for use on all dogs, including:
- Breeding, pregnant, and lactating bitches
- Puppies as young as 8 weeks and weighing at least 5 lbs.
FRONTLINE® Top Spot® for Dogs:

To kill fleas, flea eggs & larvae, ticks, chewing lice, and sarcoptic mites.

To successfully control fleas and ticks, all dogs and cats must be treated with their own dose of FRONTLINE®.

Apply according to label instructions, ensuring the product is applied to the skin, not on top of the fur and not near the collar. It may be helpful to remove the collar before application, so it doesn’t absorb the product.

Remember, your pet needs to be dry at the time FRONTLINE is applied and remain dry 24 hours after application.

Verify pipette is empty after application (multiple squeezes may be necessary to apply the entire dose).

Even indoor pets need flea and tick control because you or other pets in the household may bring fleas into the home. These fleas can lead to a flea infestation.

It can take up to 3 months to get rid of a serious flea infestation because of all of the flea life stages that existed BEFORE you started using FRONTLINE.

The adult fleas on your pet may just be the tip of the infestation iceberg.

50% Eggs
5% Adult Fleas
10% Pupae
35% Larvae

5% Adult Fleas
10% Pupae
35% Larvae
50% Eggs

Eggs will hatch in 1-10 days
Pupae can survive up to 174 days
The larval stage lasts 5-11 days

The average flea life cycle in the home is about 21 days long.
To ensure continued protection of your pets, use these stickers as a reminder to apply and re-purchase FRONTLINE.

After treating your pet for the first time, peel off the sticker and place on your calendar that day.

Place the remaining stickers on your calendar as a reminder to apply FRONTLINE monthly.

Don’t forget to re-purchase!
