STRIKE® PLUS 50 WDG
Fungicide

FOR THE CONTROL OF LISTED FOLIAR AND STEM DISEASES OF ORNAMENTALS INCLUDING FLOWERS, FOLIAGE PLANTS, SHRUBS, SHADE TREES AND NON-BEARING FRUIT TREES GROWN IN NURSERIES, GARDEN CENTERS AND GREENHOUSES.

ACTIVE INGREDIENTS:

- Thiophanate-methyl (CAS No. 141917-21-7) ................................................................. 6.33%
- Tebuconazole (CAS No. 43212-14-3) ........................................................................... 41.67%

OTHER INGREDIENTS: ........................................................................................................... 50.00%
TOTAL: .................................................................................................................................... 100.00%

EPA Reg. No. 432-1513-59807

Net Contests: 1 Pound (454 grams)

FIRST AID

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If on skin or clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15 to 20 minutes.
- Call a poison control center or doctor for treatment advice.

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give anything to an unresponsive person.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-356-4647 for emergency medical treatment.

Note to Physician: If ingested, induce emesis or lavage stomach. Treat symptomatically.
PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Causes moderate eye irritation. Harmful if swallowed, inhaled, or absorbed through the skin. Prolonged or frequent repeated skin contact may cause allergic reactions in some individuals. Avoid touching dust or spray mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Personal Protective Equipment (PPE)

Applicants and other handlers must wear:

- Long-sleeved shirt and long pants.
- Chemical-resistant gloves made of waterproof material such as nitrile, butyl rubber, butyl/latex, or nitrile rubber when mixing/handling when using hand-held equipment or wand/telescopic nozzles.
- Shoes plus socks.
- Chemical-resistant apron, when mixing/loading, or cleaning spills or equipment.

See engineering controls for additional requirements.

Dispose of clothing and other absorbent materials that have been drenched or heavily contaminated with the product's concentrate.

Do not reuse them.

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions exist for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statements

When handling and closed systems, enclosed tanks, or inlets in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (60 CFR 170.246), the transfer PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations

Users should:

- Wash hands thoroughly with soap and water before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to any area where surface water is present, or to fields that drain to surface water. Wash and rinse equipment used to mix or apply directly into water or on land. Ground Water Advisory. The active ingredients in this product have properties and characteristics associated with chemicals detected in ground water. The use of this chemical in areas where soil is permeable, particularly where the water table is shallow, may result in ground water contamination. Do not apply applications when weather conditions are dry/dry from target area.

PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near food or food uses.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only trained and skilled handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, decontamination, and emergency assistance. It also contains specific restrictions and exceptions pertaining to the states that have adopted the provisions of the Pesticide Applicator Program (PAP) and restricted-entry interval. The requirements in this text only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

Exceptions: If the product is applied by injection, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated. Pesticides for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Long-sleeved shirt and long pants
- Closed-resistant gloves made of any waterproof material
- Shoes plus socks

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this text apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not enter treated areas without protective clothing until spray has dried.

Do not apply by aerial application in the State of New York.

PRODUCT INFORMATION

Mixing Procedures

Prepare no more spray mixture than is needed for the immediate operation. Thoroughly clean spray equipment before using this product. Agitation is necessary for proper disposal of the product. Maintain agitation throughout the spraying operation. Do not let the spray mixture stand overnight in the spray tank. Flush the spray equipment thoroughly following each use and apply the residue to a previously treated area.

STRIKE PLUS 50 WDG Alone: Add 1/2 of the required amount of water to the mix tank. With the agitator running, add the predetermined dose of STRIKE PLUS 50 WDG to the tank. Continue agitation while adding the remainder of the water. Begin application of the solution when STRIKE PLUS 50 WDG has completely dispersed into the mix water. Maintain agitation until all of the mixture has been applied.

STRIKE PLUS 50 WDG + Tank Mix Inert: Add 1/2 of the required amount of water to the mix tank. Start the agitation running before adding STRIKE PLUS 50 WDG and any tank mix inert to the mixture. The tank mix inert should be added in the order: (1) products packaged in water soluble packaging, (2) products packaged in solid granules such as STRIKE PLUS 50 WDG, (3) solid flowables, liquids, and (4) immiscible concentrates. Always allow each tank mix inert to become fully dispersed before adding the next product. Provide sufficient agitation while adding the remainder of the water. Maintain agitation until all of the mixture has been applied.

If using STRIKE PLUS 50 WDG in a tank mixture, observe all restrictions, directions for use, precautions, use rates, clothing name, precautions, and limitations that appear on the tank mix product label. Do not exceed labeled dosage rates, and the most restrictive label precautions and limitations must be followed. This product must not be mixed with any product that prohibits such mixing. Tank mixers or other applications of products referenced on this label are permitted only in those states in which the referenced products and uses are registered.

STRIKE PLUS 50 WDG is compatible with most noncultural fungicides and fertilizer products. However, the compatibility of STRIKE PLUS 50 WDG with tank mix partners should be tested before use.

To determine biocidal compatibility with other products, use the products in the desired proportions. Spray on target plants and observe for phytotoxicity seven days after application.

Use with additives: Use of spray additives is not required. Any spray additive should be evaluated prior to use. Do not use in conjunction with organophosphate-based products, or plant injury may occur. Label directions are the same for PEG 400 with no additives.
Chemigation: Do not apply this product through any type of irrigation system.

Resistance Management: STIKE PLUS 50 WDG contains the strilazine class of chemistry, which exhibits no known cross-resistance to other chemical classes including pyracyanines, monuron, and vinclozolin. There is no evidence that it is more likely to cause resistance development than other broad-spectrum products if used according to label directions. However, in situations where resistance development is a concern, the use of this product should be limited to situations where the disease problem is not controlled by other products. In such situations, resistance management strategies may include rotating and/or tank mixing with products having different modes of action or limiting the total number of applications per season. Close cooperation with your local pesticide consultant is essential to ensure effective use of STIKE PLUS 50 WDG.

ORNAMENTAL DISEASE CONTROL
STIKE PLUS 50 WDG is a broad-spectrum systemic fungicide for the control of listed foliar and stem diseases on ornamentals including flowers, foliage plants, shrubs, shade trees and non-bearing fruit trees grown in nurseries, garden centers and greenhouses.

Use restrictions for STIKE PLUS 50 WDG on ornamentals:
• Do not use STIKE PLUS 50 WDG in residential greenhouses.
• Applications with hose-end sprayers are permitted only for outdoor use on ornamentals.
• Do not use STIKE PLUS 50 WDG on bearing fruit trees. STIKE PLUS 50 WDG may be used on non-bearing fruit trees. Non-bearing fruit trees are defined as trees that will not bear fruit until at least 1 year after treatment.

Garden Center and Nursery Applications
Foliar Diseases: STIKE PLUS 50 WDG will control foliar diseases of ornamental plants when applied as a foliar spray to the plant species listed on this label. Apply 3 to 6 oz of STIKE PLUS 50 WDG per 100 gallons of spray solution. Apply as a full-coverage spray to the point of drip and repeat at 14 to 21 day intervals until the threat of disease is over. Begin applications when conditions are favorable for disease development and continue until the threat of disease is over. Use higher rates or narrower banding under high disease pressure. Do not exceed a maximum of 287 oz of STIKE PLUS 50 WDG per acre per year (4-7 oz/1000 sq ft).

Do not exceed a volume of 530 gallons of spray mix per acre per application at the highest application rate of 8 oz/100 gal.

NOTICE TO USER: Plant tolerance to STRIKE PLUS 50 WDG has been found to be acceptable on all ornamentals that it has been tested on with the exception of Petunia, Vidalia, and New Guinea Impatiens. Due to the large number of species and varieties of ornamental plants, it is impossible to test every one for resistance to STRIKE PLUS 50 WDG. Neither the Manufacturer nor the Seller has determined whether or not STRIKE PLUS 50 WDG can be used safely on ornamental plants not specified on this label. The professional user should determine if STRIKE PLUS 50 WDG can be used safely prior to commercial use. In a small area test, the labeled rates on a small number of plants for physiologically prior to widespread use. Before using STRIKE PLUS 50 WDG on ornamental plants that are not listed on this label, test STRIKE PLUS 50 WDG on a small scale first.

**Common and scientific names of diseases controlled by STRIKE PLUS 50 WDG**

**Greenhouse Applications**

Except as noted for specific diseases, mix 1.2 to 2.4 oz/sq ft of STRIKE PLUS 50 WDG in 100 gallons of water and apply as a full coverage foliar spray to the point of drift. Do not exceed a volume of 250 gallons of spray mix per acre at the highest dose rate of 9 oz/100 gal.

**Winter Use** — 1.2 oz of STRIKE PLUS 50 WDG.

**Summer Use** — 2.4 oz of STRIKE PLUS 50 WDG.

**Mix specified amount of STRIKE PLUS 50 WDG in 100 gallons of water and apply in a spray application to the point of drift. Interval between applications should not be less than 30 days to avoid flower stalk length reduction. Excessive rates or applications may result in a shortening of the flower stalk.**

Maximum Use Rates in Ornamentals
For ornamental plants do not exceed a maximum of 207 oz or 2.1 L of STRIKE PLUS 59 WDG per acre per year (4.4 L/1000 sq ft). Do not exceed a volume of 510 gallons of water mix per acre per application at the highest application rate of 9 oz/100 gal.

Resistance Management for Ornamentals
STRIKE PLUS 59 WDG contains a site-specific fungicide belonging to the strobilurin class of chemistry. Many plant pathogens are known to develop resistance to fungicides with a specific mode of action. With strobilurin fungicides, resistance development may be rapid, particularly with greenhouse use.

STRIKE PLUS 59 WDG exhibits cross-resistance to other strobilurins and fungicides within the strobilurin-type action and resistance group (STIR compounds), but there is no known cross-resistance to fungicides of other classes, including strobilurins, dithiocarbamates, triazines, triazoles, pyridimines, pyrimidinones, or phenylamides.

Many plant pathogens have a history of fungicide resistance development. To minimize the risk of resistance development to STRIKE PLUS 59 WDG, the following practices are recommended:

1. Use STRIKE PLUS 59 WDG preventively.
2. For Leaf Spot and diseases other than Powdery Mildew, Downy Mildew, and Botrytis:
   - Use no more than two (2) applications of STRIKE PLUS 59 WDG before rotating to another effective product that is not in the strobilurin class of chemistry for two (2) applications before rotation back to STRIKE PLUS 59 WDG.
   - Rotate to another fungicide of nonstrobilurin chemistry after each STRIKE PLUS 59 WDG application.
3. For Powdery Mildew, Downy Mildew, and Botrytis:
   - Between each STRIKE PLUS 59 WDG application, make two (2) applications of a fungicide of nonstrobilurin chemistry before rotating back to STRIKE PLUS 59 WDG.
   - Rotate to another fungicide of nonstrobilurin chemistry after each STRIKE PLUS 59 WDG application.
4. Make no more than four (4) total applications of STRIKE PLUS 59 WDG per season for each risk pathogen.
STORAGE AND DISPOSAL.

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, feeds and feed. Store in original container and out of reach of children, preferably in a locked storage area.

Handle and open container in a manner as to prevent spillage. If the container is broken or material spilled, carefully sweep materials into a pile. Refer to Precautionary Statements on label for hazards associated with the handling of this material. Do not walk through spilled material. Material that cannot be used as directed should be disposed of as directed below. In spill or leak incidents, keep unauthorized people away.

Pesticide Disposal: Pesticide waste may be toxic. Improper disposal of unused pesticides, spray runoff, or rinse water is a violation of federal law. If these wastes cannot be used according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidelines on proper disposal methods.

Container Handling: Non-refillable container. Do not reuse or refill the container. Triple rinse container or equivalent promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour mix into application equipment or a mix tank or store in aseptic container for later use or disposal. Clean for 10 seconds after the pump is to be dispensed. Repeat this procedure two more times. Offer for recycling, if available or dispose of empty cartons in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Warranties and Limitations of Liability before using this product. If items are not acceptable, return the unopened product container as soon as possible.

Disclaimer of Warranties: The user or buyer accepts the following Conditions. Disclaimer of Warranties and Limitations of Liability.

Consequences: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Inherent hazards, plant injury or other property damage, or other unintended consequences may result because of factors beyond the control of OHP Inc. as weather conditions, presence of other materials, or the manner of use or application.

Disclaimer of Warranties: To the extent consistent with applicable law, OPH Inc. makes no other express or implied warranty. No agent of OHP Inc. is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. To the extent consistent with applicable law, OHP Inc. disclaims any liability whatsoever for consequential, special, or indirect damages resulting from the use, handling, or application of this product.

Limitations of Liability: To the extent consistent with applicable law, the exclusive remedy of the user or buyer for any and all losses, injuries or damages resulting from the use or handling of this product, whether by contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid or at OHP Inc.'s election, the replacement of product.

This product contains a chemical known to the state of California to cause developmental or reproductive harm.

31601913 REV00413
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Causes moderate eye irritation. Harmful if inhaled, ingested, or absorbed through the skin. Prolonged or frequent exposure to low concentrations may cause allergic reactions in some individuals. Avoid breathing dust or spray mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:

• Long-sleeved shirt and long pants.
• Chemical-resistant gloves made of impenetrable material such as neoprene, butyl rubber, nitrile, neoprene-coated or viton, coated or viton, nitrile, butyl, neoprene, or nitrile.
• Shoes plus socks.
• Chemical-resistant apron, when mixing, handling, or cleaning spills or equipment.

See engineering controls for additional requirements.

Engineering Control Statements

When handled under systems, equipment, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural practices (29 CFR 1910.1480), the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations

Users should:

• Wash hands thoroughly with soap and water before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and change into clean clothing.
• Remove PPE immediately after handling the product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present, or to intermittent areas below the mean high water mark. Do not apply to waters where rooftop or equipment wash water or drainage could enter. Keep all pesticides out of reach of children.

FIRST AID

If in eyes

• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If on skin or clothing

• Take off contaminated clothing.
• Wash skin immediately with plenty of water for 15 to 20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed

• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by an unconscious person.

If inhaled

• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance. Do not give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center for or doctor, or going for treatment. You may also contact 1-800-356-6447 for emergency medical treatment.

Note to Physician: Indicate name of disease, product label symptoms.

(Label continued on the side of container)
