This product is for commercial purposes only.
Not for household use.

ACTIVE INGREDIENTS:
Copper Carbonate* ........................................... 3.47%
Boric Acid .................................................... 35.87%

INERT INGREDIENTS: .................................. 60.66%
Total 100.0%

*Equivalent to 2% copper as metal.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID

If on skin or clothing
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed
Call poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in eyes
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If inhaled
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.

DESCRIPTION

Pole Wrap CB is a supplemental treatment which aids in extending pole life. Pole Wrap CB offers protection against decay and wood destroying insects for a comparable period to your normal groundline treatment cycle, consistent with industry practice.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Dig around the groundline of the pole to be treated to a depth of approximately 20 inches. Remove hardened creosote and rotted wood. Inspect pole as to remaining serviceability. Clean the surface of the pole to be treated. Measure the circumference of the pole. Cut from the roll of Pole Wrap CB the length needed allowing a slight overlap. Apply to the pole to the depth of approximately 18 inches below groundline, and 2 inches above groundline. Attach to pole by means of staples or tacks. Be sure bandage is pulled tight to be in close contact with the wood pole. Back fill and tamp the earth around the pole to 2 inches above the original groundline.

Proper use includes the covering of any exposed product above the groundline in areas where children or livestock may come in contact with it. Various products which can be used for this purpose are Osmose’s Pasture Wrap or some other type of barrier which prevents the product from being easily removed and consumed. If you have any questions regarding this product, please contact Osmose Utilities Services, Inc. Products Department at (716) 319-3420.
