SUPPLEMENTAL LABELING

EPA Reg. No. 71368-43-55467

03-04-2013

LABEL REVISIONS: Revised Glyphosate Drift Warning Statement, Revised Roundup Ready Crop Warning Statements and Use Instructions for Roundup Ready 2 Yield Soybeans

READ AND FOLLOW THE ENTIRE LABEL BOOKLET FOR THIS PRODUCT BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

“Label” as used in this supplemental labeling refers to the label booklet for this product and this supplemental.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN ANY MANNER INCONSISTENT WITH ITS LABELING. This label must be in the possession of the user at the time of application.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

ALL APPLICABLE DIRECTIONS, RESTRICTIONS AND PRECAUTIONS IN THE PRODUCT LABEL BOOKLET MUST BE FOLLOWED, INCLUDING STATEMENTS PERTAINING TO THE WORKER PROTECTION STANDARDS, ON THE EPA REGISTERED LABEL.

ATTENTION

AVOID DRIFT. EXTREME CARE MUST BE USED WHEN APPLYING THIS HERBICIDE TO PREVENT INJURY TO DESIRABLE PLANTS AND CROPS. This product may kill, seriously injure or reduce yields of many desirable forms of vegetation including flowers, fruits, grapes, tomatoes, ornamentals, vegetables, cotton, soybeans, tobacco, beans and other desirable non-target plants including, where applicable, target crop species not containing a glyphosate tolerant gene. Minute quantities of spray may cause severe plant response. Read and follow Spray Drift Management section of label. It is suggested to use a smoke generator or other means at or near the application site for the detection of air movement, air stability, or temperature inversions.

Note: Use of this product in any manner not consistent with this label may result in injury to persons, animals or crops, or other unintended consequences. When not in use, keep container closed to prevent spills and contamination.

ROUNDUP READY® CROPS

The following instructions or those separately published on Tenkoz [manufacturer] supplemental labeling include all applications which can be made onto the specified Roundup Ready crops during the complete cropping season. DO NOT combine these instructions with other instructions for crops that do not contain a Roundup Ready gene listed on the label. USE THIS PRODUCT FOR POSTEMERGENCE APPLICATION ONLY ON CROP VARIETIES DESIGNATED AS CONTAINING A ROUNDUP READY GENE.

Applying this product to crop varieties that are not designated as Roundup Ready will result in severe crop injury and yield loss. Avoid contact with foliage, green stems, or fruit of crops, or any desirable plants that do not contain a Roundup Ready gene, since severe injury or destruction will result.

The Roundup Ready designation indicates that the crop variety contains a patented gene that provides tolerance to this product. Information on Roundup Ready crop varieties may be obtained from your seed supplier. Roundup Ready crop varieties must be purchased from an authorized licensed seed supplier.
For Ground Applications: Use the required rates of this product in 5 to 20 gallons of spray solution per acre as a broadcast spray. Carefully select correct nozzles and spray pressure to avoid spraying a fine mist. Check for even distribution of spray droplets.

For aerial applications: Use the required rates of this product in 3 to 15 gallons of spray solution per acre. See “Application Equipment and Techniques” section of this label for procedures to avoid spray drift that may cause injury to any vegetation not intended for treatment. Use of appropriate buffer zones will help prevent injury to adjacent vegetation.

AVOID DRIFT. EXTREME CARE MUST BE USED WHEN APPLYING THIS PRODUCT TO PREVENT INJURY TO DESIRABLE PLANTS AND CROPS WHICH DO NOT CONTAIN THE ROUNDPUP READY GENE.

See the “Mixing, Additives and Application Instructions” sections of the label for additional directions and restrictions on the application of this product.

Tank mixtures with other herbicides, insecticides, fungicides, micronutrients or foliar fertilizers may result in reduced weed control or crop injury and are NOT for over-the-top applications of this product unless otherwise noted on this product label, supplemental labeling or fact sheets published separately.

Ammonium sulfate may be mixed with this product for applications to Roundup Ready crops. Refer to the “Mixing” section for use instructions for ammonium sulfate.

Sprayer Preparation: It is important that sprayer and mixing equipment be clean and free of pesticide residue before making applications of this product. Follow the cleaning procedures specified on the label of the product(s) previously used. THOROUGHLY CLEAN THE SPRAY TANK AND ALL LINES AND FILTERS TO ELIMINATE POTENTIAL CONTAMINATION FROM OTHER HERBICIDES PRIOR TO MIXING AND APPLYING THIS PRODUCT.

Note: The following directions are based on a clean start at planting by using a burndown application or tillage to control existing weeds before crop emergence. In no-till and stale seedbed systems, a replant burndown treatment of this product may be needed to control existing weeds prior to crop emergence. Some weeds, such as black nightshade, broadleaf signalgrass, sicklepod, Texas panicum, sandbur, annual morningglory, woolly cupgrass, shattercane, wild proso millet, burcucumber, and giant ragweed with multiple germination times or suppressed (stunted) weeds may require a second application of this product for complete control. The second application should be made after some regrowth has occurred and at least 10 days after a previous application of this product.

**ROUNDPUP READY® 2 YIELD SOYBEANS**

**TYPES OF APPLICATIONS:** Preplant, At-Planting, Preemergence, Postemergence (In-crop), Preharvest, Post-Harvest.

**USE INSTRUCTIONS:** Refer to the following table for maximum application rates of this product with Roundup Ready 2 Yield soybeans.

<table>
<thead>
<tr>
<th>Maximum Application Rates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Combined total per year for all applications</td>
</tr>
<tr>
<td>Total of all Preplant, At-Planting, Preemergence applications</td>
</tr>
<tr>
<td>Total of all in-crop applications from cracking through flowering (R2 stage soybeans)</td>
</tr>
<tr>
<td>Maximum preharvest application rate</td>
</tr>
</tbody>
</table>

**PRECAUTIONS, RESTRICTIONS:** See label for general precautionary instructions for use in Roundup Ready crops. The maximum combined total quantity of this product for all applications in a season is 6.4 quarts per acre. Refer to other applicable sections of the label for more information on Maximum Application Rates.

**Preplant, At-Planting, Preemergence**

**USE INSTRUCTIONS:** This product may be applied before, during or after planting Roundup Ready 2 Yield soybeans.

**TANK MIXTURES:** This product may be tank-mixed with 2,4-D, Banvel or Clarity and applied prior to planting only. This product may be tank-mixed with the following products and applied prior to crop emergence. Ensure that the specific product being used in the tank mixture is registered for application prior to emergence of soybeans. Read and follow label directions of all products in the tank mixture.
PR ECA U TIO NS, RESTRI C TIO NS: M axim  um quantity of this product that m ay be applied for all preplant, at-planting and pre- 
em ergence applications com bined is 4 quarts per acre per season. R efer to individual tank m ixture product label for restric-
tions and precautions; use according to the most restrictive precautionary statem ents for each product in the tank m ixture.

Postemergence (In-crop)
USE INSTRUCTIONS: This product may be used to control annual grasses and broadleaf weeds in Roundup Ready 2 Yield
soybeans. Applications of this product can be made in Roundup Ready 2 Yield soybeans from em ergence (cracking) through
flowering (R2 stage soybeans). R2 stage soybeans end when a pod 5 millimeters (3/16 inch) long appears at one of the four 
uppermost nodes on the main stem with a fully developed leaf (R3 stage). Refer to the “AN N UAL W EE DS R ATE SE C TIO N ” of
the label for this product for application rates for specific annual weeds. In general, apply an initial application of 25 fluid ounces
per acre on 2 to 8 inch tall weeds. Weeds will generally be 2 to 8 inches tall, 2 to 5 weeks after planting. If the initial applica-
tion is delayed and weeds are larger, apply a higher rate of this product. This product m ay be applied up to 51 fluid ounces per
acre as a single, in-crop application for control of annual weeds and where dense weed populations exist.

A 25 to 51 fluid ounce per acre rate (single or multiple applications) of this product m ay control or suppress perennial weeds,
such as, Bermudagrass, Canada thistle, common milkweed, field bindweed, hemp dogbane, horsernettle, marestail (horse-
weed), nutsedge, quackgrass, rhizome johnsongrass, redvine, trumpetcreeper, swamp smartweed and wirestem muhly. For 
best results, allow perennial weed species to achieve at least 6 inches of grow th before spraying with this product.

Under adverse growing conditions, such as drought, hail, wind damage or a poor soybean stand that slows or delays canopy
closure, a sequential application of this product m ay be necessary to control late flushes of weeds. IN THE SOUTHERN
STATES, A SE QU EN TIAL A PPLIC A TIO N OF THIS PR O DU C T W ILL BE R E Q U IR E D TO C O N TR O L N E W FLU SH E S O F
WEEDS IN THE R OUN DU P R E A DY 2 Y IE LD SOYBE A N C R O P . To control giant ragweed, apply 25 fluid ounces of this prod-
uct per acre when the weed is 8 to 12 inches tall to increase control and possibly avoid the need for a sequential application.

TANK MIXTURES: This product m ay be tank-mixed with the following products and applied postemergence (in-crop) over the
top of Roundup Ready 2 Yield soybeans. Ensure that the specific product being used in the tank mixture is registered for applica-
tion postemergence (in-crop) to soybeans. Read and follow label directions of all products in the tank mixture.

Early Season Disease Suppression
Postemergence applications of this product made within the application rates and timings described above for weed control
may provide suppression of the following soybean fungal diseases: Brown Stem Rot (Phialophora gregata), Charcoal Rot
(Macrophomina phaseolina), Stem Canker (Diaportha phaseolorum var. meridionalis), and Sudden Death Syndrome
(Fusarium virguliforme). Suppression of these diseases, which may result in improved plant health and protection of yield, may
occur with applications of this product made during labeled timings for weed control. The level of activity against these labeled
fungal diseases is not sufficient to provide complete disease prevention or control. The amount of disease suppression will be
reduced with high disease pressure or environmental conditions that favor disease development. Any potential for yield protec-
tion in Roundup Ready 2 Yield soybeans provided by suppression of labeled diseases would occur only as a complement to
the normal weed control applications. Therefore, always determine application rates and timings of this product based on size
and species of weeds to be controlled, not on presence or absence of disease.

PRECAUTIONS, RESTRICTIONS: This combined total application from crop emergence through harvest must not exceed 76 fluid ounces per acre. The maximum rate for any single in-crop application is 51 fluid ounces per acre. The maximum combined total of this product that can be applied during flowering (R2 stage soybeans) is 51 fluid ounces per acre. Refer to individual tank mixture product labels for restrictions and precautions; use according to the most restrictive precautionary statements for each product in the tank mixture. In some cases, these tank-mix products will cause visual soybean injury.

Preharvest
USE INSTRUCTIONS: This product may be applied to Roundup Ready 2 Yield soybeans for weed control prior to harvest. Apply up to 25 fluid ounces of this product per acre after pods have set and lost all green color.

PRECAUTIONS, RESTRICTIONS: Care should be taken to avoid excessive seed shatter loss due to ground application equipment. Allow a minimum of 14 days between final application and harvest of soybean grain or feeding of soybean grain, forage or hay.

Post-Harvest
USE INSTRUCTIONS: This product may be applied for weed control after harvest of Roundup Ready 2 Yield soybeans. Higher rates may be required for control of large weeds that were growing in the crop at the time of harvest. Tank mixtures with 2,4-D or dicamba may be used.

NOTICE
Read the “WARRANTY DISCLAIMER” and “LIMITATION OF LIABILITY” in the label booklet for this product before using this product. Those terms apply to this supplemental labeling and if those terms are not acceptable, return the product unopened at once.
