**USE PRECAUTIONS:** READ ENTIRE LABEL. USE ONLY IN ACCORDANCE WITH LABEL INSTRUCTIONS. Application of this product will kill almost all plants contacted. Do not allow this product to contact leaves, green stems, or exposed roots of desirable lawn grasses, plants, shrubs, or trees — they will be damaged or killed. Spray when air is calm. If spray contacts desirable foliage, immediately rinse the foliage with water. Use cardboard or plastic to shield desirable plants from spray drift.

**WHERE TO USE:** Use outdoors on patios, patios, walkways, driveways, sidewalks, mulch, and around fences and buildings; around fruits and nut trees, grapevines, and vegetables; in and around flower beds and gardens; and around ornamental shrubs and trees; and in fields and landscape areas. This product is non-selective and will kill all plants, both desirable and undesirable, which comes in contact with the product. Do not use for spot weed control in lawns; this product kills all green plants, including lawn grasses.

**HOW TO USE:** Use any unwanted weeds and grasses are actively growing. Apply when daytime temperature is above 60°F, when air is calm, and when rainfall is not expected within 24 hours. Warm sunny weather will speed up weed control. Reapply if rain or watering occurs within 6 hours after application. Rainfall or watering 5 hours after application will wash away effectiveness. Hand-held and weed grasses (such as Bermudagrass) may require a repeat application in 10-14 days.

**STUMP TREATMENT:** Treat unwanted woody brush and trees (such as alder, blueberries, eucalyptus, madrona, oak, blackberry, saltcedar, sweetbay, and tamarack) when actively growing. Cut the unwanted woody vegetation close to the soil surface, make holes in cut surface of the stump using a nail or drill, and immediately (within 5 minutes) flood the cut surface with undiluted product. Use the product straight from the bottle. Do not dilute. IMPORTANT: Stump treatment may result in injury to nearby non-tREATED vegetation with shared root systems. Adjacent vegetation of a similar age, height and spacing may signal a shared root system.

Refer to the chart below to determine the amount of this product to use. Use mixed spray within 2 weeks.

**SPOT TREATMENT**

Using a coarse drop spray, carefully spray unwanted foliage until wilt.

To prepare the areas for planting of ornamentals, trees, shrubs, desert landscapes, rock gardens, flower beds or similar plantings, apply this product as directed for Spot Treatment or Brush Control. Treated areas can be replanted as soon as 1 day after treatment. For best results, remove dead foliage before replanting.

**TREATMENT TIPS:**

- To kill existing weeds and grasses in lawns, apply when lawn is actively growing. Best results will be obtained in the Spring or Fall, when daytime temperatures are at least 60°F. Under dry conditions, prepare lawn by watering every other day for a week before using this product. Do not mow for 7 days before or after treatment. After 7 days, prepare the soil for planting by raking or rototilling the lawn. Make up and remove loosened thatch or debris. Mix in starter fertilizer and other amendments and level soil, as needed. Apply seed according to package directions, or as directed. Keep area moist until new lawn is well established.

- **BRUSH CONTROL**

  Treat unwanted brush when it is green and growing. If brush is more than 6 feet tall, cut it back to the base and spray regrowth. Brush sprayed in the fall may not be fully controlled until the following season. Hand-held control brush (such as blackberry, kudzu, or poison ivy) may require a second application in 30 days.

- **TALL WEEDS**

  If weeds are growing up a pole, fence, or pasture fence, cut vines to a height of 3 to 4 feet and spray to thoroughly cover the remaining foliage. If vines are climbing a shrub or immature tree trunk, cut vines at the base and spray regrowth. Protect desirable shrubs and tree trunks from spray drift with cardboard or plastic.
WHEN TO BE SOWN OR REPLANT TREATED AREAS

This product kills weeds by stopping the production of a substance found in plants. Any of this product not absorbed by the plant breaks down into natural materials. This product does not move or settle in the soil or build up in the soil to hurt desirable plants growing nearby.

- All ornamental flowers, trees and shrubs may be resowed or planted 1 day after treatment.
- The following berries may be planted 1 day after application: Blackberry, Blueberry, Bittersweet, Cranberry, currant, dewberry, Elderberry, Gooseberry, Huckleberry, Loganberry, Ooloberry, and Raspberry (black and red).
- The following fruits, vegetables, and herbs may be planted 1 day after application: Artichoke (Jerusalem), Beets (all), Beet greens, broccoli, Brussels Sprouts, Cabbage (all), Carrot, Cauliflower, Celery, Chard (Swiss), Chicory, Collards, Endive, Horseradish, kale, Kohlrabi, lettuce, Lettuce, Mustard greens, Onion, Okra, Pepper greens, Parsley, Parsnips, Peas (all), Peppers (all), Pumpkin, Squash (summer and winter), Tomatoes, Tomato (beef), and Watercress.
- Lawn grasses (from seed or sod) may be planted 7 days after application.
- Tomatoes (from transplant) and unfortified fruits, vegetables and herbs may be planted 30 days after application.

WHEN TO HARVEST

If this product is used to control weeds around fruit or nut trees, cacti, cranberries, or grapevines, wait 17 days before eating the fruits or nuts.

STORAGE AND DISPOSAL

STORAGE: Store product in original container in a safe place away from direct sunlight. Keep from freezing. Store and transport in an upright position.

DISPOSAL: Nonrefillable container. Do not reuse or refill this container. If Empty: Place in trash or offer for recycling if available. If Partially Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

FIRST AID

If in eyes
- Hold eye open and rinse slowly and gently with water for 15–20 minutes.
- Remove contact lenses, if present, after first 5 minutes, then continue rinsing eyes.
- Call a poison control center or doctor for additional treatment advice.

If swallowed
- Drink water or milk (ifconscious). Do not induce vomiting unless specifically directed by a physician or poison control center.
- Call a poison control center or doctor for treatment advice.

Emergency Medical Information

Have the product container or label with you when calling a poison control center or doctor. The National Poison Control Center is available 24 hours a day, 7 days a week. In the U.S., call 1-800-222-1222. In Canada, call your regional poison control center.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING: Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear safety glasses, Harmful if inhaled. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse. People and pets may enter treated areas after spray has dried.

ENVIRONMENTAL HAZARDS

To protect the environment, do not allow this product to enter any drains, storm drains, ditches, gutters or surface waters. Applying this product in calm weather when rain is predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid runoff to water bodies or drainage systems.

NOTICE: To the extent consistent with applicable law, buyer assumes all responsibility for safety and use not in accordance with directions. Product guaranteed to the extent of purchase price, only when used according to label directions.
