Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions
Do not apply to any site, to any pest, or by any method not specified on this label. This product may only be used to control moles and pocket gophers in residential, below ground applications in lawns. Bait must be applied directly into burrow systems. Do not apply in gardens and areas where food or feed may be contaminated. Do not apply this product by use of an artificial burrow builder. Not to be sold in individual containers containing more than 1 pound of product.

Specific Directions for Mole
The presence of moles may be indicated by a network of surface ridges in the turf. By a series of conical mounds of earth pushed up from deep burrows, or by damage to flower bulbs.

Surface Ridges
Prior to treatment determine which burrows are active according to one of the following two methods. Either press down a small section of the tunnel or remove a one inch section of the tunnel’s roof. Mark these sections and recheck in 24 hours. The burrows is considered active if the flattened runway has been raised up or if the roof has been repaired. Only treat active burrows.

Carefully punch a hole in the top of active tunnels, drop a tablespoon amount of this product and carefully close the hole with soil or stone. Do not collapse the runway again or allow loose soil to cover the hole. After a few days check to see if the burrows are still active according to one of the two methods described above. If so, repeat treatment.

Conical Mounds
Remove center plug from the conical mound with a knife or long-handled spoon and drop a tablespoon amount of this product into the underground tunnel. Close opening with soil or stone. Do not allow loose dirt to cover bait.

First Aid Directions

If inhaled: Move person to fresh air. If person is not breathing, call 911 or attend, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present. After the first 5 minutes, rinse continuously for 15 minutes. Call a poison control center or doctor for further treatment advice.

How to treat the container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-964-9444 for emergency medical treatment information.

If you experience signs and symptoms such as nausea, abdominal pain, tightness in the chest, or weakness, see a physician immediately. For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents) call the National Pesticide Information Center at 1-800-925-7791.

Storage and Disposal

Pesticide Storage: Store in original container only in an upright position, and in a dry place inaccessible to children and pets.

Pesticide Disposal: Nonrefillable container. Do not reuse or refill empty container. If empty – Place in trash or offer for recycling if available. If partially filled – Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

First Aid Directions

If swallowed: Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.

If on skin or clothing: Take off contaminated clothing. Rinse skin or clothing immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

First Aid Directions

If inhale: Move person to fresh air. If person is not breathing, call 911 or attend, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present. After the first 5 minutes, rinse continuously for 15 minutes. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-964-9444 for emergency medical treatment information.

If you experience signs and symptoms such as nausea, abdominal pain, tightness in the chest, or weakness, see a physician immediately. For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents) call the National Pesticide Information Center at 1-800-925-7791.

Treatment for Pet Poisoning: If animal eats bait, call veterinarian at once.

Note to Physician or Veterinarian: Contains organophosphate-active, zinc phosphide. Probable mucosal damage may contraindicate the use of gastric lavage. For animals ingestion bait and/or showing poisoning signs, induce vomiting in using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the stomach acidity. The stomach and intestinal tract can be evacuated, oxygen administered and cardiac and circulatory stimulants given.
Bonide Products, Inc. offers a complete line of gardening products.
Insect Control,
Disease Control,
Weed Control, Repellents,
Specially Fertilizers
and Plant Nutrients.

Ask your local garden center about these additional Bonide® Mole and Gopher Control products:

Revenge Moletox® Mole Killer
-The patented syringe injector system allows you to deliver pre-measured doses of bait directly into the tunnel. One syringe covers up to 10,000 sq. ft.

Bonide® MOLEMAX® Mole & Vole Repellent
-A granular product that provides an effective means of repelling burrowing animals from desirable turf and ornamental areas. Can also be used when planting bulbs to prevent rodent predation.

Mole Trap
-These easy to set traps may be used over and over, providing effective, economical mole control. Sturdy metal construction lasts for years.

Rodent Smoke Bombs
-An effective, quick and reliable product for Moles, Gophers, Woodchucks, Rats, Skunks, and Ground Squirrels. The smoke will penetrate deeply into tunnels to do the job.

Some Bonide® products are not available or registered for use in some states. Ask your local garden center which products are available in your area.

Thank you for buying Bonide® Products.
