Commercial, Feeds & Dairy, Residential

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with this label.

Hold container upright, nozzle away from you and press actuator button by squeezing as directed.

**TO TREAT ANIMALS:** To protect cattle from attacks of stable flies, horse flies, deer flies, house flies, mosquitoes, gnats, and stable flies spray about 3 seconds on each side, being careful not to spray back. Do not inhale or expose skin to the fumes. For treatment of cattle, spray the body of the animal to be treated in treated area and ventilate area after treatment is completed.

**IN ANIMAL QUARTERS & MILK ROOMS:** For rapid control of house flies, mosquitoes, gnats, and stable flies close doors and windows and spray at the rate of 1 second per 1000 cubic feet of space. For best results keep area closed for 10 minutes after spraying. Do not feed, drink, or allow any person or animal to enter treated area. For use in treated area and ventilate area after treatment is completed.

**HOME AND FOOD PROCESSING AREA USE:** For flies, mosquitoes, small flying gnats (mites), and gnats. Close all doors and windows. Point nozzle upward, directed spray mist to all parts of the room, especially windows and other light sources. Wash all fly-proofed areas, openings around pipes and sinks, under refrigerators, baseboards and storage areas. Spray directly on insects where possible. Repeat as necessary. Ants: Spray trails, nests and points of entry. Spiders on animals where possible. Repeat to more than once per day.

**FOR USE IN STORAGE SITES:** This product can be used in warehouse bins and trucks, cargo ships, mills, bin hoppers, elevators, and conveyors to reduce populations of house flies, stable flies, brown rats, mice, and other rodents. Use a fine mist to disperse the spray. For controlled areas and conveyors should be thoroughly cleaned by sweeping out the waste and water. All food, coconuts and other food items from the work area as well as the floor and storage areas with special attention to material stored in the cracks and crevices. All the food should be removed and keys and other items that might be there removed. Before processing begins, wash down all equipment, benches, shelves, etc. Use in feedholding tanks will be handled with an effective cleaning compound followed by pesto fly. Repeat treatment every week or as an infestation occurs.

**FOR USE ON STORED PRODUCTS:** This product can be used in rice, flour, beans, nutmeg, rum, and lard and other similar products, flour, sugar, flour, and other food products. Use a fine mist to disperse the spray. For controlled areas and conveyors should be thoroughly cleaned by sweeping out the waste and water. All food, coconuts and other food items from the work area as well as the floor and storage areas with special attention to material stored in the cracks and crevices. All the food should be removed and keys and other items that might be there removed. Before processing begins, wash down all equipment, benches, shelves, etc. Use in feedholding tanks will be handled with an effective cleaning compound followed by pesto fly.
