Directions for Use

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read the following directions for use thoroughly before application.

Before using Oblitiroot on any sewer line with more than one root intrusion, the roots should be cut out. If this is not done, the foam which travels down the line will only collide with the first set of roots and be obstructed from flowing down and reaching other intrusions and joints.

Make sure that when you are pouring the chemical into the application site you do not create a splash which could come in contact with user's eyes.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of area during application.

This product is composed of 2 separate components. Part B is sulfamic acid, a dry solid crystal. Part A contains the pesticidal component and is a thick liquid. Both parts must be used together in any application.

How it Works

Oblitiroot contains Dichlobenil which kills tree roots and prevents new root growth. Dichlobenil is readily absorbed on organic and inorganic colloids of sludge and clay in pipe joints providing residual control of root re-growth by inhibiting the development of actively dividing meristem cells in root tips. New root growths formed outside the pipe joints are retarded or inhibited in growth when they come in contact with Dichlobenil inside the pipe. Oblitiroot self-foams on contact with water. The foam acts as a delivery agent, putting the active ingredient in contact with the tree roots above the flow of water in the pipes.

NOT FOR USE IN SEPTIC SYSTEMS IN THE STATE OF FLORIDA

Cleanout Application

Parts needed: Oblitiroot 1.6 lb. container, pouch opening device (e.g. scissors), stirring utensil, 5 gallon bucket, and water.

Steps:

1. Open and empty Part A Oblitiroot pouch (liquid) into a 5 gallon bucket.
2. Open and empty Part B Oblitiroot pouch (dry powder) into the 5 gallon bucket.
3. Add a small amount of water (a few cups, approximately 3-4).
4. Stir together (At this point it should be foaming slowly, to fill the bucket)
5. Don't wait until the bucket is full – dump it down the cleanout
6. Follow up the application with a few gallons of water, either 4 flushes of a low flow toilet or 6-8 gallons through the cleanout, to carry Oblitiroot to the root infestation.
7. Wait 1-2 hours before running water down the sewer (up to 8 hours is preferred).

Toilet Bowl Application

Parts needed: Oblitiroot 1.6 lb. container and pouch opening device (e.g. scissors)

Steps:

1. Empty Part B Oblitiroot pouch into the toilet bowl.
2. Empty Part A Oblitiroot pouch (liquid portion) into the toilet bowl, near the drain hole.
   a. At this point there should be a small amount of foam – Oblitiroot doesn't foam a lot until it is agitated. In the toilet bowl application this agitation is provided by the flushing action.
3. Follow up the application with a few gallons of water, 4 flushes of a low flow toilet, to carry Oblitiroot to the root infestation.
4. Wait 1-2 hours before running water down the sewer (up to 8 hours is preferred).

Maximum Application Rates

Use one 1.6# bottle for 4” x 100’ line (Add both Part A and Part B)
Use one 2.4# bottle for 6” x 100’ line (Add both Part A and Part B)
Ingredients

ACTIVE INGREDIENT
Dichlobenil (5,6-Dichlorobenzoanilide) 1.934%

OTHER INGREDIENTS 98.076%

TOTAL 100.0%

Keep Out Of Reach Of Children

CAUTION

Precautionary Statements

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing dust.

Personal Protective Equipment (PPE)
Applicators and other handlers, including mixers and loaders, must wear long-sleeved shirt, long pants, shoes plus socks and chemical-resistant gloves. Mixers and loaders must also wear a chemical-resistant apron. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

First Aid

If in eyes • Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

If inhaled • Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

If on skin • Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed • Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to by a poison control center or doctor.
• Do not give anything to an unconscious person.

Hot Line Number: For emergency information on product, use, etc., call the National Pesticides Information Center at 1-800-858-7378, 6:30 AM to 4:30 PM Pacific time (PT), seven days a week. During other times, call the poison control center 1-800-222-1222.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.
ACTIVE INGREDIENT:
Dichlobenil (2,6 Dichlorobenzonitrile) 1.5%
OTHER INGREDIENTS 98.5%
Total 100.0%

Keep Out Of Reach Of Children

Net Contents: 9.5 lbs.

Precautionary Statements
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing.
Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing dust.

Personal Protective Equipment (PPE)
Applicators and other handlers, including mixers and loaders, must wear long-sleeved shirt, long pants, shoes plus socks and chemical-resistant gloves. Mixers and loaders must also wear a chemical-resistant apron. Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Storage and Disposal
Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store in a dry place. Avoid storage near food or feed products.
Pesticide Disposal: Wastes resulting from the use of this product must be disposed of in a manner that is acceptable to the state waste disposal facility. Container Handling: Non-refillable container. Do not reuse or refill this container. Completeness containers by shaking and tapping the sides and bottom to loosen clinging particles. Empty residue from containers into application site. Triple rinse with a small amount of water to reduce foaming. Pour rinse from container into application site. If empty, place in trash or offer for recycling, if available.

Environmental Hazards
For terrestrial use: do not use near a well or where drinking water is stored.
Do not apply directly to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment, wash water or rinse. This chemical has properties and characteristics associated with chemicals detected in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow may result in ground water contamination.

Physical and Chemical Hazards
Do not use with or store near oxidizing agents.

First Aid

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measure against circulatory shock, respiratory depression and convulsions may be needed.

User Safety Recommendations
Users Should
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing and PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Municipal Directions for Use

Commercial application for 8”x300’ or larger municipal sewer lines

Clear obstructions in the line with rooter cable-augers/cutters so that flow is restored. Attach an Olvidium-Oblitroot applicator to the end of the auger/cable. This can be a set of rollers, sponge, or mop-head (see Olvidium’s literature to determine best choice and size). Run the cable with the attachment down the line past the last obstruction which was cut out or to the end of the line being cleared/treated.

Mix Part A into a 55 gallon drum with ½-1 gallon of water. Add Part B and stir with a stirring stick or a mixing device. The 2 parts will foam and partially fill the drum. Before the foam reaches the top of the drum pour the foam contents into the manhole upstream where the cable is located. The gravity fed foam should travel into the line. Wait 2 minutes for the foam to travel to the attachment in the line. The foam will float on any water in the line. Withdraw the cable slowly. The attachment will rotate and brush/push the foam onto the pipe and root surfaces and into the joint in which they grew. The idea is to fill the joint with foam. It is desirable that the foam has as little water mixed in as possible. As it dries it forms a water resistant film similar to paint which will continue to kill roots and prevent re-growth for as long as it is present.

Oblitroot contains soybean oil and synthetic latex which permits it to self-foam without any water. A small amount of water is added to improve its flow characteristics into the line. Larger lines may require additional water (5-10 gallons) poured in after the foam to enable proper flow down the line.

An alternative method of applying would be to pour the foam from the drum into a 4-6” funnel and hose at ground level which feeds into the line directly at the bottom of the manhole.

Storm Line Application and Usage Rates

Oblitroot may be applied in a storm line by applying to the line in the same manner as sewer lines.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, MANUFACTURER WILL NOT BE LIABLE FOR ANY LOSS, INJURY OR DAMAGES AND TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, PURCHASERS AND/OR USERS OF THIS PRODUCT HEREBY WAIVE ANY STRICT LIABILITY. THERE ARE NO IMPLIED WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR THE PARTICULAR PURPOSE, AND THERE ARE NO OTHER IMPLIED WARRANTIES, EXCEPT AS SPECIFICALLY SET FORTH ON THIS LABEL. MANUFACTURER’S OBLIGATION ON ANY CLAIM IS LIMITED TO REPLACEMENT OF ANY DEFECTIVE PACKAGE OF OBLITROOT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, MANUFACTURER WILL NOT BE LIABLE FOR ANY LOSS, INJURY OR DAMAGES TO PERSONS OR PROPERTY RESULTING FROM FAILURE OR IMPROPER USE OF THE PRODUCT, NOR WILL THE MANUFACTURER BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES OF ANY KIND SUSTAINED BY THE PURCHASER OR USER OF THIS PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, PURCHASERS AND/OR USERS OF THIS PRODUCT HEREBY WAIVE ANY STRICT LIABILITY OR PRODUCT LIABILITY CLAIM THEY MIGHT HAVE AGAINST THE MANUFACTURER AND/OR SELLER. SELLER AND MANUFACTURER ARE NOT LIABLE FOR ANY USE OF THIS PRODUCT NOT IN COMPLIANCE WITH THE DIRECTIONS ON THIS LABEL.
Blitioroot
Kills Roots in Sanitary and Storm Sewers
Self Foams on Contact With Water
Inhibits New Root Growth
Does Not Contain Copper

ACTIVE INGREDIENT:
Diclorobenzil (2.6 Dichlorobenzonitrile)
Other INGREDIENTS

Net Contents: 1.6 lb.

Keep Out Of Reach Of Children
CAUTION
See side panel for additional precautionary statements.
This product is composed of 2 separate components. Part B is sulfuric acid, a dry solid crystal. Part A contains the pesticidal component and is a thick liquid. Both parts must be used together in any application.

When handling Sulfuric Acid, refer to PPE section attached to Part B container.

Net: 1.6 lbs.

Precautionary Statements
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing dust.

Personal Protective Equipment (PPE)
Applicants and other persons, including metered-liners, must wear long-sleeved shirt, long pants, shoes plus socks and chemical-resistant gloves. Mixers and loaders must also wear a chemical-resistant apron. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are available, washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Storage and Disposal
Do not contaminate water, food, or feed by storage and disposal:

Pesticide Storage: Store in a dry place. Avoid storage near food or feed products.
Pesticide Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.
Container Handling: Non-refillable container. Do not reuse or refill this container.

Environmental Hazards
For terrestrial uses do not use near a well or where drinking water is drawn. Do not apply directly to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment, wash water or rinsate. This chemical has properties and characteristics associated with chemicals directed in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow may result in ground water contamination.

First Aid
If in eyes
Hold eye open and rinse slowly and gently with water for 15-20 minutes
Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
Call a poison control center or doctor for treatment advice.

If inhaled
Move person to fresh air.
If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
Call a poison control center or doctor for further treatment advice.

If on skin
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15-20 minutes.
Call a poison control center or doctor for further treatment advice.

If swallowed
Have person sip a glass of water if able to swallow.
Do not induce vomiting unless told to by a poison center control center or doctor.

Hot Line Number: For emergency information on product, use, etc., call the National Pesticides Information Center at 1-800-858-7377, 6:30 AM to 6:30 PM Pacific time (PT), seven days a week.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed.

User Safety Recommendations

Users Should
Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
Remove clothing and PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Precautionary Statements
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION
Do not use in the presence of any oxidizing agents.

Physical and Chemical Hazards
Do not use with or store near oxidizing agents.
