DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact adults, children, or pets.

SPECIFIC INSTRUCTIONS

SEWER TREATMENT - ROOT DESTROYER

ROOT CONTROL GENERAL INFORMATION: Plant roots can penetrate through small cracks and poorly sealed joints of sewer lines. These small, roots will continue to grow larger causing breakage, reduced flow and flow stoppage. Copper sulfate has been known to be an effective means to control roots in residential sewers.

RESIDENTIAL SEWER SYSTEMS: When a reduced water flow is first noticed, and root growth is thought to be the cause, treat with product. It is important not to wait until a stoppage occurs because some water flow is necessary to move copper sulfate to the area of the root growth. Usually, within 3 days, after roots have accumulated sufficient copper sulfate the roots will die and begin to decay and water flow should increase. As the roots grow, follow-up treatments with copper sulfate will be required. Applications may be made each year in the spring after plant growth begins and during late summer or early fall. The minimum retreatment interval is 6 months. Apply 1 pound of product two times a year to household sewers. Add product to sewer lines by pouring about 1/2 pound increments into the toilet bowl nearest the sewer line and flush, or remove cleanout plug and pour entire labeled quantity directly into the sewer line. Replace the plug and flush the toilet several times.

ROOT CONTROL IN SEPTIC TANK AND LEACH LINE PIPES:

SEPTIC TANK – The majority of copper sulfate will settle in the septic tank itself and little will pass through the leach lines. A cleanout plug opening may need to be installed if the distribution box does not have an opening leading to the leach lines.

NOTE: Do not use as a sewer additive where prohibited by State law.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store in original container and place in a locked storage area.

Precautionary Statements:

- HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS
- DANGER - PELIGRO
- CORROSIVE: Causes irreversible eye damage. May be fatal if swallowed. Harmful if absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Wear protective eye wear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

- ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic invertebrates and may contaminate water through runoff. For terrestrial uses, do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsates.
