Controls Pythium blight, Pythium damping-off and Pythium root dysfunction in turf.

GROUP 21 FUNGICIDE

ACTIVE INGREDIENT:
Cyazofamid* .............................. 34.5%

OTHER INGREDIENTS: ...................... 65.5%
TOTAL 100.0%

*4-chloro-2-cyano-N,N-dimethyl-5-(4-methylphenyl)-
1H-imidazole-1-sulfonamide (CA)
Contains 3.33 pounds Cyazofamid Per Gallon (400 grams per liter)

KEEP OUT OF REACH OF CHILDREN

CAUTION

See attached booklet for complete Precautionary Statements and Directions for Use (including First Aid, Agricultural Use Requirements and Storage and Disposal).

640/11-2016

NET CONTENTS: 39.2 FL. OZ.
reasonably suited for the labeled use when applied according to the Directions for Use, subject to the inherent risks described below. OR OTHERWISE, SHALL BE LIMITED, AT THE MANUFACTURER’S OPTION, TO REPLACEMENT OR THE REPAYMENT OF OR IMPLIED WARRANTIES, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, THE USE OR HANDLING OF THIS PRODUCT, WHETHER OR NOT BASED IN CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT, OR OTHERWISE. Buyer and all users further agree to assume all risks of loss or damage from the use of the product in any manner that is not explicitly formulated in the USA.

Tank Mixing
Formulated in the USA.

Active ingredient made in Germany.

LIMITED WARRANTY AND DISCLAIMER

Segway has limited systemic activity, it should be utilized as a protectant fungicide and applied before the disease infects the crop. Since pathogens differ in their potential to develop resistance to fungicides, follow the directions outlined in the “Directions For Use” section of this label for specific resistance management strategies for each crop. Consult with your Federal or State Cooperative Extension Service or local agricultural authorities for additional IPM strategies established in your area. Segway may be used in State and Federal IPM programs.

Tank Mixing Compatibility

Segway is an excellent disease control agent when used according to label directions for control of several Oomycete fungi. Although strong disease control has been observed for several years, repeated use of Segway has resulted in disease development and/or control of several Oomycete fungi. Although strong disease control has been observed for several years, repeated use of Segway has resulted in disease development and/or control of several Oomycete fungi. These changes have been attributed to the active ingredient of the product. When disease conditions are severe use the highest rate and shortest interval. Apply non-ionic surfactant should be added when disease infection is moderate or longer interval. When disease is severe use the highest rate at the shortest interval and the higher rate at the longest interval. When

In case of spills or leakages, avoid entering the contaminated area. Use personal protective equipment (PPE) and follow local regulations. Segway is generally compatible with other insecticides, fungicides, fertilizers and micronutrient products provided sufficient free water is available for dispersion of all the tank mix products. However, the physical compatibility of Segway with tank mix partners should be evaluated for each product combination.

Storage and Disposal

DO NOT enter into water, food or feed items. Segway is designed to be used topically as directed in the label.

REMEMBER: Segway is a very low vapor compound. In an enclosed space, if you inhale Segway for an extended period, it can cause irritation of the nose, throat, and respiratory system. Segway may be stored outside in an original container. Segway is toxic and must be disposed of properly. Segway should not be disposed of in the environment. Segway is not hazardous to the environment. Segway is not hazardous to the environment. Segway is not hazardous to the environment.

</tbody>
</table>

**STORAGE:**

- Store container tightly closed in a cool, dry, well-ventilated area, out of the reach of children.
- Do not store in or mix with anhydrous ammonia.
- Do not store near food or feed products.
- Do not store near products that can be damaged by fungicides.

**PRECAUTIONARY STATEMENTS:**

**Hazard Class:**

- Environmental Protection Agency (EPA) hazard category C
- California Proposition 65 category C

**Hazard Statements:**

- May cause eye irritation. (H319)
- May cause respiratory irritation. (H335)
- May cause sensitization upon repeated exposure. (H317)
- May cause respiratory or skin irritation. (H310, H330)
- May be harmful if inhaled. (H331)
- May cause harm through ingestion. (H318)
- May cause sensitization through skin contact. (H317)
- May cause harm through dermal contact. (H315)

**Precautionary Statements:**

- CAUTION. For professional use only. (P261)
- Handle with care. (P273)
- Wear protective clothing. (P280)
- Do not breathe dust, fume, vapor or spray. (P260)
- Use only with proper equipment. (P281)
- Avoid contact with skin. (P266)
- Avoid contact with eyes. (P261)
- Keep out of reach of children. (P265)
- Do not inhale dust. (P262)
- Do not enter treated areas until the product has dried. (P264)

**Environmental Hazards:**

- Use only in a well-ventilated area. (P241)
- Spill or leak in an enclosed or limited area may cause air contamination. (P274)
- Do not leave container leaking. (P274)
- Do not use and store in the United States in any form of container. (P260)
- Do not inhale the dust or spray mist. (P270)
- Do not inhale dust or spray mist. (P280)

**Personal Protective Equipment (PPE):**

- Use the highest level of protection specified in the Warning Section. (P246)
- Use personal protective equipment as outlined on the label. (P243)
- Use personal protective equipment. (P244)

**Engineering Control Measures:**

- Do not use in a confined space. (P280)
- Do not use if you are not trained in its use and are not wearing personal protective equipment. (P280)
- Use with proper ventilation equipment. (P281)

**First Aid Measures:**

- Contact a physician immediately. (P301)
- Do not give anything by mouth to an unconscious person. (P303)
- Call a poison control center or doctor if you think you may have inhaled or ingested the product. (P304)

**Emergency and Disposal Procedures:**

- Spill or leak in an enclosed or limited area may cause air contamination. (P274)
- Do not leave container leaking. (P274)
- Do not use and store in the United States in any form of container. (P260)
- Do not inhale dust. (P270)

**Technical Information:**

- Active ingredients: pyraclostrobin 34.5% and tebuconazole 0.9%

**Characteristics:**

- Colorless to pale yellow liquid.
- Odorless.

**Uses:**

- For control of early and late blight (Phytophthora infestans) of potatoes and tomatoes.
- For control of grey mold (Botrytis cinerea) of potatoes and tomatoes.
- For control of root and stem rot diseases of ornamentals, including coniferous trees.
- For control of downy mildew (Plasmopara viticola) of grapes.
- For control of damping-off (Pythium splendens) of turf grass.

**Directions for Use:**

- Thoroughly wet the foliage or soil to the point of run-off. (P273)
- Do not exceed the maximum recommended rate. (P273)
- Do not exceed the maximum number of applications. (P273)
- Do not exceed the maximum treatment interval. (P273)

**Environmental Protection:**

- Apply at the lowest rate of active ingredient that controls the disease. (P270)
- Apply only as a spray, if a mist is visible, do not apply. (P273)
- Do not spray on areas that will be grazed by livestock, poultry, or other animals. (P273)
- Do not exceed the maximum number of applications. (P273)

**Product Label:**

- Labeling requirements include warning statements, precautionary statements, and hazard classification. (P273)

**Additional Information:**

- This product is a systemic fungicide. (P273)
- This product contains two active ingredients. (P273)
- This product is labeled for use on a variety of ornamental and turfgrass species. (P273)

**Service Provider:**

- Segway Fungicide SC (640) 39.2 oz ETL (2-2017)

**Contact Information:**

- For Chemical Extension, Segway Fungicide SC (640) 39.2 oz ETL (2-2017), dial 1-800-424-9300.
Integrated Pest Management

Segway is a system of disease control suited to central control at a plant level according to the tactics described for each disease. Although Segway has limited systemic activity, it should be applied as a pre-emptive fungicide and applied before the disease develops. This permits reduction of disease pressure through preemptive action against early stages of disease development. Segway is not recommended for use as a curative fungicide. Segway should be utilized as a protectant fungicide and applied before the disease infects the crop. Estimation of the level of disease pressure is essential to the successful use of Segway. Depending upon the level of disease pressure, good protection of the crop against disease can be expected over a period of 7 to 28 days. 

Storage and Disposal

DO NOT contaminate water, feed or soil by means of storage or disposal. Open dumping is prohibited. Spray equipment should be thoroughly cleaned after use. Segway is compatible with most commonly used adjuvants. Insecticides, fungicides, herbicides and/or non-ionic surfactants are compatible with the product. Segway may be tank mixed with other registered fungicides with different modes of action. Segway may be tank mixed when killing fungicides are not contraindicated for use with this product. It is recommended that the use of a compatible surfactant be used when the disease infection is severe, or a non-ionic surfactant or a blend of an organosilicone and a non-ionic surfactant is recommended. 

LIMITED WARRANTY AND DISCLAIMER

Impact Rum and ISCCM are pleased to inform you that the material you have purchased is of the highest quality and will perform as advertised. If the product is not acceptable, return the product unopened and the purchase price will be refunded.

Active ingredient made in Germany.

Pyrophenone is a registered trademark of Ishihara Sangyo Kaisha, Ltd.

Segway is a registered trademark of Ishihara Sangyo Kaisha Ltd.

The terms of this LIMITED WARRANTY AND DISCLAIMER cannot be varied by any written or verbal statements or agreements at the point of sale or elsewhere. No employee or agent of the manufacturer or seller is authorized to vary or exceed the terms of this Limited Warranty.

In the event that the product is not acceptable, return the product unopened immediately to the point of purchase, and the purchase price will be refunded.

If you have any questions concerning technical aspects of this product, contact the manufacturer:

First Aid

If on skin:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of soap and water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If in eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

If swallowed:
- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

HOTLINE NUMBER
For 24-Hour Medical Emergency Assistance (Human or Animal) Call 1-877-800-5556.
For Chemical Emergency, Spill, Leak, Fire or Accident, Call CHEMTREC 1-800-424-9300.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals
CAUTION: Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. DO NOT take internally.

Environmental Hazards
DO NOT apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. DO NOT contaminate waters when disposing of equipment wash waters or rinsate.

AVOIDING SPRAY DRIFT AT THE APPLICATION SITE IS THE RESPONSIBILITY OF THE APPLICATOR. The interaction of many equipment- and weather-related factors determines the potential for spray drift. The applicator is responsible for considering all these factors when making decisions. Where states have more stringent regulations, they should be observed.
