**FIRST AID (continued)**

**If ingested**
- Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**NOTICE**
For 24 Hour Medical Emergency Assistance: (Human or Animal) Call 1-800-356-4647.
For Chemical Emergency, Spill, Leak, Fire or Accident: Call CHEMTREC 1-800-424-9300.

**PREGNANCY**
- No studies have been conducted to determine if this product is capable of causing birth defects or other harm to the developing embryo or fetus.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**
Harmful if absorbed through skin. Avoid contact with eyes, skin, or clothing. Avoid breathing spray mist. DO NOT take internally.

**Personal Protective Equipment (PPE)**
- Applicator and other handlers must wear long-sleeved shirt and long pants, gloves, and chemical-resistant goggles made of any waterproof material.
- Remove PPE immediately after handling the product. Wash the outside of gloves before removing. As soon as possible wash thoroughly and change into clean clothing. Do not allow contact of contaminated clothing with unprotected skin. Follow manufacturer’s instructions for cleaning and disinfecting PPE. No such instructions for washables. Use detergent and hot water. Keep and wash PPE separately from other laundry.

**Engineering Control Statements**
- When handling use closed systems, enclosed cabinets, or an exhaust in a manner that meets the requirements listed in the Higher Protection Standard (HPS) for agricultural pesticides (40 CFR 330.240) (4 or 5).

**AVOIDING SPRAY DRIFT AT THE APPLICATION SITE**
- The application site is the responsibility of the applicator. The interaction of many equipment and weather-related factors determines the potential for spray drift. The applicator is responsible for considering all these factors when applying decisions. Where states have more stringent regulations, they should be observed.

**DIRECTIONS FOR USE**
- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Failing to follow the use directions and precautions on this label may result in plant injury or poor disease control.
- Do not use this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

**SEGWAY O**

**OFTEN COMMUNITY**

**ACTIVE INGREDIENT:**
- Cypermethrin: 34.9%
- Other Ingredients: 65.1%
- Total: 100.0%

**Contains 3.33 pounds (1500 grams) per gallon (4 litres) per litre)**

**EPA Reg. No.: 71522-13-59867**
**EPA Est. No.: 1022-TN-001**

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**
See inside for First Aid, Precautionary Statements, Directions For Use, Storage And Disposal, and Warranties and Disclaimers. Read entire label carefully and use only as directed.

**Produced For:**
- OPP, Inc.
- P.O. Box 53260, Atlanta, GA 30303
- (800) 356-4647

**Active Ingredient:**
- Manufactured in Germany
- Formulated in France

**907200**
**Net Contents: 1 Pint (473 ml)**

---

**ENGLISH HAZARDS**
- DO NOT apply directly to water, to areas where surface water is present or to identical areas below the mean high water mark. DO NOT contaminate waters when disposing of equipment wash waters or rinse.
AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Vertebrate Protection Standard. This Standard contains requirements for the protection of agricultural workers, pets, livestock, non-target wildlife, and prairie chickens from exposure to this product which can cause harm or death.

Application of this product is only allowed if the treated area is not within the scope of the Vertebrate Protection Standard. For additional information, refer to the Vertebrate Protection Standard.

NON-AGRICULTURAL USE REQUIREMENTS

Some plant pathogens are known to develop resistance to products used repeatedly for disease control. SEGWAY® products should be used in combination with other effective control methods, such as crop rotation, cultural practices, and the use of disease-resistant crop varieties. Consult your state cooperative extension service or local agricultural authorities for additional information.

PLANT TOLERANCE

SEGWAY® is a highly selective compound that is effective on a wide range of crops. It is non-selective on grasses and other non-target plants. Use with caution on crops with a high tolerance to the product.

INTEGRATED PEST MANAGEMENT

SEGWAY® is a syngeneic product, meaning it is a mix of different compounds. This mix provides a broad spectrum of control, making it effective against a wide range of pests.

APPLICATION TOLERANCE

SEGWAY® has been evaluated on several crops and has shown no indication of phytotoxicity. It is safe for use on a wide range of crops, including vegetables, fruits, and ornamentals.

APPLICATION INSTRUCTIONS

1. Pre-mix the SEGWAY® powder with water before adding it to the spray tank.
2. Use the correct application rate as recommended by the manufacturer.
3. Avoid spraying on hot, windy days or when the crops are stressed.
4. Use the proper application equipment and techniques.

AGRICULTURAL USE REQUIREMENTS (continued)

Seed and soil treatments, commercial greenhouses and nurseries are within the scope of the Vertebrate Protection Standard. For more information, refer to the Vertebrate Protection Standard.

RESISTANCE MANAGEMENT

Some plant pathogens are known to develop resistance to products used repeatedly for disease control. SEGWAY® is a multi-target site of action, meaning it can be used in combination with other products to reduce the risk of resistance development.

Initial Application

SEGWAY® should be applied at the recommended rate and timing as specified by the manufacturer. It is important to follow the label instructions carefully. Consult your state cooperative extension service or local agricultural authorities for additional information.

APPLICATION INSTRUCTIONS

1. Pre-mix the SEGWAY® powder with water before adding it to the spray tank.
2. Use the correct application rate as recommended by the manufacturer.
3. Avoid spraying on hot, windy days or when the crops are stressed.
4. Use the proper application equipment and techniques.

TANK MIX COMPATIBILITY

SEGWAY® is compatible with a variety of other pesticides and fungicides. It is recommended to consult with your local agricultural authority or extension service for specific recommendations.

Immediate Use

Spraying equipment should be thoroughly cleaned immediately after the application is completed. Rinse the mixing tank with water to remove any remaining product.

Task Compatibility

SEGWAY® is compatible with a variety of other pesticides and fungicides. It is recommended to consult with your local agricultural authority or extension service for specific recommendations.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Vertebrate Protection Standard. This Standard contains requirements for the protection of agricultural workers, pets, livestock, non-target wildlife, and prairie chickens from exposure to this product which can cause harm or death.

Application of this product is only allowed if the treated area is not within the scope of the Vertebrate Protection Standard. For additional information, refer to the Vertebrate Protection Standard.

Non-Agricultural Use Requirements

Some plant pathogens are known to develop resistance to products used repeatedly for disease control. SEGWAY® products should be used in combination with other effective control methods, such as crop rotation, cultural practices, and the use of disease-resistant crop varieties. Consult your state cooperative extension service or local agricultural authorities for additional information.

Plant Tolerance

physical incompatibility in the pet test indicates that BAYGAIN O should not be used in the same mix.

**ORNAMENTALS**

**Container Grown Plants - Soil Application**

For control of damping off, root and stem rot diseases of ornamentals, including container grown fruit in greenhouse and outdoor nurseries, apply BAYGAIN O as a soil drench or soil surface dust. Do not make more than 2 applications of BAYGAIN O per 100 gallons at any 10 day interval. Do not apply within 6 inches of the plant. One application of BAYGAIN O is effective against Pythium or Phytophthora root and stem rot diseases. BAYGAIN O may also be applied to soil via irrigation systems as noted below.

For root rot applications to container plants, use enough of the product to saturate the root zone of the plant and to maintain an even moisture. Do not exceed 3.0% of the root zone. It is sufficient for plants growing in a container with a 4-inch depth of growth media. Containers greater than 4 inches depth generally require more than 3 to 5 pounds of the product per container.

**Field Grown (Bed) Plants - Soil Application**

For control of damping off, root and stem rot in field-grown (bed) plants, including blueberries, strawberries, and similar applications, use sufficient water solution to allow for penetration in the root zone.

### For Application to Ornamental Plants

<table>
<thead>
<tr>
<th>Disease</th>
<th>Product Rate per 100 gallons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pythium rear rot and damping-off</td>
<td>1.5 to 3.0 fl. oz.</td>
</tr>
</tbody>
</table>

**Comments**

Make applications on a 14 to 28 day interval using another registered fungicide with a different mode of action between applications of BAYGAIN O. Within the rate range, use the lower rate at the shorter interval and the higher rate at the longer interval. Disease conditions are severe use the lower rate at the shorter interval. Apply sufficient volume (nearly 50 to 100 gallons per acre) to wet all foliage to the point of runoff. If water volumes used are less than 50 gallons per acre, an organic or inorganic surfactant should be added where disease infection is moderate or slight, according to the manufacturer's label recommendations.

**APPLICATION AND CALIBRATION TECHNIQUES FOR Drip Irrigation**

Apple has tested only through unprotected drip irrigation systems or micro-irrigation systems such as impulse-tube or individual tube irrigation, or coil and line systems. Do NOT apply this product through any other type of irrigation system.

Drip irrigation is the application of water to the root zone through drip emitters, or other devices, or through a root zone. Apple has used this product through micro-irrigation systems and drip irrigation systems. The application rate required is 80 gal./ac. for drip irrigation systems and 300 gal./ac. for micro-irrigation systems. The application rate required is 80 gal./ac. for drip irrigation systems and 300 gal./ac. for micro-irrigation systems.
storage and disposal

DO NOT contaminate water, food or feed by storage or disposal. DO NOT contaminate containers or packaging.

PESTICIDE DISPOSAL: Store in original container, in a secured, dry place separate from food, feed and feed additive.

PESTICIDE DISPOSAL: Do not dispose of empty pesticide containers or applicators in or near drains. Remove all labels and proper markings to indicate that it is not a pesticide.

CONTAINER DISPOSAL: Properly label container. DO NOT reuse or refill container. Do not reuse containers or applicators. Do not repackage pesticides in containers or other packaging.

this product is harmful to aquatic life and may cause serious injury or death to aquatic wildlife. Avoid contact with eyes or skin. Properly labeled pesticide containers may be disposed of in a landfill or incinerated.
